Release Enhancements

Death Master File Full Data Refresh

Description: In order to provide the most accurate, up-to-date death data to our Do Not Pay Portal users, the Death Master File will now undergo a full data refresh every quarter. The first full data refresh has been performed with this release. Due to the large number of initial corrections, users may notice an increase in a significant number of affected records; this number should decrease with future refreshes.

When a user attempts to adjudicate or view a previously matched record to the Death Master File, there may be missing information in some data fields. This only affects records that were incorrectly matched as deceased and are now corrected as living.

System for Award Management Entity Registration Records Field Widened

Description: When using *Online Search* and viewing matches to the System for Award Management Entity Registration Records data, users will now see the complete field instead of just a portion of the content, due to the column width being too narrow.

SAM Entity Registration Records	DUNS Number	Cage Code	Company Name
ACTIVE - 11/18/2015	349678548	2RBXG	GHOLR RKOLBGV, TZO

Production Fix

Multiple Adjudication Sorting

Issue: When a user sorted matches in the *Adjudicate Multiple Payments* screen and selected [Load More] for an additional 100 matches, the intended sort did not apply to the newly loaded records.

Resolution: Any newly loaded matches will be sorted according to the original column selection.

Select	Match Adjudication Status	Data Sources	Payment Type	Payee Name	SSN/EIN/TIN
