Download and Import Entrust Certificates (Java certificate store)

To download and import the Entrust Certificates to the Java certificate store, have a user with local workstation administrative privileges complete the following steps:

1. Download the Entrust Certificates to the desktop:

Entrust L1K (<u>https://www.entrust.com/root-certificates/entrust_l1k.cer</u>) Entrust G2 (<u>https://www.entrust.com/root-certificates/entrust_g2_ca.cer</u>)

- 2. Access your Control Panel under Start > Control Panel
- 3. Enter Java Control Panel in the Control Panel Search
- 4. Click the Java icon to open the Java Control Panel
- 5. Under the Security tab, click Manage Certificates

🐇 Java Control Panel 📃 🔲 🖾			
☑ Enable Java content in the browser			
Security level for applications not on the Exception Site list			
🔘 Very High			
Only Java applications identified by a certificate from a trusted authority are allowed to run, and only if the certificate can be verified as not revoked.			
High			
Java applications identified by a certificate from a trusted authority are allowed to run, even if the revocation status of the certificate cannot be verified.			
Exception Site List Applications launched from the sites listed below will be allowed to run after the appropriate security prompts
