In accordance with the requirements of section 15 of the act of July 31, 1894 (U. S. C., title 5, sec. 264), the receipts are classified, whenever practicable, by ports, districts, and States, and the expenditures by each separate head of appropriation.

The receipts, appropriations, and expenditures are also classified according to general, special, and trust accounts, respectively. On page 14 will be found a condensed statement of the receipts and expenditures classified according to these account distinctions.

The bases of the figures included in this report are explained in the Foreword appearing on pages 10 to 13.

Respectfully,

HON. H. MORGENTHAU, JR.,
Secretary of the Treasury.

JOSEPH GREENBERG,
Chief, Division of Bookkeeping and Warrants.

¹ Deficit on basis of daily Treasury statement (unrevised) was \$2,811,318,310.60.
² Represents net credits, on basis of daily Treasury statements (revised). Credits were also established on account of the purchase by the Secretary of the Treasury of the obligations of the Reconstruction Finance Corporation under sec. 9 of the Reconstruction Finance Corporation Act.
³ Exclusive of \$99,673,790.50 chargeable against increment on gold for retirement of national bank notes.

FOREWORD

BASES OF FIGURES INCLUDED IN THIS REPORT

RECEIPTS

Section 305 of the Revised Statutes (U. S. Code, title 31, sec. 147) provides that receipts for all moneys received by the Treasurer of the United States shall be endorsed upon warrants signed by the Secretary of the Treasury, without which warrants, so signed, no acknowledgment for money received into the Public Treasury shall be valid.

The receipts of the United States Government as published in this report are based upon warrants issued by the Secretary of the Treasury and represent the formal covering into the Treasury of the public moneys deposited in Treasury offices and Government depositaries during the fiscal year ended June 30, 1937.

EXPENDITURES

The expenditures in this report are exhibited on two different bases, namely: (1) Warrants issued and (2) checks issued.

(1) *Warrants-issued basis.*—Under the provisions of the act of September 2, 1789, which later became section 305 of the Revised Statutes, the expenditures of the United States Government are based upon warrants issued by the Secretary of the Treasury. From the organization of the Government in 1789, down to and including the fiscal year ended June 30, 1926, the detailed expenditures of the Government under separate heads of appropriations provided by Congress were exhibited on what is known as the "basis of warrants issued."

There are two classes of warrants upon which expenditures are made from the United States Treasury, viz (a) accountable warrants, so called because disbursing officers must regularly account for expenditures thereunder, which are issued to place funds to the credit of disbursing officers on the books of the Treasury of the United States, subject to their official check for the payment of Government obligations; and (b) settlement warrants, which authorize the Treasurer of the United States to make direct payments to claimants upon settlements of the accounting officers.

Accountable warrants are issued practically as a book-keeping expedient. They form the legal basis for charges against appropriation accounts upon the books of the Secretary of the Treasury and for corresponding credits to disbursing officers' checking accounts upon the books of the Treasurer of the United States, but do not involve an actual expenditure of cash from the Treasury at the time the warrants are issued. As far as the appropriation accounts upon the books of the Secretary of the Treasury are concerned, the warrants issued and charged thereto constitute expenditures on a *warrant* basis. To some extent, however, the money represented by such warrants is not actually expended during the fiscal year in which advanced to disbursing officers. The unexpended balances of funds in such cases are either used in the following fiscal year or returned by repay covering warrants to the appropriations from which advanced on the books of the Secretary. While the differences between the total expenditures on a warrant basis and a checks-issued basis are not material in cases where the unexpended balances to the credit of disbursing officers remain more or less constant from year to year, the former do not in all cases accurately reflect the trend of governmental expenditures, since they include unexpended balances remaining to the credit of disbursing officers at the end of the year but

not expenditures from unexpended disbursing officers balances at the beginning of the year. The expenditures on the basis of warrants issued in pursuance of section 305 of the Revised Statutes are shown in the fifth money column of this report beginning on page 105.

(2) *Checks-issued basis.*—In order to correct the situation described above, an improved form of exhibiting the detailed expenditures of the Government was devised by the Treasury during the fiscal year 1927, under which expenditures are now shown on the basis of checks issued. This form excludes from expenditures moneys placed to the credit of disbursing officers by *warrant* which remain unexpended and to their official checking credit at the close of the fiscal year, and includes in expenditures all checks drawn by disbursing officers during the fiscal year 1937 against unexpended balances of moneys placed to their checking credit during the preceding fiscal year. In other words, the expenditures on the basis of checks issued as exhibited in this report represent all the checks drawn upon the Treasurer of the United States during the fiscal year 1937 in payment of Government obligations without regard to the fiscal year in which the funds may have been placed to the credit of disbursing officers by *warrant*. The detailed expenditures on the basis of checks issued are shown in the sixth money column of this report beginning on page 105.

There is a third basis on which the Treasury Department publishes the receipts and expenditures of the Government. This basis is presented in the figures of the Daily Statements of the United States Treasury. Such figures represent the deposits and checks which are cleared each day through the Treasurer's accounts at Washington. They are compiled from latest daily transcripts of accounts received by the Treasurer of the United States from Federal Reserve banks and other Government depositaries. The daily Treasury statement, therefore, is a current report compiled from the latest available information of actual receipts and expenditures. By reason of the promptness with which this information is compiled and made public it is generally regarded as reflecting for a given period the financial operations of the Government, as far as they are ascertainable from day to day. This basis is also known as the current cash basis.

On account of the distance of some of the Federal Reserve banks and other depositaries from the United States Treasury at Washington, the reports from all depositaries covering a particular day's transactions cannot, under the existing procedure, be received and assembled in the Treasury as of the date on which the trans-

actions take place in the depositaries without delaying for several days the publication of the daily Treasury statement. It is necessary, therefore, in order to determine final figures relating to total receipts and expenditures for any given month or fiscal year, to take into consideration the accounts of Government depositaries covering the transactions for the last few days of the month or fiscal year concerned which have not been received at the Treasury until the succeeding fiscal year, and to eliminate those receipts and expenditures which actually relate to the preceding fiscal year. After taking into consideration these reports, the revised figures reflect the condition of the Treasury on the basis of actual transactions occurring in all Government depositaries during the period under review. Although there is not published a daily Treasury statement containing revised figures on this basis, it is known as the "basis of daily Treasury statements, revised."

It is neither essential nor practicable, of course, to delay the publication of the daily Treasury statement in order to include the later reports, as the difference between the preliminary and the final figures is not material. In view of the delay in the receipt of final reports from all depositaries, the revised figures are of no current use

except for accounting purposes, in which case they furnish a true general-fund balance for use in annual reports, and on the monthly statement of the public debt of the United States they also facilitate a reconciliation of the daily Treasury statement figures with the figures based upon warrants issued pursuant to law.

Since the warrant accounts on the books of the Secretary of the Treasury (Division of Bookkeeping and Warrants) are kept open after the close of the year in order to take care of all moneys reaching Government depositaries during that year, the receipts on a warrant basis are the same as those on the so-called "basis of daily Treasury statements, revised." In other words, they represent the moneys reaching Government depositaries during a particular fiscal year without regard to the time or the dates on which such deposits are cleared through the Treasurer's accounts at Washington.

The total expenditures on the basis of checks issued are adjusted on page 414 of this report to the basis of daily Treasury statements, revised, the latter basis representing the checks paid by Federal Reserve banks and Government depositaries during the fiscal year without regard to the date on which such checks are cleared through the Treasurer's accounts in Washington.

APPROPRIATIONS

Article I (sec. 9) of the Constitution of the United States provides that no money shall be withdrawn from the Treasury but in consequence of appropriations made by law. The appropriations exhibited in this report are the amounts which, by law, Congress authorized to be established upon the books of the Treasury during the fiscal year 1937. The figures necessarily differ somewhat from the appropriations exhibited in the annual "Digest of Appropriations, 1937", compiled by the Treasury Department, the "Statement of Appropriations for the Seventy-fourth Congress, Second Session", Senate Document No. 276, prepared under the direction of the Committees on Appropriations of the Senate and House of Representatives, and the comparative statement of appropriations for the fiscal year 1937 contained in the annual "Budget, 1938", for several reasons as may be observed by a study of the "Accountability Statement of Appropriations by Acts of Congress", appearing on pages 458 to 462 of this report. These differences are due principally to (1) the difference in the time at which the different reports are compiled, and (2) special provisions and limitations enacted by Congress in appropriation acts in regard to the availability of the appropriations. For instance, the three documents mentioned above are compiled about the beginning of the fiscal year for which the appropriations are made, and, therefore, include *estimated* amounts to cover permanent and indefinite appropriations, whereas the Combined Statement of Receipts, Expenditures, Balances, etc., of the United States is compiled after the close of the fiscal year, and the figures in

this report under such appropriations are *actual*. As to the time of the availability of appropriations it will be noted by reference to page 458 that of the total appropriations provided in the annual appropriation acts for the fiscal year 1937, aggregating \$5,959,673,869.05, the sum of \$2,944,478,389.62 was made immediately available by Congress upon the dates of approval of the several acts, and therefore was established upon the books of the Treasury in the fiscal year 1936 instead of 1937. In like manner by the terms of the annual appropriation acts for 1938 aggregating \$4,546,481,403.63, the sum of \$629,721,747 was made immediately available upon the passage of such acts and, accordingly, was established upon the books of the Treasury during the fiscal year 1937. Appropriations contained in the First Deficiency Act, fiscal year 1936, approved June 22, 1936, \$639,719,714.41; the First Deficiency Act, fiscal year 1937, approved February 9, 1937, \$947,957,714.41; Second Deficiency Act, fiscal year 1937, approved May 28, 1937, \$10,860,907.68 (exclusive of \$55,275,930, not available until July 1, 1937); and miscellaneous public acts, public resolutions and private acts amounting to \$21,015,372.32, were established upon the books of the Treasury during the fiscal year 1937 and, therefore, are included in this report. Other differences in appropriation figures are attributable to the fact that certain appropriations provided by Congress in the annual and deficiency appropriation acts are not payable from the general revenues of the Treasury, but are provided for from postal revenues and from revenues in special accounts hereinafter described.

SURPLUS FUND

Act June 20, 1874 (18 Stat. 110)

The term "Surplus fund of the Treasury," as used by Congress in appropriation acts, and in the act of June 20, 1874 (U. S. C., title 31, sec. 713), and by the Treasury Department in the heading of the seventh and eighth money columns of this report, beginning on page 105, does not represent a physical fund consisting of surplus cash or other assets as the term would ordinarily imply in accounting terminology. The term as herein used has no relation to surplus income. It is merely an expression to describe the writing off of the books of appropriations which have been repealed, or the unexpended balances of appropriations which have lapsed by limitation of law.

Appropriations when made by Congress and established upon the books of the Treasury Department do not represent so much income or cash actually set aside in the Treasury for the purposes specified in the appropriation acts. Appropriations are established upon the books of the Treasury simply as record accounts and merely represent the limit to which administrative offices may obligate Government funds during the fiscal years specified in the appropriation acts, and as a general rule are based upon anticipated future tax collections and other receipts. It follows, therefore, that when appropriations, or unex-

pendent balances of appropriations, are carried to what is termed in the law the "surplus fund of the Treasury" it involves simply a matter of writing such appropriations off of the books without increasing the cash in the Treasury or affecting it in any manner. Under the act of Congress approved July 12, 1870, as amended by the act of June 20, 1874, cited herein, on the last day of each fiscal year the Treasury writes off the unexpended balances of appropriations that have remained on the books for 2 full fiscal years, after the close of the year in which they were established.

In contradistinction, the term "surplus," as used in connection with the receipts and expenditures of the Government, represents the ordinary receipts, i. e., customs duties, internal revenue, and miscellaneous, for a given period in excess of the expenditures chargeable against such receipts for the same period, usually for fiscal year. There is no relation between the two terms described. The excess or surplus of the Government's receipts over its expenditures is not permitted to accumulate in the Treasury from year to year, but is used as promptly as conditions permit to reduce the public debt.

IMPOUNDED SALARY SAVINGS

Impounded salary savings as stated in the eighth money column of this report, beginning on page 105, under the heading, "Amount Carried to the Surplus Fund," are the savings effected as a result of the furlough and compensation deductions provided for by section 110

of act approved June 30, 1932 (47 Stat. 403), as amended by section 4 (d), title II, act of March 20, 1933 (48 Stat. 14), and sections 24 and 25 of title II, act March 28, 1934 (48 Stat. 522).

RESERVE FOR IMPOUNDED SALARY SAVINGS

The reserve for impounded salary savings as stated in the ninth money column of this report, beginning on page 105, represents the amounts credited to this account by the suspension of filling vacancies under the provisions of section 203, act June 30, 1932 (47 Stat. 403), as extended by section 4 (a), title II, act March 20, 1933 (48 Stat. 13), and section 24, title II, act March 28, 1934 (48 Stat. 522).

The impounding of such funds may be waived in writing by the President, when, in his judgment, such action is necessary and in the public interest. The unexpended balances remaining under these accounts have been carried to the "Surplus fund of the Treasury."

FUND DISTINCTION

The receipts and expenditures included in this report all fall within the General Fund. This arrangement, as indicated on the first page of the "Daily Statement of the United States Treasury," serves to maintain the maximum flexibility in the handling of all moneys placed in the Treasury. Within this fund, however, the Division of Bookkeeping and Warrants maintains a number of accounts, designated as general accounts, special accounts, and trust accounts. Certain receipts are credited to these accounts and certain expenditures are made therefrom, as required by law. All receipts of the Government which go into the general accounts are expended only in accordance with appropriations made by Congress.

The general accounts.—The principal sources of receipts covered into the general accounts are income tax, miscellaneous internal revenue, and customs duties. Receipts from miscellaneous sources, which are not earmarked for special or trust accounts, are also covered into the general accounts. Such receipts include the proceeds of Government-owned securities (except those which are applicable to public-debt retirement), sale of surplus and condemned property, Panama Canal tolls, fees of various kinds, fines, penalties, forfeitures, rentals, royalties, reimbursements, immigration head tax, sale of public land, and interest on public deposits.

As already noted, moneys covered into the general accounts may be withdrawn from the Treasury only through appropriations made by Congress. These appropriations are of two general types—annual and permanent. The annual appropriations, ordinarily found in the departmental supply bills, are voted each year by Congress. They are usually definite or specific as to amounts. They may be obligated only during the fiscal year to which they relate, their unexpended balances remaining on the books for 2 additional years before being carried into the "surplus fund of the Treasury." The permanent appropriations are automatically renewed each fiscal year over a period of time by virtue of permanent legislation, without annual action by Congress. Such appropriations may be either definite or indefinite as to amounts. An example of the latter is the indefinite-permanent appropriation to cover the interest on the public debt. Sometimes Congress makes appropriations which are available until expended, or until the object for which they are made is accomplished. These appropriations are without a definite time limit, and may therefore be called no-year appropriations. They are frequently employed by Congress when providing for the construction of public-works projects.

Special accounts.—The special accounts, often referred to in the law as special funds, are usually credited with certain receipts which may be expended only for specified purposes. These receipts, in other words, are earmarked at the time of their deposit, so that they may not be used for the general expenditures of the Government.

The more important special accounts, other than those applicable to debt retirement, are the reclamation account and Alaska railroad receipts, under the Department of the Interior, and Forest reserve fund under the Department of Agriculture.

There are many other special accounts involving smaller amounts.

In connection with the collection and use of receipts credited to special accounts it will be noted by reference to page 33 and following pages, that ready references are given to the pages on which the appropriations of such receipts may be found. These references will be found especially helpful in cases where Congress has designated in advance the use of receipts from particular sources to several different objects of expenditure on a percentage basis, such as in the case of Federal power receipts (p. 36), forest reserve receipts (p. 46), and Mineral Leasing Act receipts (p. 54).

Trust accounts.—The trust accounts generally represent moneys received by the Government for the benefit of individuals or classes of individuals. Moneys held in trust, being payable to or for the use of beneficiaries only, are not available for general expenditures of the Government. There are several classes of trust accounts, the beneficiaries under which may be either individuals or groups of individuals. The accounts may represent (a) moneys received directly from or for the benefit of individuals, as in the case of moneys received from foreign Governments or other sources in trust for citizens of the United States or others under the act of February 27, 1896 (U. S. C., title 31, sec. 547); (b) moneys collected as revenues and held in trust, such as the proceeds of sales of Indian lands,

which are held as interest-bearing moneys for the benefit of Indian tribes; and (c) proceeds of grants from the general Treasury in pursuance of treaty or other obligations, such as the perpetual trust account created for the Ute Indians under section 5 of the act of June 15, 1880 (21 Stat., p. 204).

Revenues of the municipal government of the District of Columbia and expenditures therefrom, for the purpose of the classification of receipts and expenditures in this report, are regarded as a trust account. The share of the United States of expenditures on account of the District of Columbia, which is payable "out of any moneys in the Treasury not otherwise appropriated," is charged as an expenditure on general account. In like manner expenditures under appropriations for certain trust accounts, such as the adjusted-service certificate fund, civil-service retirement fund, and the Foreign Service retirement fund, are classified under a general account. Changes in the working balances under these accounts due to variations between credits and charges thereto are stated in connection with expenditures under the caption "Trust accounts."

Special deposit accounts.—Special deposit accounts are in the nature of suspense accounts, established to care for moneys deposited with the Treasurer of the United States for safekeeping, and refunds representing moneys not yet ready to be covered into the general account of the Treasury, or to be returned to the depositors. Such moneys are held temporarily in special deposit accounts subject to administrative or legal determination as to their final disposition.

Working funds.—Under act of June 30, 1932 (47 Stat., p. 417, sec. 601), amending sec. 7, act May 21, 1920 (U. S. C., title 31, sec. 686), working funds are established by the Secretary of the Treasury, by repay covering warrants, representing amounts advanced by any executive department or independent establishment of the Government to any other department or establishment, for the furnishing of supplies or services.

<p>(a) Under acts of Mar. 4, 1907 (34 Stat. 1270), Mar. 1, 1911 (36 Stat. 963), and June 30, 1914 (38 Stat. 441), 25 percent of all money received from each national forest is paid to the State in which such forest is situated. The sum of \$995,890.71, representing 25 percent of \$3,983,562.85 collected during 1936, as reported by the Department of Agriculture, was credited during the fiscal year 1937 to the appropriation account "Payments to States and Territories from the national forests fund," p. 175.</p> <p>(b) Under the act of June 20, 1910 (36 Stat. 562), such "proportion of the gross proceeds of all the national forests within said State as the area of land hereby granted to said State for school purposes, which are situate within said forest reserves * * * may bear to the total area of all the national forests within said State," is credited to the account "Payments to school funds, Arizona and New Mexico, national forests fund." In accordance with this provision, and upon the basis of reports from the Department of Agriculture, \$31,685.48 of the collections for the fiscal year 1936 was credited during the fiscal year 1937 to the appropriation account "Payments to school funds, Arizona and New Mexico, national forests fund," p. 175.</p> <p>(c) Under the act of Mar. 4, 1913 (37 Stat. 843), 10 percent of the forest-reserve fund receipts is available for the construction and maintenance of roads and trails within the national forests. The sum of \$398,356.29, representing 10 percent of \$3,983,562.85 collected during 1936 as reported by the Department of Agriculture, was credited during the fiscal year 1937 to the appropriation "Roads and trails for States, national forests fund," p. 179.</p> <p>The necessity for basing the amounts credited to the above-mentioned special accounts on collections reported by the Department of Agriculture for the preceding year, instead of upon covering warrants for the current year, is due to the fact that an accurate division of receipts cannot be made until the amounts belonging to the school funds of Arizona and New Mexico, under (b) above, have been determined by the Department of Agriculture.</p>

³ Under the act of June 25, 1910 (36 Stat. 835), \$20,000,000 was advanced to the "Reclamation fund" from the general fund of the Treasury, \$10,000,000 of which has been returned from the "Reclamation fund" under the provisions of the act of June 12, 1917 (40 Stat. 149), which provided for the return of \$1,000,000 annually. The act of Feb. 6, 1931 (46 Stat. 1069), suspended this reimbursement of \$1,000,000 annually for a period of 2 years, beginning with the fiscal year ending June 30, 1931, hence no reimbursement was made to the general fund during the fiscal years 1931 and 1932. Under the act of Mar. 3, 1931 (46 Stat. 1507), \$5,000,000 additional was advanced from the general fund of the Treasury to the appropriation fund during the fiscal years 1931 and 1932. Under the act of Mar. 3, 1931 (46 Stat. 1507), \$5,000,000 additional was advanced from the general fund of the Treasury to the appropriation fund during the fiscal years 1931 and 1932. Under the act of Mar. 3, 1931 (46 Stat. 1507), \$5,000,000 additional was advanced from the general fund of the Treasury to the appropriation fund during the fiscal years 1931 and 1932. "Advances to the reclamation fund, reimbursable," to be returned to the general fund of the Treasury from the reclamation fund at the rate of \$1,000,000 annually beginning July 1, 1933. Sec. 10 of the act of Apr. 1, 1932 (47 Stat. 78), suspends this reimbursement to the general fund until July 1, 1934. Sec. 2 of the act of Mar. 3, 1933 (47 Stat. 1427) suspends reimbursement until July 1, 1936, and the act of June 22, 1936 (49 Stat. 1784), until July 1, 1938.

Customs receipts by districts and ports, fiscal year 1937—Continued

The port first named in the following list is the headquarters for the district. "Tonnage tax" receipts were classified and stated as "customs" receipts until June 30, 1932; now, classified and stated as "miscellaneous receipts" under the Department of Commerce, p. 48, by decision of the Comptroller General, dated Feb. 6, 1931, A-18469]

¹ Exclusive of \$4,566.50 Philippine Islands customs collections. Duties appropriated under "Philippine trust fund" (customs duties), p. 331, and covered as miscellaneous receipts, p. 73.

NOTE.—The customs receipts as published in this report differ in some respects from the figures published in the report of the Commissioner of Customs because the latter represent collections by customs officers throughout the country, while the former (this report) represent the actual deposit of such collections in the Treasury and its depositories during the fiscal year 1937, the difference being due to the fact that some of the collections in the latter part of the fiscal year do not reach the Treasury or one of its depositories until after June 30.

¹ Debit item, deduct.

² Includes \$2,185.82 processing tax on farm products. Appropriated for "Processing taxes" under the Department of Agriculture, p. 189. This amount is exclusive of processing taxes from insular possessions, which are stated in Supplemental Statement following and covered as Miscellaneous receipt trust accounts under Treasury Department, p. 73.

NOTE.—The internal-revenue receipts as published in this report differ in some respects from the figures published in the report of the Commissioner of Internal Revenue because the latter represent collections by Internal Revenue officers throughout the country, including amounts received through postmasters and customs officers, while the former (this report) represent the actual deposit of such collections in the Treasury and its depositories during the fiscal year 1937 the difference being due to the fact that some of the collections in the latter part of the fiscal year do not reach the Treasury or one of its depositories until after June 30.

STATEMENT OF INTERNAL REVENUE TRUST-FUND COLLECTIONS, FISCAL YEAR 1937, BY INTERNAL REVENUE COLLECTION DISTRICTS

[These collections are *not* included under Internal Revenue receipts but classified and stated on warrant basis as miscellaneous trust account receipts, p. 73, under the provisions of the "Permanent Appropriation Repeal Act, 1934" (48 Stat. 1224)]

²² The item "Postal deficiency" represents advances from the general fund of the Treasury to the Postmaster General to meet deficiencies in the postal revenues. These figures do not reflect any allowances for offsets on account of extraordinary expenditures or the cost of free mailings contributing to the deficiency of postal revenues certified to the Secretary of the Treasury by the Postmaster General pursuant to the act of Congress approved June 9, 1930. Further, the expenditures shown above on account of postal deficiency for the fiscal year 1937 are exclusive of \$16,245,165.06, on account of transfers of appropriations from the Post Office Department to the U. S. Maritime Commission pursuant to the act of June 29, 1936 (49 Stat. 1988). These transferred funds when expended by the U. S. Maritime Commission are classified as expenditures of the U. S. Maritime Commission.

⁴⁶ "General account of advances" is an accounting fund established as a means of handling naval appropriations pursuant to the provisions contained in the act of June 19, 1878 (20 Stat. 167). Advances of funds are made to disbursing officers and agents of the Navy, under this fund, not to exceed the total appropriations of the Navy; the amounts so advanced to be exclusively used to pay current obligations. The amounts advanced are subsequently charged to the proper appropriations and returned to "General account of advances" by transfer and counter warrants, based upon settlements of accounts by the Comptroller General of the United States, the said charge, however, to particular appropriations being limited to the amount appropriated for each.

⁴⁷ Debt balance.

¹ Transferred to "Grand Central Station, post office, and office building, New York, N. Y.," act July 12, 1932 (47 Stat. 856).

² Account transferred to Treasury (miscellaneous).

³ The item "Postal deficiency" represents advances from the General Fund of the Treasury to the Postmaster General to meet deficiencies in the postal revenues. These figures do not reflect any allowances for offsets on account of extraordinary expenditures or the cost of free mailings contributing to the deficiency of postal revenues certified to the Secretary of the Treasury by the Postmaster General pursuant to the act of Congress approved June 9, 1930. Further, the

expenditures shown above on account of postal deficiency for the fiscal year 1937 are exclusive of \$10,245,165.06, on account of transfers of appropriations from the Post Office Department to the U. S. Maritime Commission pursuant to the act of June 29, 1936 (49 Stat. 1988). These transferred funds when expended by the U. S. Maritime Commission are classified as expenditures of the U. S. Maritime Commission.

For classification of extraordinary expenditures contributing to the deficiency in postal revenues for the fiscal year ended June 30, 1937, see exhibit 1, p. 482.

¹ Reestablished from surplus fund, act Mar. 3, 1875 (18 Sta. 418, sec. 5).

² This account was credited with \$39,413.94, appropriated from miscellaneous receipts and charged with \$100,000, transferred to "Pay of the Army, 1836," act Apr. 9, 1935 (49 Stat. 124).

³ Debit balance.

NOTE.—"Army account of advances" is an accounting fund established as a means of handling Army appropriations pursuant to the provisions contained in the act of June 5, 1920 (41 Stat. 975). Advances of funds are made to disbursing officers and agents of the Army, under this fund, not to exceed the total appropriations for the Army, the amounts so advanced to be exclusively used to pay obligations lawfully payable under the respective appropriations. The amounts advanced are subsequently charged to the proper appropriations and returned to "Army account of advances" by transfer and counter warrants, based upon settlements of accounts by the Comptroller General of the United States, the said charge, however, to particular appropriations being limited to the amount appropriated to each. This account stands charged with the sum of \$15,985,174.95 at the beginning of the fiscal year 1937 and \$21,426,161.25 at the close of the year, which amounts represent the unadjusted disbursements on a warrants-issued basis and affect the total balances, War Department.

NOTE.— Beginning with the fiscal year 1925, a lump sum has been contributed annually from the general fund of the Treasury toward the expenses of the District of Columbia, together with certain revenues from District sources theretofore credited to the United States, the remainder of such expenses being met from the combined revenues of the District of Columbia (trust funds). The lump-sum contribution for each of the fiscal years 1925 to 1930 was \$9,000,000; for each of the years 1931 and 1932, \$9,500,000; for 1933, \$7,775,000; for 1934, \$5,700,000; for 1935 the same amount, less 70 percent of expenditures under allotments amounting to \$1,908,150, from the Public Works Administration under the appropriation "National Industrial Recovery, 1933-35" for sewers and park improvements. The sum of \$5,700,000 was contributed for the year 1936 and \$5,000,000 for 1937. Appropriations for the years 1921 to 1924 (excepting certain accounts paid wholly from District revenues) were charged 60 percent to revenues of the District and 40 percent to the general fund of the Treasury. For 1920 and prior years the charges were divided equally between the District and the United States.

¹ For "Seacoast defenses, Panama Canal" (War—Military), see p. 379. The annual payment of \$250,000 to the Government of Panama under treaty of Nov. 18, 1903, was made from the appropriation, "United States Contributions to International Commissions, Congresses, and Bureaus, 1937," under the Department of State.
² For "Canal Zone retirement and disability fund" (trust account—Civil Service Commission), see p. 122.
³ Includes \$1,800 established under indefinite appropriation for additional compensation of the Engineer Commissioner, act June 23, 1936 (49 Stat. 1855).
⁴ Payable from any moneys in the Treasury not otherwise appropriated and from revenues of the District of Columbia, in equal parts.
⁵ See also appropriation for this object under "Miscellaneous commissions, boards, etc., independent offices," p. 167.

¹ Repayment in excess of audited expenditures.
² Audited expenditures in excess of repayments.
³ Includes \$15,596,629.37 civil-service retirement deductions. \$15,647,624.90 was covered by warrants into the Treasury for civil-service retirement deductions during the fiscal year 1937. No amount was impounded from vacancies and deductions from postal compensations and allowances during the fiscal year 1937.
⁴ Exclusive of net credits from the general fund of the Treasury on account of the Postal Service amounting to \$58,739.38 (see p. 313). Salaries and contingent expenses for the Post Office Department beginning with the fiscal year 1923 are paid from postal revenues. The postal deficiency represents advances from the general fund of the Treasury

to the Postmaster General to meet deficiencies in the postal revenues. These figures do not include any allowances or offsets on account of extraordinary expenditures or the cost of free mailings contributing to the deficiency of postal revenues certified to the Secretary of the Treasury by the Postmaster General pursuant to the act of Congress, approved June 9, 1930. Further, the expenditures shown above on account of postal deficiency for the fiscal year 1937 are exclusive of \$16,245,165.06 on account of transfers of appropriations from the Post Office Department to the U. S. Maritime Commission pursuant to the act of June 29, 1936 (49 Stat. 1988). These transferred funds when expended by the U. S. Maritime Commission are classified as expenditures of the U. S. Maritime Commission. For classification of extraordinary expenditures contributing to the deficiency in postal revenues for the fiscal year 1937 see exhibit following.

EXHIBIT I

Letter of the Postmaster General to the Secretary of the Treasury dated November 11, 1937, certifying extraordinary expenditures contributing to the deficiency of postal revenues for the fiscal year ended June 30, 1937, in pursuance of Public Act No. 316, Seventy-first Congress, approved June 9, 1930 (46 Stat. 523)

OFFICE OF THE POSTMASTER GENERAL,
Washington, D. C., November 11, 1937.

The honorable the SECRETARY OF THE TREASURY:

MY DEAR MR. SECRETARY: In accordance with the provisions of the act of June 9, 1930, embodied in section 260, Postal Laws and Regulations, the amounts set forth below with respect to certain mailings during the fiscal year ended June 30, 1937, are certified to you in order that they may be separately classified on the books of the Treasury Department in stating the expenditures made from the appropriation to supply the deficiency of postal revenues:
