THE SECRETARY OF THE TREASURY
WASHINGTON

JAN 18 1972

Dear Sirs:

I have the honor to transmit herewith the Combined Statement of Receipts, Expenditures and Balances of the United States Government for the fiscal year ended June 30, 1971. This submission is in accordance with the provisions of section 15 of the Act of July 31, 1894 (31 U.S.C. 1029) and section 114 of the Act of September 12, 1950 (31 U.S.C. 66b).

Sincerely yours,

A handwritten signature in cursive script that reads "John B. Connally".

President of the Senate

Speaker of the House of Representatives

INTRODUCTION

The requirements of law for the preparation of an annual report on receipts and outlays of the Government originated December 31, 1791 under a standing order of the House of Representatives. This was superseded by the following:

Section 15 of the Act of July 31, 1894 (31 U.S.C., 1964 ed., Supp. III sec. 1029) which provides, "It shall be the duty of the Secretary of the Treasury annually to lay before Congress, on the first day of the regular session thereof, an accurate combined statement of the receipts and expenditures during the last preceding fiscal year of all public moneys, including those of the Post Office Department, designating the amount of the receipts, whenever practicable, by ports, districts, and States, and the expenditures, by each separate head of appropriation," and

Section 114 of the Act of September 12, 1950 (31 U.S.C. 66b (a) which provides, "The Secretary of the Treasury shall prepare such reports for the information of the President, the Congress, and the public as will present the results of the fi-

nancial operations of the Government". Section 114 also provides that the duties imposed upon the Treasury Department by Section 15 of the Act of July 31, 1894 may be exercised and performed by the Secretary as a part of his broader authority and duties under this section.

This report is recognized as the official publication of the details of receipt and outlay data with which all other reports containing similar data must be in agreement. In addition to serving the needs of Congress, the Office of Management and Budget uses this report in reviewing the President's budget programs; the General Accounting Office in its audit activities; the various departments and agencies of the Government in reconciliation of their accounts; and the general public. Other reports prepared by the Treasury Department that contain related information are: Monthly Statement of Receipts and Expenditures of the United States Government; monthly Treasury Bulletin; and the Annual Report of the Secretary of the Treasury on the State of the Finances.

DESCRIPTION OF ACCOUNTS RELATING TO CASH OPERATIONS

The classes of accounts maintained in connection with the cash operations of the Federal Government, exclusive of public debt operations, include: (1) The accounts of fiscal officers or agents, collectively, who receive money for deposit in the U. S. Treasury or for other authorized disposition or who make expenditures by drawing checks on the Treasurer of the United States or by effecting payments in some other manner; (2) the accounts of administrative agencies which classify receipt and expenditure transactions according to the individual receipt, appropriation, or fund account; and (3) the accounts of the Treasurer of the United

States whose office, generally speaking, is responsible for the receipt and custody of money deposited by fiscal officers or agents, for the payment of checks drawn on the Treasurer, and the payment of public debt securities redeemed. A set of central accounts is maintained in the Treasury Department for the purpose of consolidating financial data reported periodically from these three sources in order to present the results of cash operations in central financial reports on a unified basis for the Government as a whole, and as a means of internal control.

DESCRIPTION OF ACCOUNTS RELATING TO CASH OPERATIONS - Continued

The central accounts relating to cash operations disclose monthly and fiscal year information on: (1) The Government's receipts by principal sources, and its outlays according to the different appropriations and other funds involved; and (2) the cash transactions, classified by types, together with certain directly related assets and liabilities which underlie such receipts and outlays. The accounting for receipts is substantially on the basis of collections, and that for outlays is substantially on the basis of checks issued and cash payments made except that interest on the public debt is on an accrual basis. The structure of the accounts provides for a reconciliation, on a firm accounting basis, between the published reports of receipts and outlays for the Government as a whole and changes in the Treasurer's cash balance by means of such factors as checks outstanding, deposits in transit, and cash held outside the Treasury. Within the central accounts, receipt and expenditure accounts are classified as described in the following paragraphs.

Budget accounts

General fund receipt accounts - General fund receipt accounts are credited with all receipts which are not earmarked by law for a specific purpose. General fund receipts consist principally of internal revenue collections, which include income taxes, excise taxes, estate, gift, and employment taxes. The remainder consist of customs duties and a large number of miscellaneous receipts, including fees for permits and licenses, fines, penalties, and forfeitures; interest and dividends; rentals; royalties; and sale of Government property.

Special fund receipt accounts - Special fund receipt accounts are credited with receipts from specific sources which are earmarked by law for a specific purpose, but which are not generated from a cycle of operations. The Congress may appropriate these receipts on an annual basis or for an indefinite period of time. Examples of special fund receipts are those arising from rents and royalties under the Mineral Leasing Act, the revenue from visitors to Yellowstone National Park, the proceeds of the sale of certain timber and reserve lands, and other receipts authorized to be credited to the reclamation fund.

General fund expenditure accounts - General fund expenditure accounts are established to record amounts appropriated by the Congress to be expended for the general support of the Government. Such accounts are classified according to the limitations that are established by the Congress with respect to the period of availability for obligation of the appropriation, as 1-year, multiple-year, or "no-year" (without a time limit), and with respect to the agency authorized to enter into obligations and approve expenditures.

Special fund expenditure accounts - Special fund expenditure accounts are established to record appropriated amounts of special fund receipts expended for special programs in accordance with specific provisions of law. These accounts are generally available without time limit, but may also be subject to time limitations as in the case of general fund accounts.

Revolving fund accounts - These are funds authorized by specific provisions of law to finance a continuing cycle of operations in which expenditures generate receipts, and the receipts are available for expenditure without further action by Congress. They are classified as (a) public enterprise revolving funds where receipts come primarily from sources other than the Government and (b) intragovernmental revolving funds where receipts come primarily from other appropriations. Treasury reports generally show the effect of operations (excess of disbursements over collections and reimbursements for the period) on the budget surplus or deficit. These accounts are usually designated as "no-year" accounts, i.e., they are without limitation as to period of availability for expenditures. Examples of public enterprise revolving funds are the Export-Import Bank of the United States and the Commodity Credit Corporation. Examples of intragovernmental revolving funds are the General Supply Fund, administered by the General Services Administration, and the Government Printing Office Revolving Fund.

Consolidated working fund accounts - These are accounts established to receive (and subsequently disburse) advance payments from other agencies or bureaus pursuant to Section 601 of the Economic Recovery Act (31 U.S.C. 686) or other provisions of law. Consolidated working funds may be credited with advances from more than one appropriation for the procurement of goods or services to be furnished by the performing agency with the use of its facilities within the same fiscal year. Expenditures recorded in these accounts are state of advances credited and are classified under the agencies administering the accounts. The accounts are subject to the fiscal year limitations of the appropriations or funds from which advances are received.

Management fund accounts - These are working accounts authorized by law to facilitate the accounting for and administration of intragovernmental activities (other than a continuing cycle of operations) which are financed by two or more appropriations. This classification is also often applied to consolidated working funds for interagency activities described above.

Trust fund accounts - These are accounts established to record the receipt and expenditure of moneys held in trust by the Government for use in carrying out specific purposes or programs in accordance with the terms of a trust agreement.

DESCRIPTION OF ACCOUNTS RELATING TO CASH OPERATIONS - Continued

statute. The receipts of many trust funds, especially the major ones, not needed for current payments are invested in public debt and Government agency securities. Generally, trust fund accounts consist of separate receipt and expenditure accounts, but when the trust corpus is established to perform a business-type operation, the fund entity is called a "trust revolving fund" and a combined receipt and expenditure account is used. Some of the major trust accounts are the Federal old-age and survivors insurance trust fund, Unemployment trust fund, Civil service retirement and disability fund, the National service life insurance fund, and the Highway trust fund.

Transfer appropriation accounts - These accounts are established to receive (and subsequently disburse) allocations which are treated as non-

expenditure transactions at the time the allocation is made including certain transfers under Section 601 of the Economy Act (31 U.S.C. 686), and similar provisions of law.

Other accounts

Deposit fund accounts - Deposit funds are combined receipt and expenditure accounts established to account for receipts that are either (a) held in suspense temporarily and later refunded or paid into some other fund of the Government upon administrative or legal determination as to the proper disposition thereof, or (b) held by the Government as banker or agent for others and paid out at the direction of the depositor. Such funds are not available for paying salaries, expenses, grants, or other expenditures of the Government.

EXPLANATION OF TRANSACTIONS AND BASES OF FIGURES

As indicated in the "Table of Contents" preceding, the Combined Statement of Receipts, Expenditures and Balances of the United States Government consists of: Part One - Summary statements with supporting tables and schedules; Part Two - Details of receipts; Part Three - Details of appropriations,

authorizations, expenditures, and balances; Part Four - Other informational data; and Part Five - Details of foreign currency transactions, with an introductory statement explaining bases of figures, account classification, etc.

BUDGET RECEIPT AND EXPENDITURE ACCOUNTS

Receipt Accounts

Part Two of this report contains the detail of internal revenue, customs, and miscellaneous receipts. Internal revenue and customs receipts are included in this report on the basis of reports of collections, which means they are reported as of the time that the cash received is placed under accounting control. Other receipts of the Government are reported in some cases on a collection basis and, in the remaining cases, on a deposits confirmed basis (that is, when the deposits are acknowledged by the depository banks). Revolving fund and management fund receipts and reimbursements and refunds of moneys previously expended, are not included in the receipt tables, but are deducted from gross expenditures.

Expenditure Accounts

Part Three, Section I, of this report contains the detailed tabulations of expenditure accounts, by organizational unit, showing the various transactions that relate to such accounts which affect the budget surplus or deficit of the Government. The accounts are arranged according to general, special, revolving, management and trust funds, showing the titles, period of availability, and account symbols. Following are explanations of the column headings in the tabulations.

1. Balances beginning of fiscal year - The balances shown in the first money column represent the unexpended amounts as of the close of the preceding fiscal year. Included in these figures are the amounts of unexpended appropriations and funds, unfunded contract authorizations, unused authorizations to expend from debt receipts, and the par value of investments in public debt and agency securities held.

2. Appropriations, and other obligational authority - a. Appropriations -- Article I, Section 9, of the Constitution of the United States, provides that "No money shall be drawn from the Treasury but in consequence of appropriations made by law; The appropriations included in this report are the amounts which Congress authorized to be established for the fiscal year. These amounts do not represent cash actually set aside in the Treasury for the purposes specified in the appropriation acts; they represent limitations of amounts which agencies may obligate during the time period specified in the respective appropriation acts.

In some instances, the Congress reappropriates part or all of the unobligated balances of prior year appropriations which would otherwise expire. In other instances, the Congress authorizes the transfer of obligational authority covering current

BUDGET RECEIPT AND EXPENDITURE ACCOUNTS - Continued

appropriations from one agency or purpose to another. These transactions decrease and increase the amounts available for obligation in the particular appropriation accounts and are explained by applicable footnotes. The appropriations are classified to show the amounts appropriated from an organizational standpoint, and are shown in the second money column.

b. Contract authorizations - Contract authorizations represent a grant of authority by the Congress to incur obligations prior to the enactment of appropriations. A contract authorization does not; in itself, permit the spending of money. It must be followed by an appropriation to permit payment of the obligations incurred thereunder. New contract authority granted during the fiscal year is shown in the second money column. Appropriations enacted for the fiscal year to liquidate such authority are included in this column as current year appropriations with a corresponding decrease to unfunded contract authority.

c. Authority to expend from public and agency debt receipts - In some instances, the Congress grants authority to Government corporations or agencies to make expenditures from funds to be borrowed from the Secretary of the Treasury or from the public. In the case of borrowings from the Treasury, the Secretary is directed to use proceeds from the sale of public debt securities. Legislation is generally specific with respect to the amount of money that can be advanced by the Treasury to each corporation or agency and often requires that the borrowing transactions be accomplished by the issuance of formal notes of the agency. Repayment of borrowings from the Treasury is sometimes accomplished, under the direction of the Congress, by cancellation of notes which have been issued by a Government agency to the Treasury. A few agencies of the Government are authorized by law to issue their own securities to the public. Before issuing these securities, the agencies are required to secure approval from, or consult with, the Secretary of the Treasury with respect to terms of the borrowing and the timing thereof. Such borrowings and repayment of borrowings from the Treasury or the public represent financing transactions and therefore do not affect the budget surplus or deficit. Borrowing authority granted by the Congress during the fiscal year is shown in the second money column.

3. Transfers, borrowings, and investments (net) - a. Transfers of obligated balances from lapsed appropriations to merged prior-year accounts as required by the act of July 25, 1956 (70 Stat. 647), and other transfers by request of the administrative agencies concerned, as authorized by law, are shown in the third money column. Other transfers are, in the majority of cases, for the benefit of the advancing appropriation accounts, and expenditures from such transfer appropriation accounts are associated with the account to which

the funds were originally made available. Explanatory footnotes showing the statutory authority and the amounts transferred to or from the various accounts are given at the end of each organizational chapter. b. Other transactions shown in this column are stated net, and include the following:

(1) Borrowings - (a) Borrowings from the Treasury - representing the net of borrowings from or repayments to the Treasury as authorized by the Congress. (b) Borrowings from the public - representing the net of the par value of issues or redemptions of securities of Government corporations and agencies, under the agency debt authorizations granted by the Congress.

(2) Investments - representing the net par value of purchases and sales of public debt and Government agency securities.

4. Outlays - The outlays shown in the fourth money column are reported generally on the basis of checks issued by Government disbursing officers. Certain modifications of this basis are described as follows:

(a) Interest on the public debt is reported on an accrual basis, except that the interest expenditure for certain savings bonds is included on the basis of the increment in redemption value; (b) where payment is made in cash rather than by check, the cash payment is the expenditure; (c) certain expenditures of an intragovernmental nature do not require the issuance of checks; for example, charges made against appropriations representing a part of employees' salaries which are withheld for individual income taxes and for savings bond allotments.

Outlays are stated net of collections representing reimbursements, as authorized by law, refunds of moneys previously expended, and receipts of revolving and management funds. In this connection, public debt or agency securities which are acquired in lieu of other properties, or donated, are considered as constructive receipt of cash and therefore the par amounts of such securities are included as receipts (reductions of expenditures) of the acquiring agency.

5. Balances withdrawn and other transactions - The fifth money column includes net transactions for several types of activities as follows:

(a) Unobligated balances withdrawn - Represents reductions of appropriations pursuant to Section 1(a)(2) of the Act of July 25, 1956 (70 Stat. 648) which provides that "Upon the expiration of the period of availability for obligation, the unobligated balance shall be withdrawn and, if the appropriation was derived in whole or in part from the general fund, shall revert to such fund, but if the appropriation was derived solely from a special or trust fund, shall revert, unless otherwise provided by law, to the fund from which derived."

BUDGET RECEIPT AND EXPENDITURE ACCOUNTS - Continued

(b) Unexpended balances withdrawn - Represents reductions of appropriations pursuant to the Act of June 21, 1957 (71 Stat. 190) which provides that "the unexpended balances of appropriations*** which are subject to disbursement by the Secretary of the Senate or the Clerk of the House of Representatives shall be withdrawn as of June 30, of the second fiscal year following the year for which provided."

(c) Transfers to surplus fund of the Treasury - Transfers of unexpended balances of appropriations to what is termed in the law the "Surplus Fund of the Treasury" represent withdrawal of funds from such appropriations on the books without any effect on the cash in the Treasury. The term "Surplus Fund of the Treasury," as used by the Congress in the Act of March 3, 1795 (1 Stat. 437) and in certain other acts, and by the Treasury Department, does not represent a fund consisting of unappropriated surplus or other assets as the term would ordinarily imply in accounting terminology; nor does it have any relation to surplus income. It is merely an expression of the action to give effect to an act of the Congress to withdraw or writeoff balances of certain appropriations. The net effect is to reduce the amount of the unexpended appropriation and thereby reduce the agency's authorization to obligate or spend. The amounts of appropriations so withdrawn are explained by appropriate footnotes.

(d) Restorations to the appropriation accounts - Represents the re-establishment of balances pursuant to Section 1 (a)(2) of the Act of July 25, 1956 (70 Stat. 648) which provides, "That when it is determined necessary by the head of the agency concerned that a portion of the unobligated balance withdrawn is required to liquidate obligations and effect adjustments, such portion of the unobligated balance may be restored to the appropriate accounts."

(e) Capital transfers - Represents nonexpenditure transfers from revolving funds on account of repayment of investment or distribution of earnings.

(f) Adjusted appropriations of prior year receipts - Special fund accounts - Represents a current year reduction of prior year appropriations to conform to the adjusted receipts of those prior years.

6. Balances end of fiscal year - The balances in accounts as of the close of the fiscal year are shown in the sixth money column under the heading "Unexpended appropriations, other authorizations and investments held." An analysis of the

total of these balances, expressed in terms of their availability for future expenditure, is given in the next four columns. Figures for the analysis are on the basis of reports of the administrative agencies, submitted on Treasury Form No. BA-R 2108 in accordance with requirements of Treasury Department Circular No. 965, Revised.

(a) Unpaid obligations - (1) Undelivered orders and contracts - The amount of orders for goods and services remaining undelivered as of June 30, representing valid obligations supported by documentary evidence, for which the liability has not yet accrued, are reported in the seventh money column. (2) Accounts payable and other liabilities - The amounts of liabilities for goods and services received as of June 30, representing valid obligations supported by documentary evidence, are reported in the eighth money column.

(b) Receivables (deduct) - The amounts reported in the ninth money column include receivables which when collected, will be credited directly to the appropriation or fund, and are reported as deductions to unpaid obligations. Such amounts consist of the following:

(1) Reimbursements earned and refunds receivable - Amounts earned (both billed and unbilled) for accomplished delivery or performance as of June 30, overpayment refund receivables, travel advances and other advances which did not liquidate specific obligations, e.g., advances to General Services Administration Supply Fund, are included.

(2) Reimbursements anticipated - For those appropriations using an authority to obligate anticipated reimbursements, the amount of undelivered customers' orders is reported here to the extent that it represents valid obligations recorded by the ordering agency. The amount shown in this column for an annual appropriation covers only those orders for which valid obligations were incurred under such annual account or orders for common-use items to be delivered from stock in accordance with 32 Comp. Gen. 436.

(c) Unobligated - The amounts reported in the tenth money column include unobligated balances of no-year and multiple-year accounts which are unexpired for obligation, and unobligated balances of annual and merged prior year accounts carried forward into the new fiscal year representing the excess of receivables over gross unpaid obligations. Such excess amounts are footnoted as "unobligated-unavailable."

OTHER ACCOUNTS

Part Three, Section II, of this report contains the detailed data relating to transactions for deposit fund accounts, none of which affect the budget results. The accounts are listed according to organizational units and the columnar headings of the tabulations are explained in the following paragraphs.

(1) Deposit fund accounts - Balances beginning of fiscal year - The amounts shown in the first money column represent the unexpended balances as of the close of the preceding fiscal year. Included in this figure is the amount of the par value of investments held by the Exchange Stabilization Fund.

Appropriations and other obligational authority - Figures in the second money column include appropriations to District of Columbia fund accounts.

Transfers, borrowings, and investments (net) - The third column shows the net amount of transfers between fund accounts keyed to explanatory footnotes in connection therewith. Also included in this column are the net changes in investment holdings of the Exchange Stabilization Fund.

Expenditures - The fourth money column shows the expenditures of the funds on a checks-issued basis

Where the accounts are credited with reimbursements or refunds of moneys previously expended, the expenditures are reduced by such amounts.

Balances withdrawn and other transactions - Where the appropriations to District of Columbia fund accounts are subject to annual Congressional action, it is sometimes necessary to adjust the the amounts appropriated. Such adjustments are shown in the fifth money column and represent the return of funds to unappropriated status for future reappropriation. Also included in this column are certain other adjustment transactions.

Balances end of fiscal year - The sixth money column shows the amounts of unexpended balances in the fund accounts and par value of investment held by the Exchange Stabilization Fund.

SUMMARY STATEMENTS

The financial statement on the preceding page does not purport to show all that the Government owns and owes but is confined to showing those assets and liabilities which are directly related to the cash operations of the Department of the Treasury and the rest of the Government. The statement is supported by a system of central accounts maintained in the Department of the Treasury in conformity with generally accepted Governmental accounting principles applied on a basis consistent with the preceding fiscal year.

NOTE 1 The balance in the Treasurer's account is stated as published in the daily Treasury statement for the last working day of the fiscal year. The net amount of deposit and withdrawal transactions in the fiscal year which were processed for entry in the Treasurer's account after the year-end daily Treasury statement was published have been applied to arrive at the balance on an actual basis.

NOTE 2 Represents deposits confirmed by depositaries not included in the Treasurer's account on June 30.

NOTE 3 Represents funds held as deposits for others which are liabilities of the Government and as such are not used as factors in determining the budget surplus or deficit.

NOTE 4 Represents securities issued by Government agencies which are direct liabilities of the issuing agency. The proceeds from sales and expenditures for redemptions are not used as factors in determining the budget surplus or deficit.

NOTE 5 Represents the net amount of public debt receipts and expenditures in the fiscal year which were processed for entry in the Treasurer's account after the year-end daily Treasury

statement was published. These transactions are recognized as being in transit at June 30 but have not been applied to the public debt outstanding balance published in the daily Treasury statement for June 30.

NOTE 6 This liability does not include interest on savings bonds of any series. The liability for interest on savings bonds which are sold at a discount is included in public debt principal on the basis of the increment in redemption value. The liability for interest on other savings bonds is recorded when the interest checks are issued with a corresponding liability for interest due and payable (equivalent, in this case, to checks outstanding).

NOTE 7 Military payment certificates are issued in certain overseas areas by military finance officers, in lieu of dollar instruments, to discharge obligations incurred under appropriations of the Department of Defense. The amount outstanding is shown as a liability.

NOTE 8 Represents deposits in the Treasurer's account and cash held outside Treasury in accounts of certain collecting officers not classified on June 30.

1/ Most Government payroll offices in the continental United States are required to have a check drawn, as of the payroll date, in favor of a Federal Reserve Bank to cover income and FICA taxes withheld from the pay of Federal employees. A Federal Tax Deposit Form 501 accompanies the check. This is in accordance with instructions in Part III, Chapter 3000, Section 3030 of the Treasury Fiscal Requirements Manual, submitted under cover of transmittal letter No. 23, date October 17, 1968.

With most Federal agencies (Defense and certain other agencies excluded) making bi-weekly payments through the Federal tax deposit system that are excluded from this table, the amounts shown in the clearing accounts for withheld income and FICA taxes are substantially less than reflected in prior years. On the other hand, taxes withheld from the pay of Federal employees are covered into the Treasury on a more timely basis.

For Federal payroll offices outside the continental United States (Section 3040 of the aforementioned Chapter 3000), Defense and certain other agencies, income and FICA taxes withheld are accounted for as credited to clearing accounts pending charges representing payments submitted to District Directors of Internal Revenue with quarterly tax returns. Credits, payments, and balances in those clearing accounts maintained in the central books of the Treasury are reflected in this table.

* Less than \$500.

1/ Amounts shown for each particular State as internal revenue receipts should not be interpreted as the actual tax burden of the residents of such States. Adjustments have not been made for cases where an individual resides in one State and derives his income from another. Also, the taxes of some corporations are paid from a principal office, although their manufacturing or service operation may be located in another State, or throughout several States. In the case of excise taxes on tobacco and automobiles, this tax is on the sales of these products at the retail level; thus the revenue is derived from the buyers located throughout the country rather than from the principal office of the manufacturers.

2/ Includes tax on unrelated business income of exempt organizations.

3/ Collections of individual income tax not withheld are inclusive of old-age, disability and hospital insurance taxes on self-employment income. Similarly, the collections of income tax withheld are reported in combined amount with old-age, disability and hospital insurance taxes on salaries and wages. Estimated separate national totals for individual income tax and for old-age, disability and hospital insurance taxes are shown in the Monthly Statement of Receipts and Expenditures of the U. S. Government. Amounts of old-age, disability and hospital insurance tax collections, classified by States, are compiled by the Social Security Administration as a by-product of its wage and income record-keeping operations and are published periodically in the Social Security Bulletin.

4/ Tax payments made to banks, under the Federal tax deposit system, are included in the internal revenue collections for the period in which the Federal tax deposit is purchased. However, such payments are not classified by internal revenue districts (not by tax subclasses to which excise taxes relate) until the Federal tax deposit payment is applied to the taxpayers' liability in the internal revenue offices. Accordingly, the items shown as "Undistributed Federal tax deposits" represent the amount of Federal tax deposit forms purchased but not yet applied to the taxpayers' liability.

5/ Beginning with fiscal year 1957, the United States total for individual income tax withheld is adjusted to exclude withheld individual income taxes transferred to the Government of Guam in accordance with provisions of Public Law 630 approved August 1, 1950 (64 Stat. 392). This adjustment amounted to \$10,092,033.27.

6/ Includes railroad reemployment compensation tax and tax on railroad employee representatives.

7/ Amounts of taxes collected in Puerto Rico on tobacco and liquor manufactures coming into the United States are covered into the Treasury of Puerto Rico under the provisions of Section 7652(a) (3) of the Internal Revenue Code of 1954.

THE JUDICIARY-- FOOTNOTES

- 1 The amounts in this column, unless otherwise footnoted, represent transfers of obligated balances from lapsed appropriations to merged prior-year accounts pursuant to act of July 25, 1956 (70 Stat. 647).
- 2 The amounts in this column, unless otherwise footnoted, represent unobligated balances withdrawn pursuant to Section 1 (a) (2), act of July 25, 1956 (70 Stat. 648).
- 3 Includes supplemental appropriation of \$20,000.00, Act January 8, 1971 (84 Stat. 1994). Supplemental appropriations made in the fiscal year 1971 to cover deficiencies in prior fiscal year accounts are treated in the Budget Document as balances brought forward from June 30, 1970, and the same treatment is given in this report.
- 4 Re-established from surplus fund, act July 25, 1956 (70 Stat. 648).
- 5 Transferred, acts October 21, 1970 (84 Stat. 1057), May 25, 1971 (85 Stat. 58), to "Expenses of Referees, United States Courts, 1971."
- 6 Transferred, act January 8, 1971 (84 Stat. 1994), to "Fees and Expenses of Court-Appointed Counsel, United States Courts, 1970."
- 7 Transferred, act January 8, 1971 (84 Stat. 1994), from "Fees and Expenses of Court-Appointed Counsel, United States Courts, 1971."

**Section II.—AUTHORIZATIONS TO EXPEND
FROM DEBT RECEIPTS**

AUTHORIZATIONS TO EXPEND FROM PUBLIC DEBT RECEIPTS

1. BACKGROUND

The "authority to expend from public debt receipts" is a term identified with legislative authorizations to use, for specific purposes, Government funds realized from the sale of public debt securities. This practice came into use in 1932 to finance activities of the Reconstruction Finance Corporation, and has since been used numerous times to finance various Government programs. Table 7 covers the details of such Congressional authorizations, distinguishing between those considered by committees on appropriations, and by other committees.

Legislation providing authority to expend from public debt receipts, whether contained in appropriation or substantive legislation, requires approval by the Congress prior to enactment. When contained in appropriation legislation, consideration is given by the committees on appropriations; when included in substantive legislation, consideration is given by those committees have jurisdiction over the particular area of law involved. Legislation containing this authority has the same force and effect as an appropriation and is so treated in Treasury accounts and reports, and in the annual Budget Document. Like an appropriation, borrowing authority does not, by itself, create an increase in the public debt; it is the expenditure made as a result of either an appropriation or a borrowing authorization which affects the level of the public debt through its impact on Government cash balances.

In addition to financing certain activities of Government corporations and special programs as authorized by the Congress, this borrowing authority method has been used to finance the Government's subscription to international organizations. Though not yet used, borrowing authority exists as "standby" authority in connection with bank deposits insured by the Federal Deposit Insurance Corporation (12 U.S.C. 1824), and investments in savings and loan institutions insured by the Federal Savings and Loan Insurance Corporation (12 U.S.C. 1725i). This authority has also been made available, but not used, in connection with the purchase, sale or redemption of debentures of Federal home loan banks. During fiscal year 1970 the authority of these banks, which are Government-sponsored, was increased to \$4,000 million. The Federal National Mortgage Association, also a Government-sponsored Corporation, has authority to expend and have outstanding \$2,250 million from public debt receipts.

A forerunner of this type of financing is found in the Acts of February 25, 1791 (1 Stat. 196), and April 10, 1816 (3 Stat. 269), which provided for the establishment of the First and Second Banks of the United States, respectively, and directed that the Government's subscription to the stock of these banks be financed by the

issuance of public debt securities. Also, in the purchase of the Louisiana Territory, the Act of November 10, 1803 (2 Stat. 246) authorized payment through the issuance of certificates of stock "in like manner as for the present domestic funded debt." Still another example of early borrowing authority is found in the Act of June 28, 1902 (32 Stat. 484), which provided for payments on account of the acquisition and additional construction of the Panama Canal.

2. MAJOR LEGISLATIVE PROVISIONS

(a) The Reconstruction Finance Corporation Act, approved January 22, 1932, as amended, provided borrowing authority to the Corporation for general and special purposes, as follows:

"The Corporation may issue *** its notes, debentures, bonds, or other such obligations in an amount outstanding at any one time sufficient to enable the Corporation to carry out its functions under this chapter or any other provision of law,*** The Secretary of the Treasury is authorized to purchase any obligations of the Corporation *** to use as a public-debt transaction the proceeds from the sale of any securities issued under the Second Liberty Bond Act, as amended. ***." (15 U.S.C. 606).

(b) The Act of July 31, 1945, establishing the Export-Import Bank of Washington (renamed the Export-Import Bank of the United States effective March 13, 1968), contained authorization to expend \$825 million from public debt receipts to subscribe to the Bank's capital stock. Payment for \$174 million of capital stock shall be made by the surrender to the Bank for cancellation of the preferred stock heretofore issued by the Bank and purchased by the Reconstruction Finance Corporation. The Secretary of the Treasury shall pay the Corporation the par value of the preferred stock upon its surrender to the Bank. In addition, the Act contained authority for the Bank to borrow funds from the Treasury:

Borrowings from the Treasury - "The Export-Import Bank of Washington is authorized to issue from time to time *** its notes, debentures, bonds, or other obligations; *** shall not exceed \$6,000,000,000 *** The Secretary of the Treasury is authorized and directed to purchase any obligations of the Bank issued hereunder and for such purpose *** is authorized to use as a public-debt transaction the proceeds of any securities issued ***." (12 U.S.C. 635d)

(c) Operations of the Commodity Credit Corporation are financed by borrowings from the Treasury pursuant to statutory provisions as follows:

"With the approval of the Secretary of the Treasury, the Commodity Credit Corporation is authorized to issue and have outstanding at any one time, bonds,

notes, *** in an aggregate amount not exceeding \$14,500,000,000 *** The Secretary of the Treasury in his discretion, is authorized to purchase any obligations of the Commodity Credit Corporation issued hereunder, and for such purpose *** is authorized to use as a public-debt transaction the proceeds from the sale of any securities *** All redemptions, purchases, and sales by the Secretary *** shall be treated as public-debt transactions ***." (15 U.S.C. 713a-4)

(d) Loan programs of the Farmers Home Administration and its predecessor agencies were financed with funds borrowed by the Reconstruction Finance Corporation until 1947 when the borrowing authority was transferred to the Secretary of Agriculture, and subsequent borrowings authorized in annual acts of Congress:

"When authorized by Congress, the Secretary is authorized to make and issue notes for the purpose of obtaining funds in such amounts as the Congress may approve annually in appropriation Acts for making direct loans under this chapter *** The Secretary of the Treasury is authorized and directed to purchase any notes of the Secretary issued hereunder. *** All redemptions, purchases, and sales by the Secretary of the Treasury of such notes shall be treated as public debt transactions of the United States." (7 U.S.C. 1988b)

3. PROCEDURE AND EFFECT

Generally, authority to borrow from the Treasury is without fiscal year limitation; however, a limitation is usually provided as to the maximum amount of borrowings repayable to the Treasury that can be outstanding at any one time. The amount so authorized, together with collections and earnings realized under the program, remain available to the agency for an indefinite period. The amounts of borrowings are generally credited by the Treasury to a revolving fund account for the borrowing agency; repayments of borrowings reduce the agency's operating fund and restore the authorization for additional borrowings.

From time to time borrowing provisions are contained in annual departmental appropriation acts and the borrowing activity of agencies is reflected annually in the fiscal year accounts. In such instances, repayments by the agencies do not restore borrowing authorizations, and any additional authority to borrow must be provided by new legislation.

Where borrowings are made for programs which are nonrevenue-producing, or which result in losses, the Congress has authorized cancellations of the notes or other securities held by the Secretary of the Treasury. Where the authorizations are for an indefinite period, cancellations result in a restoration of borrowing authority in an equivalent amount. Advances and repayments of borrowings do not affect the administrative budget surplus or deficit. Only actual expenditures by borrowing agencies for authorized program purposes, or the recov-

eries and/or realizations on related assets, have such effect. This is the same as for agency programs financed by appropriation acts.

Conforming with the provisions of law regarding the treatment of these borrowings as public-debt transactions, it can be said that the proceeds from public debt issues are used to purchase notes from borrowing agencies and repayments by such agencies are applied toward the redemption of public debt securities.

4. EXPLANATION OF TABLES

Table 3 - Status of Authorizations to Expend from Public Debt and Agency Debt Receipts, Fiscal Year 1971 - Relates to the activity and status of authorizations during the current fiscal year, by agency and program. Reflects the amounts of unused authorizations at beginning of the year, current authorizations, adjustments, borrowings from Treasury, repayments which restore authority, nonrestoring repayments, and unused authorizations at end of year.

Table 4 - Status of Borrowings Handled as Public Debt Transactions, Cumulative 1932 through 1971, by Agency and Program - The data in this table relate to activity under the authorizations by the various agencies and programs. Figures are cumulative from inception, showing totals of advances by Treasury, repayments to Treasury, note cancellations authorized by the Congress, transfers between agencies, and balances due the Treasury.

Table 5 - Cancellations of Notes, and Cash Recoveries Thereon, Relating to Borrowings Handled as Public Debt Transactions, Cumulative through June 30, 1971 - Contains information on cancellations of notes as authorized by the Congress and the amounts of recoveries against such cancellations, identified as to agency and program, with citations to statutory authority, current year transactions, and cumulative figures for prior and current fiscal years.

Table 6 - Status of Congressional Authorizations to Expend From Public Debt Receipts, Fiscal Years 1932 - 1971 - Shows status of authorizations and status of borrowings for each of the years 1932 - 1971. Includes annual data on gross borrowings from the Treasury, and net borrowing transactions with the public that increase or decrease the agencies' authority to borrow from the Treasury.

Table 7 - Acts of Congress Authorizing Expenditures from Public Debt Receipts, January 22, 1932 through June 30, 1971 - Contains information, by agency and program, as to origin, and amount of authority. In columnar arrangement are shown the dates of Acts, citation of statute, volume and page, citation of U. S. Code title, and section, and amounts of authorizations, identified as to whether handled by the appropriations committees or other Congressional committees.

Note. -- In certain instances the Congress authorizes agencies to borrow either from the Secretary of the Treasury under authorizations to expend from public debt receipts or from the public under corporate debt receipts. In most of these cases, Congress provides specified limitations and conditions for each type of borrowing authority; however, a maximum amount of borrowings that can be outstanding at any one time under the combined authority is usually established in the provision of law. Therefore, amounts shown in Parts I and II of this table for agencies having both types of borrowing authority should not be combined since this would involve a duplication or overstatement of the maximum authority set by the Congress.

- 1/ These repayments were deposited in miscellaneous receipts of the U. S. Treasury.
- 2/ This account did not have any borrowings or repayments during the fiscal year.
- 3/ Represents increase in unused authorizations during the fiscal year.
- 4/ Authority to borrow from the Treasury is indefinite. Amount shown represents unpaid obligations and unobligated amounts, less the available fund balance and other receivables.
- 5/ Represents unused authorization to expend from public debt receipts available for loans to the Association without further action by Congress.
- 6/ Represents portion of the mortgage portfolio financed by earnings, working capital, and purchase discounts.
- 7/ Represents increase of \$53,532,966.40 representing portion of mortgage portfolio not financed by earnings, working capital and purchase discounts, less \$2,871,541.20 representing the reduction of mortgages during the fiscal year 1971 under its low and moderately priced housing programs established by an act approved April 1, 1958 (72 Stat. 74) and terminated by an act approved June 30, 1961 (75 Stat. 136).
- 8/ Authority to borrow from the Treasury is indefinite in amount. This figure represents amount borrowed from the Treasury during the fiscal year (see footnote 15).

- 9/ Obligations for participation certificates payable, and debentures sold by the Bank amounted to \$2,624,895,706.04 as of June 30, 1971. The unused authority to borrow from the Treasury has not been reduced thereby, since the Bank may borrow from the Treasury to liquidate these obligations.
- 10/ Represents unused authorization to be used to issue interim securities to the Secretary of the Treasury under specified conditions as provided by an act approved August 6, 1959, as amended (73 Stat. 282-283) (see note above).
- 11/ Authorized to borrow from the Treasury for payment of interest on or retirement of principal on stadium bonds issued to the public in accordance with an act approved July 28, 1958 (72 Stat. 423).

^{1/} In cases where the amounts of Congressional authorizations have been indefinite, the net amount of transactions in the year generally represents the increase or decrease in borrowing authority. In addition to authority to borrow from the Treasury, some agencies also receive authority to borrow from the public, usually under the same

provision of law.

^{2/} Excludes refundings.

^{3/} Amounts represent transactions under the combined authority to borrow either from the Secretary of the Treasury or the public, and do not represent the total borrowings from the public under other provisions of law.

^{4/} For detail by agency, see Table 3, Part I.

Table 12. -- OBLIGATION DATA PERTAINING TO CERTAIN REVOLVING
AND MANAGEMENT FUNDS, JUNE 30, 1971 -- Continued

1 Undeposited collections and unconfirmed deposits are included in the Treasury fund balances.			4 Consists of funds advanced to other programs as follows: Agricultural conservation programs, \$67,930,550.52; conservation reserve program, \$273,248.20; cropland conversion program, \$1,375,702.15; cropland adjustment program, \$7,853,080.01; and the sugar act program, \$6,360,240.32; also includes reimbursements for costs of the national wool act, -\$75,430,447.06, and the Corporation's administrative expenses and capital fund balance of \$148,556,737.41.
2 Budgetary authorizations include balances of authority to expend from public debt or agency debt receipts, unfunded contract authorizations, and balances in certain feeder accounts (appropriations available for transfer to revolving funds).			5 Funds may be borrowed as needed, but, except as may be authorized in appropriation acts, not for the original or any additional capital of the fund.
3 In addition to selected assets listed on the balance sheets, certain figures include unfilled customers' orders in the following amounts:			6 Authority to borrow from the Treasury is indefinite in amount.
Legislative Branch:			7 Includes Banks for Cooperatives debentures, \$150,000; Federal Land Bank bonds, \$3,000; and Federal National Mortgage Association debentures, \$20,000.
Government Printing Office-----	\$16,340,905.47		8 Represents unfunded contract authorizations.
Agriculture:			9 Includes reimbursements anticipated on military assistance program customers' orders (22 U.S.C. 1819).
Working capital funds:			10 Includes \$3,005,500,000 available from feeder account "86X0103 urban renewal programs, Housing and Urban Development Department."
Agricultural Research Service-----	293,755.79		11 This Association was converted to private ownership effective September 30, 1968, by an act approved August 1, 1968 (82 Stat. 537).
General Administration-----	619,835.88		12 Represents unused authorization to expend from public debt receipts available for loans to the secondary market operations fund without further action by Congress.
Forest Service-----	55,846.25		13 Obligations for participation certificates payable, and debentures sold by the Bank amounted to \$2,624,895,706.04 as of June 30, 1971. The unused authority to borrow from the Treasury has not been reduced thereby, since the Bank may borrow from the Treasury to liquidate these obligations.
Commerce:			14 Under specified conditions as provided by an act approved August 6, 1959 as amended (73 Stat. 282-283), the Corporation may issue interim securities to the Secretary of the Treasury in an amount not exceeding \$150,000,000 outstanding of which an unused amount of \$50,000,000 is included in this authorization.

PART FIVE

FOREIGN CURRENCY ACCOUNTS

Foreign currencies acquired by the United States Government without payment of dollars:	Page
Table 1 - Analysis of Foreign Currencies Acquired Without Payment of Dollars and Other Data, June 30, 1971	656-659
Table 2 - Foreign Currencies Acquired by the U. S. Government Without Payment of Dollars, Fiscal Year 1971, Transactions and Balances Including Trust Fund Accounts	661-664

The U.S. Government acquires and spends large amounts of foreign currencies in the course of its overseas operations. Foreign currencies acquired are purchased with dollars from commercial sources or received without direct purchase with dollars, hereafter referred to as "purchased" or "nonpurchased" foreign currencies. Clarification may be required to distinguish between currencies purchased with dollars and those acquired without direct purchase with dollars, since dollars are in fact used to purchase the commodities or items which are exchanged for most of the "nonpurchased" foreign currencies. The major distinction is that the direct purchase of foreign currencies from outside commercial sources generally will involve dollar flows into the economy and banking system of the foreign government, whereas the expenditure for commodities, etc. generally will not.

This report deals primarily with the "nonpurchased" foreign currencies received

- (1) in exchange for agricultural commodities financed by the Department of Agriculture (including repayment of loans of these funds);
- (2) in repayment of loans financed by dollar expenditures under the Foreign Assistance Act of 1961, and prior acts as amended;
- (3) as payment of interest on deposits of foreign currency in foreign banks;

AVAILABILITY OF NONPURCHASED FOREIGN CURRENCIES

The foreign currencies reported herein in large part are neither freely convertible to other currencies nor freely spendable by the U.S. Government for the general support of its overseas operations. Most of the currencies are restricted by the terms of international agreements to use for specific programs and may not be used for other purposes without the consent of the foreign governments involved. These restricted accounts, however are generally unfunded under a "reservation system" to account for currencies used temporarily for other U.S. Government programs. The Department of the Treasury maintains central memorandum reservation accounts for each country, similar to special fund accounts in the dollar area. The remainder of the currencies are termed nonrestricted. Although not generally convertible to other currencies or to U.S. dollars, nonrestricted currencies may be used for payment of official U.S. obligations in the country concerned, for accommodation exchanges for U.S. personnel, and sale for dollars to U.S. citizens and non-profit organizations for travel or other purposes in selected countries. Thus, nonrestricted currencies substitute for currencies which the U.S. Government would otherwise purchase with U.S. dollars from commercial sources.

Where the supply of a nonrestricted currency is great enough to more than meet U.S. requirements

(4) from various other programs.

The foreign currencies reported in Part Five of the "Combined Statement" are separate and distinct from the Budget Expenditure Accounts included in Part Three and do not affect the Budget surplus or deficit of the U.S. Government except to the extent that the currencies are "sold for dollars."

In addition to excluding balances of currencies purchased for operating or exchange stabilization purposes, these tables exclude foreign country-owned "counterpart" funds which are local currencies owned and held by foreign governments in special counterpart accounts in accordance with Section 609 of the Foreign Assistance Act of 1964 (22 U.S.C. 2359) and similar provisions of law. These latter currencies are not available for use by the U.S.; but the U.S. Government, through the Agency for International Development, has some say in how they are used by the foreign governments. These "counterpart" funds are reported by the Treasury in the "Semiannual Consolidated Report of Balances of Foreign Currencies Acquired Without Payment of Dollars."

Details by country and account previously shown in Part Five (from 1958 to 1969) may be found in a periodic report published by the Department of the Treasury, Bureau of Accounts, Division of Government Financial Operations, Special Reporting Operations.

for the next two years (exclusive of requirements financed by restricted or reserved currencies), the currency is designated as excess by the Department of the Treasury. This designation permits agencies to request reservations of the currency for expenditure under appropriations for "special foreign currency programs" which utilize excess currencies exclusively. The designated excess currency countries for the fiscal year are shown in Table I. Where the supply of currencies is above the immediate needs of the U.S. Government but not sufficient for the country to be declared excess, the currency is designated as near-excess by the Department of the Treasury. The designated near-excess currency countries for the fiscal year are also shown in Table I. The currencies of the other countries (about 115-120) are called non-excess currencies, indicating that the nonrestricted U.S. holdings are not expected to exceed requirements for the reasonable foreseeable future. In most non-excess currency countries, the U.S. Government must purchase currencies from commercial sources for part of its operating requirements.

U.S.-owned foreign currencies which are restricted to expenditure for loans or grants within the country are called country use currencies. Other U.S.-owned currencies, whether restricted or not, are called U.S. use currencies.

ACCOUNT CLASSIFICATION

Foreign currency "FT" accounts are divided in this report into four categories according to whether the currencies are restricted or nonrestricted, and whether or not the use of the currencies requires an appropriation.

Treasury sales accounts are for nonrestricted currencies which are not earmarked for any particular use and are available for sale to any government agency for official uses, including accommodation exchange. Such currencies are used to re-

ACCOUNT CLASSIFICATION -- Continued

plenish disbursing officers' working balances, which are maintained to pay vouchers chargeable to regular dollar appropriations and to make accommodation exchanges for U. S. personnel. These working balances, which are replenished with currencies purchased with U. S. dollars from commercial sources when no currencies are on hand in Treasury sales accounts, are accounted for in terms of their U. S. dollar value and are included in the Government's regular accounts and financial reports as cash assets in the same manner as U. S. dollars. The transfer of currencies from foreign currency "FT" sales accounts to the disbursing officer's working balance constitutes the first recognition of these currencies in the regular dollar accounts, hence even though the transfer is merely a book entry between foreign currency and dollar accountability, it is usually called a "sale for dollars" or a "purchase from Treasury" depending on which side of the transaction is being viewed. In accounting terms the entry in the dollar accounts is a debit to cash and a credit to a receipt, appropriation, or fund account. Subsequently, when currencies in the working balance are disbursed to liquidate obligations, the accounting entry is a debit to an appropriation or fund account and a credit to cash.

Program accounts are established for "restricted" or "reserved" currencies which are earmarked by the terms of international agreements, or as a result of determinations under U. S. law, for specific programs. In this report two types of program accounts are distinguished, those requiring appropriations and those not requiring appropriations. The Department of the Treasury does not, in either case, control the rate and manner of use of these currencies; this control rests with program agencies.

Program accounts requiring appropriations are for currencies earmarked for a particular program which is conducted under authority of a dollar appropriation. The accounting treatment involved in the expenditure of these currencies is similar to that described above for sales accounts: The currencies

are transferred to dollar accountability for expenditure; the transfer is shown in these foreign currency tables as a "sale for dollars"; and the entries in the dollar accounts result in a debit to an appropriation and a credit to a receipt, appropriation, or fund account. On the other hand, because these currencies can only be used for particular programs, the transfer to dollar accountability and the expenditure of the currencies are virtually simultaneous, and the currencies do not become an effective part of disbursing officers' working balances. The appropriations which utilize restricted foreign currencies are of two types - regular appropriations which have no inherent foreign currency limitations and appropriations with limitations which restrict them in part to expenditure of foreign currencies acquired without purchase with dollars.

Program accounts not requiring appropriations are for currencies earmarked for use under foreign currency expenditure authorizations. Such authorizations are granted specifically by the Congress as waivers to Section 1415 of the Act of July 15, 1952 (31 U.S.C. 724) which provides that foreign currencies will not be available for expenditure except as provided in appropriation acts. The currencies do not come under the regular dollar accounting processes of the Government at any point. Their use is reported in these tables in the "expenditure" column.

Holding accounts are used generally when the specific availability of currencies is not known at the point of collection. When the availability is determined, the Department of the Treasury issues transfer authorizations moving the currencies from the holding account to one of the three categories of accounts described above.

In addition to the foregoing fourfold classification of accounts based on availability characteristics and type of expenditure authorization, foreign currency accounts are classified as Treasury or agency accounts and trust accounts. See Table II.

BASES OF FIGURES

All figures are stated in United States dollar equivalents with the exception of closing balances, which are stated in foreign currency units, as well as dollar equivalents. The currency units from which the dollar equivalents are derived are based on the official accounts of disbursing officers. Receipts are recorded in these accounts on the basis of actual currency collections received by disbursing officers. Disbursements are recorded on the basis of checks issued or payments made in foreign currency.

In general, the United States dollar equivalents are computed at rates at which disbursing officers could acquire currencies, by purchase with dollars from commercial sources, for official use. Exchange rates for financial reporting are prescribed in accordance with paragraph 4 of Procedures Memorandum No. 1 issued under Treasury Circular No. 930, Revised. Exchange rates for selling currencies to agencies are prescribed in accordance with Section 281.6 of Treasury Circular No. 930, Revised.

FOREIGN CURRENCY ACCOUNTS

TABLE II - FOREIGN CURRENCIES ACQUIRED BY THE U.S. GOVERNMENT WITHOUT PAYMENT OF DOLLARS , FISCAL YEAR 1971 - CONTINUED
Transactions and Balances Including Trust Fund Accounts 1/
(Cents omitted, therefore details will not add to totals)

664

RECEIPTS, OUTLAYS, AND BALANCES, FISCAL YEAR 1971

FOOTNOTES

- 1/ For the purpose of providing a common denominator, the currencies of the foreign countries are herein stated in U.S. dollar equivalents. It should not be assumed that dollars in amounts equal to the balances shown are actually available with respect to the transactions and balances in the custody of the Treasury. The dollar equivalents were calculated at varying rates of exchange. The opening balances are based on the June 30, 1970 reporting rates. Receipts are valued at the previous end-of-the-quarter reporting rates with the exception of currencies received under Public Law 480, as amended, Sections 103(c), 402, 502(a), and Section 6, Title II of the Mutual Security Act of 1954, as amended, which currencies are valued at international agreement rates which are referred to as either import or loan repayment rates. Currencies sold for dollars are valued at the reporting rate in effect on the date of sale. The June 30, 1971, Treasury and Agency balances are valued at the June 30, 1971 reporting rates. Transfers are valued at the beginning of the quarter reporting rates.
- 2/ Dollars acquired from the sale of foreign currencies are derived from charges against dollar appropriations of the Federal Agencies which use the currencies. These dollar proceeds are credited to either miscellaneous receipts or to other appropriate accounts on the books of the Treasury.
- 3/ Represents net differences caused by: (1) rate fluctuations; (2) the conversion of one currency to another; (3) withdrawals of currencies by Government disbursing officers at rates which vary from collection rates; and (4) other adjustments. Positive figures indicate increases and negative figures indicate decreases in dollar values.
- 4/ Consists of currencies of various countries received in payment of fees, services, etc., which were immediately purchased with appropriated funds for operating needs of collecting agencies, proceeds of which are credited to miscellaneous receipts of the Treasury. These amounts exclude repayments to appropriations.

- 5/ Consists of currencies of various countries received against dollar funds made available for purchasing in the United States to cooperating countries for financing capital and technical assistance. Further details concerning this activity can be found in the report entitled "Status Funds Report - Special Letters of Credit" control No. W-229, prepared by the Agency for International Development.
- 6/ Under procedures Memorandum No. 2, dated January 16, 1964, of Department Circular 930, Revised, which is in consonance with Section 508 of Public Law 89-257, approved December 31, 1963, as extended, reservations established under specific authority of law or in connection with special foreign currency program appropriations, generally will not involve the setting aside of these currencies in restricted funded "FT" accounts. This procedure allows the use of foreign currencies in lieu of direct dollar expenditures without making any change whatsoever in the system of congressional control of dollars or currencies or in the availability of currencies for programs for which they are reserved under existing law. It permits currencies on hand to be used for current U.S. needs which would otherwise require dollar purchases in the market with the stipulation that such currencies will be replaced as needed later. This contributes towards improving the United States balance-of-payments situation through a change in Treasury banking and accounting arrangements.

The primary advantage of the procedure is the improvement of the balance-of-payments situation, since dollar outflows for acquisition of currencies on the market is delayed until the currencies on hand have been utilized. A secondary advantage of the procedure is the simplification of accounting for and reporting on the use of foreign currencies thus putting the accounting for reserved foreign currencies on the same basis as that used for reserved U.S. dollars.
