THE SECRETARY OF THE TREASURY  
WASHINGTON

October 31, 1975

Dear Sirs:

I have the honor to transmit herewith the Combined Statement of Receipts, Expenditures and Balances of the United States Government for the fiscal year ended June 30, 1975. This submission is in accordance with the provisions of section 15 of the Act of July 31, 1894 (31 U.S.C. 1029) and section 114 of the Act of September 12, 1950 (31 U.S.C. 66b).

Sincerely yours,

William E. Simon

President of the Senate

Speaker of the House of Representatives

## INTRODUCTION

The requirement for the preparation of a report on receipts and outlays of the Government originated with Article I, Section 9 of the Constitution of the United States, which provides in part that "No money shall be drawn from the Treasury, but in consequence of appropriations made by law; and a regular statement and account of all public money shall be published from time to time." (Underlining provided) This requirement was followed by a standing order of the House of Representatives, dated December 31, 1791, which required an annual report on receipts and outlays of the Government. This requirement was superseded by the following:

Section 15 of the Act of July 31, 1894 (U.S.C. 1029) which provides, "It shall be the duty of the Secretary of the Treasury annually to lay before Congress, on the first day of the regular session thereof, an accurate combined statement of the receipts and expenditures during the last preceding fiscal year of all public moneys, including those of the Post Office Department, designating the amount of the receipts, whenever practicable, by ports, districts, and States, and the expenditures, by each separate head of appropriation."

Section 114 of the Act of September 12, 1950 (31 U.S.C. 66b) (a) which provides, "The Secretary of the Treasury shall prepare such reports for the information of the President, the Congress, and the public as well as present the results of the financial operations of the Government . . ." Section 114 also provides that the duties imposed upon the Department of the Treasury by Section 15 of the Act of July 31, 1894, may be exercised and performed by the Secretary as a part of his broader authority and duties outlined in this section.

This report is recognized as the official publication of the details of receipts and outlays with which all other reports containing similar data must be in agreement. In addition to serving the needs of Congress, the Office of Management and Budget uses this report in reviewing the President's Budget programs; the General Accounting Office in its audit activities; the various departments and agencies of the Government in reconciliation of their accounts; and the general public in its continuing review of the operations of their Government. Other reports prepared by the Department of the Treasury that contain related information include: The Daily Statement of the United States Treasury; the Monthly Statement of Receipts and Outlays of the United States Government; the Treasury Bulletin; and the Annual Report of the Secretary of the Treasury on the State of the Finances.

## DESCRIPTION OF ACCOUNTS RELATING TO CASH OPERATIONS

The classes of accounts maintained in connection with the cash operations of the Federal Government, exclusive of public debt operations, include: (1) The accounts of fiscal officers or agents, collectively, who receive money for deposit in the U.S. Treasury or for other authorized disposition or who make expenditures by drawing checks on the Treasury of the United States or by effecting payments in some other manner; (2) the accounts of administrative agencies which classify receipt and outlay transactions according to the individual receipt, appropriation, or fund account; and (3) the accounts of the Treasury of the United States whose office is responsible for the receipt and custody of money deposited by fiscal officers or agents, for the payment of checks drawn on the Treasury, and the payment of public debt securities redeemed. A set of central accounts is maintained in the Department of the Treasury for the purpose of consolidating financial data reported periodically from these three sources in order to present the results of cash operations in central financial reports, on a unified basis, for the Government as a whole, and as a means of internal control.

**DESCRIPTION OF ACCOUNTS RELATING TO CASH OPERATIONS - Continued**

The central accounts relating to cash operations disclose monthly and fiscal year information on: (1) The Government's receipts by principal sources, and its outlays according to the different appropriations and other funds involved; and (2) the cash transactions, classified by types, together with certain directly related assets and liabilities which underlie such receipts and outlays. The accounting for receipts is on the basis of collections, and outlays is on the basis of checks issued and cash payments made, except that interest on the public debt is on an accrual basis. The structure of the accounts provides for a reconciliation, on a firm accounting basis, between the published reports of receipts and outlays for the Government as a whole and changes in the Treasury's cash balance by means of such factors as checks outstanding, deposits in transit, and cash held outside the Treasury. Within the central accounts, receipt and outlay accounts are classified as described in the following paragraphs.

Budget Accounts

General fund receipt accounts - General fund receipt accounts are credited with all receipts which are not earmarked by law for a specific purpose. General fund receipts consist principally of internal revenue collections, which include income taxes, excise taxes, estate, gift, and employment taxes. The remainder consist of customs duties and a large number of miscellaneous receipts, including fees for permits and licenses, fines, penalties, and forfeitures; interest and dividends; rentals; royalties; and sale of Government property.

Special fund receipt accounts - Special fund receipt accounts are credited with receipts from specific sources which are earmarked by law for a specific purpose, but which are not generated from a cycle of operations. The Congress may appropriate these receipts on an annual basis or for an indefinite period of time. Examples of special fund receipts are those arising from rents and royalties under the Mineral Leasing Act, the revenue from visitors to Yellowstone National Park, the proceeds of the sale of certain timber and reserve lands, and other receipts authorized to be credited to the reclamation fund.

General fund expenditure accounts - General fund expenditure accounts are established to record amounts appropriated by the Congress to be expended for the general support of the Government. Such accounts are classified according to the limitations that are established by the Congress with respect to the period of availability for obligation of the appropriation, as 1-year, multiple-year, or "no-year" (without a time limit), and with respect to the agency authorized to enter into obligations and approve outlays.

Special fund expenditure accounts - Special fund expenditure accounts are established to record appropriated amounts of special fund receipts to be expended for special programs in accordance with specific provisions of law. These accounts are generally available without time limit, but may also be subject to time limitations as in the case of general fund accounts.

Revolving fund accounts - These are funds authorized by specific provisions of law to finance a continuing cycle of operations in which outlays generate receipts, and the receipts are available for outlay without further action by Congress. They are classified as (a) public enterprise funds where receipts come primarily from sources outside the Government and (b) intragovernmental funds where receipts come primarily from other appropriations or funds. These accounts are usually designated as "no-year" accounts, i.e., they are without limitation as to period of availability for outlay. Examples of public enterprise revolving funds are the Tennessee Valley Authority and the Commodity Credit Corporation. Examples of intragovernmental revolving funds are the General Supply Fund administered by the General Services Administration and the Government Printing Office Revolving Fund.

Consolidated working fund accounts - These are accounts established to receive (and subsequently disburse) advance payments from other agencies or bureaus pursuant to Section 601 of the Economy Act (31 U.S.C. 686) or other provisions of law. Consolidated working funds may be credited with advances from more than one appropriation for the procurement of goods or services to be furnished by the performing agency with the use of its own facilities within the same fiscal year. Outlays recorded in these accounts are stated net of advances credited and are classified under the agencies administering the accounts. The accounts are subject to the fiscal year limitations of the appropriations or funds from which advanced.

**DESCRIPTION OF ACCOUNTS RELATING TO CASH OPERATIONS - Continued**

Management fund accounts - These are working fund accounts authorized by law to facilitate accounting for and administration of intragovernmental activities (other than a continuing cycle of operations) which are financed by two or more appropriations. This classification is also often applied to the consolidated working funds for interagency activities described above.

Trust fund accounts - These are accounts maintained to record the receipt and outlay of moneys held in trust by the Government for use in carrying out specific purposes or programs in accordance with the terms of a trust agreement or statute. The receipts of many trust funds, especially the major ones, not needed for current payments, are invested in public debt and Government agency securities. Generally, trust fund accounts consist of separate receipt and outlay accounts, but when the trust corpus is established to perform a business-type operation, the fund entity is called a "trust revolving fund" and a combined receipt and outlay account is used. Some of the major trust fund accounts are the Federal old-age and survivors insurance trust fund, Unemployment trust fund, Civil service retirement and disability trust fund, the National service life insurance trust fund, and the Highway trust fund.

Transfer appropriation accounts - These accounts are established to receive (and subsequently disburse) allocations which are treated as non-expenditure transactions at the time the allocation is made including certain transfers under Section 601 of the Economy Act (31 U.S.C. 686), and similar provisions of law.

Other Accounts

Deposit fund accounts - Deposit funds are combined receipt and outlay accounts established to account for receipts that are either (a) held in suspense temporarily and later refunded or paid into some other fund of the Government upon administrative or legal determination as to the proper disposition thereof, or (b) held by the Government as banker or agent for others and paid out at the direction of the depositor. Such funds are not available for paying salaries, expenses, grants, or other outlays of the Government.

**EXPLANATION OF TRANSACTIONS AND BASES OF FIGURES**

As indicated in the "Table of Contents", the Combined Statement of Receipts, Expenditures and Balances of the United States Government consists of: Part One - Summary statements with supporting tables and schedules; Part Two - Details of receipts; Part Three - Details of appropriations, outlays, and balances; Part Four - Other informational data; and Part Five - Details of foreign currency transactions, with an introductory statement explaining bases of figures, account classification, etc.

Fiscal Year Summaries

Part One contains summary tables of various fiscal year General Ledger, Asset, and Account data as well as other miscellaneous financial tables. The data presented within many of them is supported by the detail presented in Parts Two, Three and Four. As such, they provide valuable conglomerate financial information on the results of operations within the federal government during the fiscal period.

## BUDGET RECEIPT AND OUTLAY ACCOUNTS

### Receipt Accounts

Part Two of this report contains the detail of internal revenue, customs, and miscellaneous receipts. Internal revenue and customs receipts are included in this report on the basis of reports of collections, which means they are reported as of the time that the cash received is placed under accounting control. Other receipts of the Government are reported on a collections received basis. Revolving fund and management fund receipts, reimbursements and refunds of moneys previously expended, are not included in the receipt tables, but are deducted from gross outlays.

### Outlay Accounts

Part Three, Section I, of this report contains the detailed tabulations of outlay accounts, by organizational unit, showing the various transactions that relate to such accounts which affect the budget surplus or deficit of the Government. The accounts are arranged according to general, special, revolving, management and trust funds, showing the titles, period of availability, and account symbols. Following are explanations of the column headings in the tabulations.

1. Balances beginning of fiscal year - The amounts shown in the first money column represent ending balances as of the close of the preceding fiscal year. An analysis of the total of these balances, expressed in terms of Fund Resources and Fund Equities, is presented on the basis of reports of the administrative agencies, submitted on Treasury Form No. TFS 2108 in accordance with requirements of Treasury Department Circular No. 965, Revised.

Fund Resources include:

- a. Undisbursed balances (by year account).
- b. Investments in Federal securities - These amounts represent investment holdings (at par value) of Government accounts in public debt and agency securities.
- c. Unfunded contract authority - These amounts represent unused authority.
- d. Borrowing authority - These amounts represent unused authority.
- e. Accounts receivable - These amounts represent receivables which, when collected, will be credited directly to the appropriation or fund, and are reported as deductions to unpaid obligations. Such amounts consist of reimbursements earned and refunds receivable, i.e., amounts earned (both billed and unbilled) for accomplished delivery or performance as of June 30, over-payment refund receivables, travel advances and other advances which did not liquidate specific obligations, e.g., advances to General Services Administration Supply Fund are included.
- f. Unfilled customer orders - These amounts consist of undelivered customer's orders to the extent that it represents valid obligations recorded by the ordering agency for those appropriations using an authority to obligate anticipated reimbursements. The amount shown for an annual appropriation covers only those orders for which valid obligations were incurred under such annual account or orders for common-use items to be delivered from stock in accordance with 32 Comp. Gen. 436.

Fund Equities include:

- a. Unobligated balance - These amounts are the unobligated balances of no-year and multiple-year accounts which are unexpired for obligation, and unobligated balances of annual and merged prior-year accounts carried forward into the fiscal year representing the excess of receivables over gross unpaid obligations. Such excess amounts are footnoted as "Excess of receivables over unpaid obligations which is unavailable for obligation." Over-obligations are also footnoted.
- b. Accounts payable - These amounts represent liabilities for goods and services received as of June 30, representing valid obligations supported by documentary evidence.
- c. Undelivered orders - These amounts represent orders for goods and services remaining undelivered as of June 30, representing valid obligations supported by documentary evidence, for which the liability has not yet accrued.

### 2. Appropriations, and other obligational authority

a. Appropriations--Article I, Section 9, of the Constitution of the United States, provides that "No money shall be drawn from the Treasury but in consequence of appropriations made by law." The appropriations included in this report are the amounts which Congress authorized to be established for the fiscal year. These amounts do not represent cash actually set aside in the Treasury for the purposes specified in the appropriation acts; they represent limitations of amounts which agencies may obligate during the time period specified in the respective appropriation acts. In

**BUDGET RECEIPT AND OUTLAY ACCOUNTS - Continued**

some instances, the Congress reappropriates part or all of the unobligated balances of prior-year appropriations which would otherwise expire. In other instances, the Congress authorized the transfer of obligational authority covering current appropriations from one agency or purpose to another. These transactions decrease and increase the amounts available for obligation in the particular appropriation accounts and are explained by applicable footnotes. The appropriations are classified to show the amounts appropriated from an organizational standpoint, and are shown in the second money column.

b. Contract authorities - Contract authorities represent a grant of authority by the Congress to incur obligations prior to the enactment of appropriations. A contract authority does not, in itself, permit the spending of money. It must be followed by an appropriation to permit payment of the obligations incurred thereunder. New contract authority granted during the fiscal year is shown in the second money column. Appropriations enacted for the fiscal year to liquidate such authority are included in this column as current year appropriations with a corresponding decrease to unfunded contract authority.

c. Authority to spend public and agency debt receipts - In some instances, the Congress grants authority to Government corporations or agencies to make outlays from funds to be borrowed from the Secretary of the Treasury or from the public. In the case of borrowings from the Treasury, the Secretary is directed to use proceeds from the sale of public debt securities. Legislation is generally specific with respect to the amount of money that can be advanced by the Treasury to each corporation or agency and often requires that the borrowing transactions be accomplished by the issuance of formal notes of the agency. A few agencies of the Government are authorized by law to issue their own securities to the public. Before issuing these securities, the agencies are required to secure approval from, or consult with, the Secretary of the Treasury with respect to terms of the borrowing and timing thereof. Such borrowings and repayment of borrowings from the Treasury or the public represent financing transactions and, therefore, do not affect the budget surplus or deficit. (Note: The Federal Financing Bank, created by Public Law 93-224, 87 Stat. 93, dated December 29, 1973, for the purpose of consolidating the market financing of other Federal agencies, such as the U.S. Postal Service, the Export-Import Bank of the United States, the Tennessee Valley Authority and others, similarly does not affect the budget surplus or deficit.) Borrowing authority granted by the Congress during the fiscal year is shown in the second money column.

3. Transfers, borrowings, and investments (net)

a. Transfers of obligated balances from lapsed appropriations to merged prior-year accounts as required by 31 U.S.C. 701, and other transfers by request of the administrative agencies concerned, as authorized by law, are shown in the third money column. The other transfers are, in the majority of cases, for the benefit of the advancing appropriation accounts, and outlays from such transfer appropriation accounts are associated with the account to which the funds were originally made available. Explanatory footnotes showing the statutory authority and amounts transferred to or from the various accounts are given at the end of each organizational chapter.

b. Other transactions shown in this column include the following:

(1) Borrowings - (a) Borrowings from the Treasury - representing the net of borrowings from or repayments to the Treasury as authorized by the Congress. (b) Borrowings from the Public - representing the net of the par value of issues or redemptions of securities of Government corporations and agencies, under the agency debt authorizations granted by the Congress. (c) Borrowings from the Treasury and the Public which include both (a) and (b).

(2) Investments - representing the net par value of purchases and sales of public debt and Government agency securities.

4. Outlays - The outlays shown in the fourth money column are reported generally on the basis of checks issued by Government disbursing officers net of collections. Certain modifications of this basis are described as follows:

a. Interest on the public debt is reported on an accrual basis.

b. Where payment is made in cash rather than by check, the cash payment is the outlay.

c. Certain outlays of an intragovernmental nature do not require the issuance of checks; for example, charges made against appropriations representing a part of employees' salaries which are withheld for individual income taxes and for savings bond allotments.

## BUDGET RECEIPT AND OUTLAY ACCOUNTS - Continued

Outlays are stated net of collections representing reimbursements as authorized by law, refunds of moneys previously expended, and receipts of revolving and management funds. In this connection, public debt or agency securities which are acquired in lieu of other properties, or donated, are considered as "constructive" receipt of cash and, therefore, the par amounts of such securities are included as receipts (reductions of outlays) of the acquiring agency.

5. Balances withdrawn and other transactions - The fifth money column includes net transactions for several types of activities as follows:

a. Unobligated balances withdrawn - Represents reductions of appropriations pursuant to 31 U.S.C. 701 which provides that "Upon the expiration of the period of availability for obligation, the unobligated balance shall be withdrawn and, if the appropriation was derived in whole or in part from the general fund, shall revert to such fund, but if the appropriation was derived solely from a special or trust fund, shall revert, unless otherwise provided by law, to the fund from which derived."

b. Unexpended balances withdrawn - Represents reduction of appropriations pursuant to 2 U.S.C. 102A which provides that "the unexpended balances of appropriations which are subject to disbursement by the Secretary of the Senate or the Clerk of the House of Representatives shall be withdrawn as of June 30, of the second fiscal year following the year for which provided."

c. Transfer to surplus fund of the Treasury - Transfers of unexpended balances of appropriations to what is termed in the law the "Surplus Fund of the Treasury" represent withdrawals of funds from such appropriations on the books without affecting the cash in the Treasury. The term "Surplus Fund of the Treasury," as used by the Congress in the Act of March 3, 1795 (1 Stat. 437) and in certain other acts, and by the Treasury Department, does not represent a fund consisting of unappropriated surplus or other assets as the term would ordinarily imply in accounting terminology; nor does it have any relation to surplus income. It is merely an expression of the action to give effect to an act of the Congress to withdraw or writeoff balances of certain appropriations. The net effect is to reduce the amount of the unexpended appropriation and thereby reduce the agency's authorization to obligate or spend. The amounts of appropriations so withdrawn are explained by appropriate footnotes.

d. Restorations to the appropriation accounts - Represents the re-establishment of balances pursuant to 31 U.S.C. 701 which provides, "That when it is determined necessary by the head of the agency concerned that a portion of the unobligated balance withdrawn is required to liquidate obligations and effect adjustments, such portion of the unobligated balance may be restored to the appropriate accounts."

e. Capital transfers - Represents nonexpenditure transfers from revolving funds on account of repayment of investment or distribution of earnings.

f. Reappropriations of prior year's appropriation data - represents the continuance of availability for designated fiscal-year appropriations in future periods. It is presented as a footnoted item in this column.

g. Changes in receivables, payables, undelivered orders, unfilled customer orders, and unobligated balances.

6. Balances end of fiscal year - These year-end balances represent the column 1 (opening) balances as adjusted by the transactions in columns 2, 3, 4 and 5. As such, these figures become the opening balance for the following fiscal period unless otherwise footnoted.

Off-Budget Federal Agencies - Presented as the last unit of Part Three, Section I are the Off-Budget Federal Agencies. These agencies would normally fall within the budget except that certain provisions of law or administrative determinations have required that transactions of such agencies or selected programs should not affect budget results. The present off-budget agencies are: the Export-Import Bank of the United States, which was classified as off-budget pursuant to Public Law 92-126, dated August 17, 1971; most outlays of the Rural Electrification Administration, including the Rural Telephone Bank, which were classified outside the budget, pursuant to Public Law 93-32, dated May 11, 1973; the United States Postal Service, which was classified outside the budget, pursuant to the Postal Reorganization Act (Public Law 91-375), dated August 12, 1970 (Payments to the postal service fund financed by general fund appropriations will continue to be reflected in budget totals); the Federal Financing Bank, which was created by the Federal Financing Bank Act of 1973 (Public Law 93-224), dated December 29, 1973; and the Pension Benefit Guaranty Corporation, which was created by the Employee Retirement Income Security Act of 1974 (Public Law 93-406), dated September 2, 1974.

**DEPOSIT FUND ACCOUNTS**

Part Three, Section II, of this report contains the detailed data relating to transactions for deposit fund accounts, none of which affect the budget results. The accounts are listed according to organizational units and the columnar headings of the tabulations are on the same basis as Part Three, Section I.

**INFORMATIONAL TABLES**

Part Four of this report contains three sections of an informational-type nature. Section I deals with Appropriations and Authorities. Section II deals with the Authority to Borrow from the Treasury and the Public with an introductory explanatory statement on this authority. Section III, the final section of Part Four, deals with other miscellaneous information that pertains to areas not covered by other sections.

**FOREIGN CURRENCY ACCOUNTS**

The final part of this report, Part Five, ~~deals with Foreign Currency~~ as it pertains to the Federal Government. An introductory statement is presented for informational purposes, and is followed by two tables detailing transactions and analyzing data in this area.

The financial statement on the preceding page does not purport to show all that the Government owns and owes but is confined to show-int those assets and liabilities which are directly related to the cash operations of the Department of the Treasury and the rest of the Government. The statement is supported by a system of central accounts maintained in the Department of the Treasury in conformity with generally accepted Governmental accounting principles applied on a basis consistent with the preceding fiscal year. The following concepts were applied in accounting for the financial results of the amendment to the Par Value Modification Act authorized by P.L. 93-110:

- A. The increment on all gold assets held by the United States Government (viz., gold held by U.S. Treasury, Federal Reserve Banks, Exchange Stabilization Fund, and the gold tranche position of the U.S. with the International Monetary Fund) were covered into the general fund of the Treasury as extraordinary receipts thereby not affecting the FY 1974 surplus or deficit.
- B. Gains and losses associated with (1) the United States Government's Special Drawing Rights account with the IMF and (2) the redemption of public debt securities denominated in foreign currencies are absorbed by the Exchange Stabilization Fund.
- C. Increased costs in repayment of foreign currency "swaps" obligations with foreign central banks were to be borne by the Federal Reserve.
- D. Maintenance of value payments to the IMF and the international financial institutions (IFI's) were recognized to the extent that funds were appropriated. Payments were made in the form of letters of credit. This defers the budgetary impact for IFI's to the point of drawdowns (to be spread over an estimated 11-year period). Drawdowns by the IMF are treated as conversion of assets and thereby do not have budgetary impact.

1/ This figure will not agree with the June 30, 1975 Monthly Statement of the Public Debt of the United States due to a change in the Public Debt reporting procedure.

2/ Excludes \$825 million of notes issued to the International Monetary Fund to conform with the Budget presentation.

3/ Represents securities issued by Government agencies which are direct liabilities of the issuing agency. The proceeds from sales and expenditures for redemptions are not used as factors in determining the budget surplus or deficit.

4/ This liability does not include interest on savings bonds of any series. The liability for interest on savings bonds which are sold at a discount is included in public debt principal on the basis of the increment in redemption value. The liability for interest on other savings bonds is recorded when the interest checks are issued with a corresponding liability for interest due and payable (equivalent, in this case, to checks outstanding). Includes \$331,033,115.32 to convert interest receivable of certain government accounts on public debt issues from a cash to an accrual basis in order to be consistent with accrual reporting of public debt interest payable.

5/ Represents funds held as deposits for others which are liabilities of the Government and as such are not used as factors in determining the budget surplus or deficit.

6/ The June 30, 1974 balance shown under the former General Account of the U.S. Treasury is now presented in the following lines:

|                                    |                    |
|------------------------------------|--------------------|
| U.S. Treasury operating cash.... r | \$9,159,226,492.57 |
| Other cash monetary assets..... r  | 1,034,241,186.36   |
| Miscellaneous asset accounts.... r | 158,522,808.49     |

As of December 9, 1974 gold certificates have been issued to the Federal Reserve against all of the gold owned by the United States, and any disposition of gold hereafter will be the result of announced sales. The information will be published monthly in the Treasury Bulletin. Gold holdings, gold certificates and other liabilities, and gold balances are included in miscellaneous asset accounts.

7/ The balance in the Treasury account is stated as published in the Daily Statement of the United States Treasury for the last working day of the fiscal year. The net amount of deposit and withdrawal transactions in the fiscal year which were processed for entry in the Treasury account after the year-end Daily Statement of the United States Treasury was published have been applied to arrive at the balance on an actual basis.

r - revised

1/ This figure will not agree with the June 30, 1975 Monthly Statement of the Public Debt due to a change in the Public Debt reporting procedure.

2/ Excludes \$825 million of notes issued to the International Monetary Fund to conform with the Budget presentation.

3/ Adjustment of revaluation entry of October 18, 1973. This adjustment results from calculation of individual U.S. melts and single bars as against calculation of total at same rate.

1 Several opening balances do not agree with last year's closing balances due to budgetary account reclassifications and adjustments pursuant to specific Congressional Legislation.

2 Unobligated balance represents no year or unexpired multiple year accounts, unless otherwise footnoted. For detail, see related departments.

3 Pursuant to 31 USC 66B(a), only Executive agencies are required to report their financial condition.

4 Represents analysis furnished by Sergeant-at-Arms; analysis of other accounts for House of Representatives not required pursuant to 31 USC 66B(a).

5 The distribution of unpaid obligations as between (1) undelivered orders and contracts and (2) accounts payable and accrued liabilities, with respect to the accounts of the Department of Defense, is largely on the basis of estimates furnished by the respective military department.

1/ In general, Government payroll offices in the continental United States are required to have a check drawn, as of the payroll date, in favor of a Federal Reserve Bank, to cover Income and FICA taxes withheld from the pay of Federal employees. The payments for these Federal Agencies using the FTD system are excluded from this table.

However, in the Department of Defense and certain other agencies with payroll offices outside the continental United States, income and FICA taxes withheld are accounted for as being credited to clearing accounts pending charges (representing payments submitted to the District Directors of Internal Revenue) with quarterly tax returns. Credits, payments, and balances in those clearing accounts maintained in the central records of the Department of the Treasury are reflected in this table.

- 1/ Amounts shown for each particular state as internal revenue receipts should not be interpreted as the actual tax burden of the residents of such states. Adjustments have not been made for cases where an individual resides in one State and derives his income from another. Also, the taxes of some corporations are paid from a principal office, although their manufacturing or service operation may be located in another state, or throughout several states. In the case of excise taxes on tobacco and automobiles, this tax is on the sales of these products at the retail level; thus the revenue is derived from the buyers located throughout the country rather than from the principal office of the manufacturers.
- 2/ Includes tax on unrelated business income of exempt organizations.

- 3/ Collections of individual income tax not withheld are inclusive of old-age, disability and hospital insurance taxes on self-employment income. Similarly, the collections of income tax withheld are reported in combined amount with old-age, disability and hospital insurance taxes on salaries and wages. Estimated separate national totals for individual income tax and for old-age, disability and hospital insurance taxes are shown in the Monthly Statement of Receipts and Outlays of the U. S. Government. Amounts of old-age, disability and hospital insurance tax collections, classified by states, are compiled by the Social Security Administration as a by-product of its wage and income record-keeping operations and are published periodically in the Social Security Bulletin.

4/ Tax payments made to banks, under the Federal tax deposit system, are included in the internal revenue collections for the period in which the Federal tax deposit is purchased. However, such payments are not classified by internal revenue districts (not by tax subclasses to which excise taxes relate) until the Federal tax deposit payment is applied to the taxpayers' liability in the internal revenue offices. Accordingly, the items shown as "Undistributed Federal tax deposits" represent the amount of Federal tax deposit forms purchased but not yet applied to the taxpayers' liability.

5/ Beginning with fiscal year 1957, the United States total for individual income tax withheld is adjusted to exclude withheld individual income taxes transferred to the Government of Guam in accordance with provisions of Public Law 630 approved August 1, 1950 (64 Stat. 392). This adjustment amounted to \$10,709,523.09.

6/ Includes railroad reemployment compensation tax and tax on railroad employee representatives.

7/ Amounts of internal revenue taxes collected on Puerto Rican tobacco and liquor manufacturers transported to the United States, or consumed in the island (less refunds, drawbacks, and expenses), are covered into the Treasury of Puerto Rico under the provisions of secs. 7652(a)(3) and 5314(a) of the Internal Revenue Code of 1954.

8/ Represents Internal Revenue Service transfer during fiscal year 1975 of \$1.00 and \$2.00 designations from the Individual Income-Withholding Receipt Account 20-0101 to account 20-5081 for the following amounts:

| Designations | Number Designated | Amount         |

Appropriations, Outlays, and Balances — Continued

- 1 Unobligated balance represents no year or unexpired multiple year account unless otherwise footnoted.
- 2 Only appropriations with appropriation transfer activity are presented in Table 1 (Appropriations and appropriation transfers) at the end of the chapter. Since the Executive Office of the President had no appropriation transfer activity during fiscal year 1975, Table 1 does not appear.
- 3 For detail of transfer activity by account see Table 2 (Transfers - Other than Appropriation Transfers) at end of chapter. Amounts not appearing in Table 2, unless otherwise footnoted, represent transfers of obligated balances from lapsed appropriations to merged prior-year accounts pursuant to 31 USC 701, borrowings (net) or investments (net).
- 4 The amounts in this column, unless otherwise footnoted, represent unobligated balances withdrawn pursuant to 31 USC 701 and changes in unfilled customer orders, accounts receivable, accounts payable, undelivered orders, and unobligated balances.
- 5 Re-established from surplus fund, 31 USC 701.

- 6 Unavailable for obligation.
- 7 All activity transferred to the Federal Energy Administration, Independent Agencies.
- 8 This office was formerly known as Special Representative for Trade Negotiations.
- 9 Subject to disposition by the administrative agency.
- 10 Includes \$270.50 excess of receivables over unpaid obligations which is unavailable for obligation.
- 11 Includes transfer of obligated balances from lapsed appropriations to merged prior-year accounts pursuant to 31 USC 701.
