**SECTION II – AUTHORITY TO BORROW FROM  
THE TREASURY AND THE PUBLIC**

---

## 1. BACKGROUND

The "authority to expend from public debt receipts" is a term identified with legislative authority to use, for specific purposes, Government funds realized from the sale of public debt securities. This practice came into use in 1932 to finance activities of the Reconstruction Finance Corporation, and has since been used numerous times to finance various Government programs.

Legislation providing authority to spend from public debt receipts, whether contained in appropriation or substantive legislation, requires approval by the Congress prior to enactment. When contained in appropriation legislation, consideration is given by the committees on appropriations; when included in substantive legislation, consideration is given by those committees with jurisdiction over the particular area of law involved. Legislation containing this authority has the same force and effect as an appropriation and is so treated in Treasury accounts and reports, and in the annual Budget Document. Like an appropriation, borrowing authority does not, by itself, create an increase in the public debt; it is the expenditure made as a result of either an appropriation or a borrowing authority which affects the level of the public debt through its impact on Government cash balances.

In addition to financing certain activities of Government corporations and special programs as authorized by the Congress, this borrowing authority method has been used to finance the Government's subscription to international organizations. Though not yet used, borrowing authority exists as "stand-by" authority in connection with bank deposits insured by the Federal Deposit Insurance Corporation (12 U.S.C. 1824), and investments in savings and loan institutions insured by the Federal Savings and Loan Insurance Corporation (12 U.S.C. 1725i). This authority has also been made available, but not used, in connection with the purchase, sale or redemption of debentures of Federal Home Loan Banks. During fiscal year 1970, the authority of these banks, which are Government-sponsored, was increased to \$4,000,000,000. The Federal National Mortgage Association, also a Government-sponsored Corporation, has authority to spend and have outstanding \$2,250,000,000 from public debt receipts.

A forerunner of this type of financing is found in the Acts of February 25, 1791 (1 Stat. 196), and April 10, 1816 (3 Stat. 269), which provided for the establishment of the First and Second Banks of the United States, respectively, and directed that the Government's subscription to the stock of these banks be financed by the issuance of public debt securities. Also, in the purchase of the Louisiana Territory, the Act of November 10, 1803 (2 Stat. 246) authorized payment through the issuance of certificates of stock "in like manner as for the present domestic funded debt." Still another example of early borrowing authority is found in the Act of June 28, 1902 (32 Stat. 484), which provided for payments on account of the acquisition and additional construction of the Panama Canal.

## 2. MAJOR LEGISLATIVE PROVISIONS

(a) The Reconstruction Finance Corporation Act, approved January 22, 1932, as amended, provided borrowing authority to the Corporation for general and special purposes, as follows:

"The Corporation may issue \*\*\* its notes, debentures, bonds, or other such obligations in an amount outstanding at any one time sufficient to enable the Corporation to carry out its functions under this chapter or any other provision of law, \*\*\* The Secretary of the Treasury is authorized to purchase any obligations of the Corporation \*\*\* to use as a public-debt transaction the proceeds from the sale of any securities issued under the Second Liberty Bond Act, as amended. \*\*\*." (15 U.S.C. 606).

(b) The Act of July 31, 1945, establishing the Export-Import Bank of Washington (renamed the Export-Import Bank of the United States, effective March 13, 1968), contained authority to spend \$825,000,000 from public debt receipts to subscribe to the Bank's capital stock. Payment for \$174,000,000 of capital stock shall be made by the surrender to the Bank for cancellation of the preferred stock heretofore issued by the Bank and purchased by the Reconstruction Finance Corporation. The Secretary of the Treasury shall pay the Corporation the par value of the preferred stock upon its surrender to the Bank. In addition, the Act contained authority for the Bank to borrow funds from the Treasury:

Borrowings from the Treasury - "The Export-Import Bank of Washington is authorized to issue from time to time \*\*\* its notes, debentures, bonds, or other obligations; \*\*\* shall not exceed \$6,000,000,000 \*\*\* The Secretary of the Treasury is authorized and directed to purchase any obligations of the Bank issued hereunder and for such purpose \*\*\* is authorized to use as a public-debt transaction the proceeds of any securities issued \*\*\*." (12 U.S.C. 635d)

(c) Operations of the Commodity Credit Corporation are financed by borrowings from the Treasury pursuant to statutory provisions as follows:

"With the approval of the Secretary of the Treasury, the Commodity Credit Corporation is authorized to issue and have outstanding at any one time, bonds, notes, \*\*\* in an aggregate amount not exceeding \$14,500,000,000 \*\*\* The Secretary of the Treasury in his discretion, is authorized to purchase any obligations of the Commodity Credit Corporation issued hereunder, and for such purpose \*\*\* is authorized to use as a public-debt transaction the proceeds from the sale of any securities \*\*\* All redemptions, purchases, and sales by the Secretary \*\*\* shall be treated as public-debt transactions \*\*\*." (15 U.S.C. 713a-4)

(d) Loan programs of the Farmers Home Administration and its predecessor agencies were financed with funds borrowed by the Reconstruction Finance Corporation until 1947 when the borrowing authority was transferred to the Secretary of Agriculture, and subsequent borrowings authorized in annual acts of Congress:

"When authorized by Congress, the Secretary is authorized to make and issue notes for the purpose of obtaining funds in such amounts as the Congress may approve annually in appropriation Acts for making direct loans under this chapter.\*\*\* The Secretary of the Treasury is authorized and directed to purchase any notes of the Secretary issued hereunder. \*\*\* All redemptions, purchases, and sales by the Secretary of the Treasury of such notes shall be treated as public debt transactions of the United States." (7 U.S.C. 1988b).

- (e) The Postal Reorganization Act, approved August 12, 1970 provided borrowing authority as follows:
  - "(a) The Postal Service is authorized to borrow money and to issue and sell such obligations as it deems necessary to carry out the provisions of this title. The aggregate amount of such obligations outstanding at any one time shall not exceed \$10,000,000,000. \*\*\*" (39 U.S.C. 2005). "For the purpose of any purchase of the obligations of the Postal Service, the Secretary of the Treasury is authorized to use as a public debt transaction the proceeds from the sale of any securities issued under the Second Liberty Bond Act, as now or hereafter in force. \*\*\*" (39 U.S.C. 2007).
- (f) The Federal Financing Bank Act of 1973, Public Law 93-224, approved December 29, 1973, "established a body corporate to be known as the Federal Financing Bank\*\*\* subject to the general supervision and direction of the Secretary of the Treasury \*\*\*" for the purpose of assuring coordination of Federal and federally assisted borrowing programs" \*\*\* with the overall economic and fiscal policies of the Government, to reduce the costs of Federal and federally assisted borrowings from the public, and to assure that such borrowings are financed in a manner least disruptive of private financial markets and institutions." \*\*\* Sec. 9 states that "the Bank (FFB) is authorized, with the approval of the Secretary of the Treasury, to issue publicly and have outstanding at any one time not in excess of \$15,000,000,000, or such additional amounts as may be authorized in appropriation Acts,\*\*\*. All purchases and sales by the Secretary of the Treasury of such obligations \*\*\* shall be treated as public debt transactions of the United States. \*\*\*" Sec. 12 further states that "\*\*\* nothing herein shall affect the budget status \*\*\* the receipts and disbursements of the Bank in the discharge of its functions shall not be included in the totals of the budget of United States Government and shall be exempt from any general limitation imposed by statute on expenditures and net lending (budget outlays) of the United States." The first offering of Federal Financing Bank Bills, dated July 30, 1974 to mature March 31, 1975, was for \$1,500,000,000.

**3. PROCEDURE AND EFFECT**

Generally, authority to borrow from the Treasury is without fiscal year limitation; however, a limitation is usually provided as to the maximum amount of borrowings repayable to the Treasury that can be outstanding at any one time. The amount so authorized, together with collections and earnings realized under the program, remain available to the agency for an indefinite period. The amounts of borrowings are generally credited by the Treasury to a revolving fund account for the borrowing agency; repayments of borrowings reduce the agency's operating fund and restore the authorization for additional borrowings.

From time to time borrowing provisions are contained in annual departmental appropriation acts and the borrowing activity of agencies is reflected annually in the fiscal year accounts. In such instances, repayments by the agencies do not restore borrowing authorities, and any additional authority to borrow must be provided by new legislation.

Where borrowings are made for programs which are nonrevenue-producing, or which result in losses, the Congress has authorized cancellations of the notes or other securities held by the Secretary of the Treasury. Where the authorities are for an indefinite period, cancellations result in a restoration of borrowing authority in an equivalent amount. Advances and repayments of borrowings do not affect the administrative budget surplus or deficit. Only actual expenditures by borrowing agencies for authorized program purposes, or the recoveries and/or realizations on related assets, have such effect. This is the same as for agency programs financed by appropriation acts.

Conforming with the provisions of law regarding the treatment of these borrowings as public-debt transactions, it can be said that the proceeds from public debt issues are used to purchase notes from borrowing agencies and repayments by such agencies are applied toward the redemption of public debt securities.

**4. EXPLANATION OF TABLES**

Table 3 - Status of Authority to Borrow from the Treasury and the Public, By Agency and Program - Relates to the activity and status of authorities during the current fiscal year, by agency and program. Reflects the amounts of unused authority at beginning of the year, current authority, adjustments, borrowings from Treasury, repayments which restore authority, nonrestoring repayments, and unused authority at end of year.

Table 4 - Status of Borrowings from the Treasury Handled as Public Debt Transactions - The data in this table relates to current fiscal year activity under the authority by the various agencies and programs. Figures are presented for current year activity, showing borrowings outstanding on June 30, 1974, net borrowings or repayments, transfers between agencies, cancellations of bonds and notes authorized by Congress, and borrowings outstanding on June 30, 1975.

Table 5 - Status of Obligational Authority Relating to Public and Agency Debt, Contract Authority and Certain Permanent Indefinite Appropriations - The data in this table presents information on a current fiscal year basis in a summary format. Column 1 presents the balance at the close of fiscal year 1974; column 2, the new obligational authority in fiscal year 1975; column 3, net borrowing or repayments in fiscal year 1975; column 4, adjustments, cancellations, and rescissions in fiscal year 1975; and column 5, the closing balance at June 30, 1975.

Note: -- In certain instances the Congress authorizes agencies to borrow either from the Secretary of the Treasury or from the public. In most of these cases, Congress provides specified limitations and conditions for each type of borrowing authority; however, a minimum amount of borrowings that can be outstanding at any one time under the combined authority is usually established in the provision of law. Therefore, amounts shown in Parts I and II of this table for agencies having both types of borrowings authority should not be combined since this would involve a duplication or overstatement of the maximum authority set by the Congress.

- <sup>1/</sup> These repayments were deposited in miscellaneous receipts of the United States Treasury.
- <sup>2/</sup> Designated as off budget.
- <sup>3/</sup> Authority to borrow from the Treasury is indefinite in amount. This figure represents amount borrowed from the Treasury during the fiscal year.
- <sup>4/</sup> Authority to borrow from the Treasury is indefinite. Amount shown represents unpaid obligations and unobligated amounts, less the available fund balance and other receivables.
- <sup>5/</sup> Borrowing authority of \$800,000,000 pursuant to 88 Stat. 670 limited to \$100,000,000 for fiscal year 1975 by PL93-554.
- <sup>6/</sup> Represents portion of decrease in net lending applied to reduce borrowings from the Treasury.
- <sup>7/</sup> Represents funds applied to other than lending subject to loan authorization.

- <sup>8/</sup> Agency securities sold by the Bank amounted to \$2,593,115,000 outstanding as of June 30, 1974. The unused authority to borrow from the Treasury has not been reduced thereby, since the Bank may borrow from the Treasury to liquidate these securities.
- <sup>9/</sup> Borrowing authority of \$10 billion reduced by \$250 million borrowed from the public and \$1,500 million borrowed from the Federal Financing Bank.
- <sup>10/</sup> Authorized to borrow from the Treasury for payment of interest on or retirement of principal on stadium bonds issued to the public in accordance with an act approved July 28, 1958, (72 Stat. 423).
- <sup>11/</sup> Represents borrowings from the Treasury.
- <sup>12/</sup> Represents appropriations applied to reduction of agency debt.
- <sup>13/</sup> Represents net borrowing from the Federal Financing Bank in lieu of agency debt.
- <sup>14/</sup> Includes \$500,000,000 borrowed in Fiscal Year 1974.

## INTRODUCTORY STATEMENT

The U.S. Government acquires and spends large amounts of foreign currencies in the course of its overseas operations. Foreign currencies acquired are purchased with dollars from commercial sources or received without direct purchase with dollars, hereafter referred to as "purchased" or "nonpurchased" foreign currencies. Clarification may be required to distinguish between currencies purchased with dollars and those acquired without direct purchase with dollars, since dollars are in fact used to purchase the commodities or items which are exchanged for most of the "nonpurchased" foreign currencies. The major distinction is that direct purchase of foreign currencies from outside commercial sources generally will involve dollar flows into the economy and banking system of the foreign government, whereas the expenditure for commodities, etc., generally will not.

This report deals primarily with the "nonpurchased" foreign currencies received -

- (1) in exchange for agricultural commodities financed by the Department of Agriculture (including repayment of loans of these funds);
- (2) in repayment of loans financed by dollar expenditures under the Foreign Assistance Act of 1961, and prior acts as amended;
- (3) as payment of interest on deposits of foreign currency in foreign banks;
- (4) from various other programs.

These nonpurchased foreign currencies are separate and distinct from the Budget Expenditure Accounts included in Part Three of the Combined Statement and do not affect the Budget surplus or deficit of the U.S. Government except to the extent that the currencies are "sold for dollars."

Table I of this report includes the balances of purchased foreign currencies held by the various U.S. and military disbursing officers. Thus all foreign currencies held by the U.S. Government are included in Table I of this report. Both Tables I and II, however, exclude foreign country owned funds (usually called "counterpart") which are local currencies owned and held by foreign Governments in special counterpart accounts in accordance with Section 609 of the Foreign Assistance Act of 1964 (22 U.S.C. 2359) and similar provisions of law. These latter currencies are not available for use by the U.S.; but the U.S. Government, through the Agency for International Development, has some say in how they are used by the foreign governments. These "counterpart" funds are reported by the Treasury in the "Inventory of Non-purchased Foreign Currencies."

Details by country and account previously shown in Part Five (1958-1969) may be found in a periodic report published by the Department of the Treasury, Bureau of Government Financial Operations, Division of Government Accounts and Reports, Special Reporting Branch.

## AVAILABILITY OF NONPURCHASED FOREIGN CURRENCIES

The foreign currencies reported herein in large part are neither freely convertible to other currencies nor freely spendable by the U.S. Government for the general support of its overseas operations. Most of the currencies are restricted by the terms of international agreements to use for specific programs and may not be used for other purposes without the consent of the foreign governments involved. These restricted accounts, however, are generally unfunded under a "reservation system" to account for currencies used temporarily for other U.S. Government programs. The Department of the Treasury maintains central memorandum reservation accounts for each country, similar to special fund accounts in the dollar area. The remainder of the currencies are termed nonrestricted. Although not generally convertible to other currencies or to U.S. dollars, nonrestricted currencies may be used for payment of official U.S. obligations in the country concerned, for accommodation exchanges for U.S. personnel, and sale for dollars to U.S. citizens and non-profit organizations for travel or other purposes in selected countries. Thus, nonrestricted currencies substitute for currencies which the U.S. Government would otherwise purchase with U.S. dollars from commercial sources.

Where the supply of a nonrestricted currency is great enough to more than meet U.S. requirements for the next two years (exclusive of requirements financed by restricted or reserved currencies), the currency is designated as excess by the Department of the Treasury. This designation permits agencies to request reservations of the currency for expenditure under appropriations for "special foreign currency programs" which utilize excess currencies exclusively. The designated excess currency countries for the fiscal year are shown in Table I. Where the supply of currencies is above the immediate needs of the U.S. Government but not sufficient for the country to be declared excess, the currency is designated as near-excess by the Department of the Treasury. The designated near-excess currency countries for the fiscal year are also shown in Table I. The currencies of the other countries (about 115-120) are called non-excess currencies, indicating that the nonrestricted U.S. holdings are not expected to exceed requirements for the reasonable foreseeable future. In most non-excess currency countries, the U.S. Government must purchase currencies from commercial sources for part of its operating requirements.

U.S.-owned foreign currencies which are restricted to expenditure for loans or grants within the country are called country use currencies. Other U.S.-owned currencies, whether restricted or not, are called U.S. use currencies.

Foreign currency "FT" accounts are divided in this report into four categories according to whether the currencies are restricted or nonrestricted, and whether or not the use of the currencies requires an appropriation.

Holding accounts are used generally when the specific availability of currencies is not known at the point of collection. When the availability is determined, the Department of the Treasury issues transfer authorizations moving the currencies from the holding account to one of the three categories of accounts described below.

Treasury sales accounts are for nonrestricted currencies which are not earmarked for any particular use and are available for sale to any government agency for official uses, including accommodation exchange. Such currencies are used to replenish disbursing officers' working balances, which are maintained to pay vouchers chargeable to regular dollar appropriations and to make accommodation exchanges for U.S. personnel. These working balances, which are replenished with currencies purchased with U.S. dollars from commercial sources when no currencies are on hand in Treasury sales accounts, are accounted for in terms of their U.S. dollar value and are included in the Government's regular accounts and financial reports as cash assets in the same manner as U.S. dollars. The transfer of currencies from foreign currency "FT" sales accounts to the disbursing officer's working balance constitutes the first recognition of these currencies in the regular dollar accounts (balances of which are referred to as "purchased" currencies), hence even though the transfer is merely a book entry between foreign currency and dollar accountability, it is usually called a "sale for dollars" or a "purchase from Treasury" depending on which side of the transaction is being viewed. In accounting terms the entry in the dollar accounts is a debit to cash and a credit to a receipt, appropriation, or fund account. Subsequently, when currencies in the working balance are disbursed to liquidate obligations, the accounting entry is a debit to an appropriation or fund account and a credit to cash.

Program accounts are established for "restricted" or "reserved" currencies which are earmarked by the terms of international agreements, or as a result of determinations under U.S. law, for specific programs. In this report, two types of program accounts are distinguished--those requiring appropriations and those not requiring appropriations. The Department of the Treasury does not, in either case, control the rate and manner of use of these currencies; this control rests with program agencies.

Program accounts requiring appropriations are for currencies earmarked for a particular program which is conducted under authority of a dollar appropriation. The accounting treatment involved in the expenditure of these currencies is similar to that described above for sales accounts: The currencies are transferred to dollar accountability for expenditure; the transfer is shown in these foreign currency tables as a "sale for dollars"; and the entries in the dollar accounts result in a debit to an appropriation and a credit to a receipt, appropriation, or fund account. On the other hand, because these currencies can only be used for particular programs, the transfer to dollar accountability and the expenditure of the currencies are virtually simultaneous, and the currencies do not become an effective part of disbursing officers' working balances. The appropriations which utilize restricted foreign currencies are of two types--regular appropriations which have no inherent foreign currency limitations and appropriations with limitations which restrict them in part to expenditure of foreign currencies acquired without purchase with dollars.

Program accounts not requiring appropriations are for currencies earmarked for use under foreign currency expenditure authorizations. Such authorizations are granted specifically by the Congress as waivers to Section 1415 of the Act of July 15, 1952 (31 U.S.C. 724) which provides that foreign currencies will not be available for expenditure except as provided in appropriation acts. The currencies do not come under the regular dollar accounting processes of the Government at any point. Their use is reported in these tables in the "expenditure" column.

In addition to the foregoing fourfold classification of accounts based on availability characteristics and type of expenditure authorization, foreign currency accounts are classified as Treasury or agency accounts and trust accounts (See Table II).

## BASES OF FIGURES

Figures stated in dollar equivalents in this report are based on the foreign currency units as maintained in the official accounts of the various U.S. and military disbursing officers of the U.S. Government. Receipts are recorded in these accounts on the basis of actual currency collections received by disbursing officers. Disbursements are recorded on the basis of checks issued or payments made in foreign currency.

In general, the U.S. dollar equivalents are computed at rates at which disbursing officers could acquire currencies by purchase with dollars from commercial sources for official use. Exchange rates for financial reporting are prescribed in accordance with Paragraph 4 of Procedures Memorandum No. 1 issued under Treasury Circular No. 930, Revised. Exchange rates for selling currencies to agencies are prescribed in accordance with Section 281.6 of Treasury Circular No. 930, Revised.

RECEIPTS, OUTLAYS, AND BALANCES, FISCAL YEAR 1975

TABLE I - ANALYSIS OF TOTAL FOREIGN CURRENCIES HELD BY THE U.S. GOVERNMENT

JUNE 30, 1975

FOOTNOTES

Note: Figures presented in this table are preliminary. Final data reviewed by agencies in accordance with Treasury Circular No. 930, Procedures Memorandum No. 1 will appear in the Treasury publication, "Foreign Currencies Held by the U.S. Government."

- 1/ Currencies which may be used for payment of official obligations in the countries concerned, for accommodation exchange for U.S. personnel, and for sale to U.S. citizens and non-profit organizations for travel and other purposes.
- 2/ Currencies which are restricted by the terms of international agreements or by administrative determination to specific program uses. Examples include funds for emergency relief and other programs under P.L. 480, American schools and hospitals abroad under the Foreign Assistance Act, expenses of Congressional committees, etc.
- 3/ Currencies which are U.S.-owned foreign currencies but are restricted to expenditure for loans or grants within the respective countries according to agreement terms.
- 4/ Negative figures in this column represent the offset to the amounts of currency used temporarily for other purposes under the unfunding concept pursuant to Public Law 89-677 of October 15, 1966.
- 5/ Represents amounts committed to agencies for their future use for specific programs. If no FT funds are available when needed, currencies will be purchased from commercial sources. See also footnote 5 to Table II.
- 6/ Negative balances result from end-of-month payments to be funded from FT funds or purchases in the market with U.S. dollars in the following month.
- 7/ Includes accommodation exchange transactions and purchases from banks and other commercial sources by disbursing officers. In most excess and near excess currency countries, the entire amounts shown are the result of accommodation exchange receipts authorized under Treasury Circular No. 830 of July 28, 1966, as revised.
- 8/ Represents the purchase of foreign currencies by departments and agencies with appropriated dollars from available Treasury FT holdings.
- 9/ Countries in which U.S. supplies of local currency have been determined to exceed U.S. requirements for at least the next two years.
- 10/ Countries in which U.S. supplies of local currency have been determined to exceed the immediate needs of the U.S. Government, but not by amounts great enough to be declared "excess."
- 11/ Countries in which U.S. supplies of local currency have not been designated "excess" or "near-excess."
- 12/ Czechoslovakia- Represents funds transferred from the Department of the Army to the Department of the Treasury.
- 13/ The CFA franc is the official currency unit for several African countries and is freely exchangeable for any other currency in the French franc area. All CFA franc purchases are shown under Senegal.
- 14/ Japan - Includes \$15,299,174 which is available for educational, scientific, and cultural activities pursuant to an agreement with the Government of Japan, dated January 9, 1962.
- 15/ Includes \$4,051,624,000 which was purchased by the Department of Defense.
- 16/ Includes \$61,643,000 which was purchased by the Department of Defense.
- 17/ Includes revised Air Force and Navy balances not included in Table A - Schedule 3 of the Combined Statement.

FOREIGN CURRENCY ACCOUNTS

TABLE II - FOREIGN CURRENCIES HELD BY THE U.S. GOVERNMENT, FISCAL YEAR 1975

FOOTNOTES

Note: Figures presented in this table are preliminary. Final data reviewed by agencies in accordance with Treasury Circular No. 930, Procedures Memorandum No. 1 will appear in the Treasury publication, "Foreign Currencies Held by the U.S. Government."

- 1/ For the purpose of providing a common denominator, the currencies of the foreign countries are herein stated in U.S. dollar equivalents. It should not be assumed that dollars in amounts equal to the balances shown are actually available with respect to the transactions and balances in the custody of the Treasury. The dollar equivalents were calculated at varying rates of exchange. The opening balances are based on the June 30, 1974 reporting rates. Receipts are valued at the previous end-of-the-quarter reporting rates with the exception of currencies received under Public Law 480, as amended, Sections 103(c), 402, 502(a), and Section 6, Title II of the Mutual Security Act of 1954, as amended, which currencies are valued at international agreement rates which are referred to as either import or loan repayment rates. Currencies sold for dollars are valued at the exchange rate in effect on the date of sale. The June 30, 1975, Treasury and Agency balances are valued at the June 30, 1975 reporting rates. Transfers and expenditures are valued at the beginning of the quarter reporting rates.
- 2/ Dollars acquired from the sale of foreign currencies are derived from charges against dollar appropriations of the Federal Agencies which use the currencies. These dollar proceeds are credited to either miscellaneous receipts or to other appropriate accounts on the books of the Treasury.
- 3/ Represents net differences caused by: (1) rate fluctuations; (2) the conversion of one currency to another; (3) withdrawals of currencies by Government disbursing officers at rates which vary from collection rates; and (4) other adjustments. Positive figures

indicate increases and negative figures indicate decreases in dollar values.

- 4/ Consists of currencies of various countries received in payment of fees, services, etc., which were immediately purchased with appropriated funds for operating needs of collecting agencies, proceeds of which are credited to miscellaneous receipts of the Treasury. These amounts exclude repayments to appropriations.
  - 5/ Under Procedures Memorandum No. 2, dated January 16, 1964, of Department Circular 930, Revised, which is in consonance with Section 508 of Public Law 89-257, approved December 31, 1963, as extended, reservations established under specific authority of law or in connection with special foreign currency program appropriations, generally will not involve the setting aside of these currencies in restricted funded "FT" accounts. This procedure allows the use of foreign currencies in lieu of direct dollar expenditures without making any change whatsoever in the system of congressional control of dollars or currencies or in the availability of currencies for programs for which they are reserved under existing law. It permits currencies on hand to be used for current U.S. needs which would otherwise require dollar purchase in the market with the stipulation that such currencies will be replaced as needed later. This contributes towards improving the United States balance-of-payments situation through a change in Treasury banking and accounting arrangements.
- The primary advantage of the procedure is the improvement of the balance-of-payments situation, since dollar outflows for acquisition of currencies on the market is delayed until the currencies on hand have been utilized. A secondary advantage of the procedure is the simplification of accounting for and reporting on the use of foreign currencies thus putting the accounting for reserved foreign currencies on the same basis as that used for reserved U.S. dollars.
