## Treasury Profile

On September 2, 1789, an act of Congress created the Department of the Treasury. Many subsequent acts influenced the development of the Department. Those acts delegated new duties and established the numerous bureaus and divisions that now compose the Department. Today, the Treasury's mission can be categorized into four basic functions: formulating and recommending economic, financial, tax and fiscal policies; serving as financial manager and financial agent for the U.S. Government; enforcing Federal finance and tax laws; and manufacturing coins and currency.

## Bureau of the Fiscal Service

The Bureau of the Fiscal Service (Fiscal Service), a bureau of the Department of the Treasury, performs a critical role in fulfilling the Treasury's mission as the Government's financial manager. For example, Fiscal Service makes Federal payments and collections. It also maintains the Government's central accounting and reporting systems. In addition, Fiscal Service administers the Government's cash management programs, credit and debt collection activities, and various other financial services.

In its role as Federal financial agent, the Fiscal Service publishes the "Combined Statement of Receipts, Outlays, and Balances of the United States Government." This statement includes data maintained in the central accounts, which are provided by Federal entities, disbursing officers and the Federal Reserve Banks.

An electronic version of the report can be found on the Fiscal Service website at <https://www.fiscal.treasury.gov/reports-statements/combined-statement/>

## Legislative Requirement

The Constitution of the United States, Article 1, Section 9, clause 7, outlines requirements for a report on the receipts and outlays of the Government. It provides, in part, that "No Money shall be drawn from the Treasury, but in Consequence of Appropriations made by law; and a regular Statement and Account of the Receipts and Expenditures of all public Money shall be published from time to time."

31 U.S.C. 3513(a) provides in part, "The Secretary of the Treasury shall prepare reports that will inform the President, Congress, and the public on the financial operations of the United States Government."

This statement is recognized as the official publication of receipts and outlays. Several major Government bodies rely on data found in this report. The Congressional Budget Office uses it to serve the needs of Congress; the Office of Management and Budget uses the data to review the President's Budget programs; the Government Accountability Office uses it to perform audit activities; the various departments and agencies of the Government use it to reconcile their accounts; and the public uses it to review the operations of their Government. The budget figures presented in this statement represent agency reporting for fiscal 2023 and adjustments to those year-end figures as reported through October 18, 2022. Revisions may be necessary once agencies have fully reconciled their data. Any changes will be published in other reports prepared by the Fiscal Service that contain related information. These include: the "Daily Treasury Statement," the "Monthly Treasury Statement of Receipts and Outlays of the United States Government," and the "Treasury Bulletin."

## Description of Accounts Relating to Cash Operations

---

The classes of accounts maintained in connection with the cash operation of the Federal Government, exclusive of public debt operations, include: (1) The accounts of fiscal officers or agents, collectively, who receive money for deposit in the U.S. Treasury or for the authorized disposition or who make expenditures by drawing checks on the Treasury of the United States or by effecting payments in some other manner; (2) the accounts of administrative agencies which classify receipt and outlay transactions according to the individual receipt, appropriation, or fund account; and (3) the accounts of the Treasury of the United States which office is responsible for the receipt and custody of money deposited by fiscal officers or agents, for the payment of checks drawn on the Treasury, and the payment of public debt securities redeemed. A set of central accounts is maintained in the Department of Treasury for the purpose of consolidating financial data reported periodically from these three sources in order to present the results of cash operations in central financial reports, for the Government as a whole, and as a means of internal control.

The central accounts relating to cash operations disclose monthly and fiscal year information on: (1) the Government's receipts by principle sources, and its outlays according to the different appropriations and other funds involved; and (2) the cash transactions, classified by types, together with certain directly related assets and liabilities which underlie such receipts and outlays. Accounting for receipts is on the basis of collections, accounting for outlays is on the basis of checks issued and cash payment made (cash basis). However, the interest on the public debt, public issues, is on the accrual basis while the interest on special issues is on the cash basis. The structure of the accounts provides for reconciliation, on a firm accounting basis, between the published reports of receipts and outlays for the Government as a whole and changes in the Treasury cash balances by means of such factors as checks outstanding, deposits in transit, and cash held outside the Treasury. Within the central accounts, receipt and outlay accounts are classified as described in the following paragraphs.

### Budget Receipt and Outlay Accounts

**General fund receipt accounts** are credited with all receipts, which are not earmarked by law for a specific purpose. General fund receipts consist principally of internal revenue collections, which include income taxes, excise taxes, estate, gift, and employment taxes. The remainder consists of customs duties and a large number of miscellaneous receipts, including fees for permits and licenses, fines, penalties, and forfeitures; interest and dividends; rentals; royalties; and sale of Government property.

**Special fund receipt accounts** are credited with receipts from specific sources which are earmarked by law for a specific purpose but which are not generated from a cycle of operations. The Congress may appropriate these receipts on an annual basis or for an indefinite period of time. Examples of special fund receipts are those arising from rents and royalties under the Mineral Leasing Act, the revenue from visitors to Yellowstone National Park, the proceeds of the sale of certain timber and reserve lands, and other receipts authorized to be credited to the reclamation fund.

**General fund expenditure accounts** are established to record amounts appropriated by Congress to be expended for the general support of the Government. Such accounts are classified according to the limitations that are established by the Congress with respect to the period of availability for obligation of the appropriation, as 1-year, multiple-year, or "no-year" (without a time limit), and with respect to the agency authorized to enter into obligations and approve outlays.

**Special fund expenditure accounts** are established to record appropriated amounts of special fund receipts to be expended for special programs in accordance with specific provisions of law. These accounts are generally available without time limit, but may also be subject to time limitations as in the case of general fund accounts.

**Revolving fund accounts** are funds authorized by specific provisions of law to finance a continuing cycle of operations in which outlays generate receipts, and the receipts are available for outlay without further action by Congress. They are classified as (a) public enterprise funds where receipts come primarily from sources outside the Government and (b) intragovernmental funds where receipts come primarily from other appropriations or funds. These accounts are usually designated as "no-year" accounts, i.e. they are without limitation as to period of availability for outlay. Examples of public enterprise revolving funds are the Tennessee Valley Authority and the Commodity Credit Corporation. Examples of intergovernmental revolving funds are the General Supply Fund administered by the General services Administration and the Government Printing Office Revolving Fund.

**Consolidated working fund accounts** are established to receive (and subsequently disburse) advance payment from the agencies or bureaus pursuant to Section 601 of the Economy Act (31 U.S.C. 1535) or other provisions of law. Consolidated working funds may be credited with advances from more than one appropriation for the procurement of goods and services to be furnished by the performing agency with the use of its own facilities within the same fiscal year. Outlays recorded in these accounts are stated net of advances credited and are classified under the agencies administering the accounts. The accounts are subject to the fiscal year limitations of the appropriations or funds from which advanced.

## Description of Accounts Relating to Cash Operations

---

**Management fund accounts** are working fund accounts authorized by law to facilitate accounting for and administration of intragovernmental activities (other than a continuing cycle of operations), which are financed by two or more appropriations. This classification is also often applied to the consolidated working funds for interagency activities described above.

**Trust fund accounts** are accounts maintained to record the receipt and outlay of monies held in trust by the Government for use in carrying out specific purposes or programs in accordance with the terms of a trust agreement or statute. The receipts of many trust funds, especially the major ones, not needed for current payments, are invested in public debt and Government Agency securities. Generally, trust fund accounts consist of separate receipt and outlay accounts, but when the trust corpus is established to perform a business-type operation, the fund is called a "trust revolving fund" and a combined receipt and outlay account is used. Some of the major trust fund accounts are the Federal Old Age and Survivors Insurance Trust Fund, Unemployment Trust Fund, Civil Service Retirement and Disability Trust Fund, The National Service Life Insurance Trust Fund, and the Highway Trust Fund.

**Allocation (formerly Transfer appropriation) accounts** are established to receive (and subsequently disburse) allocations which are treated as non-expenditure transactions at the time the allocation is made including certain transfers under Section 601 of the Economy Act (31 U.S.C. 1535), and similar provisions of law.

# Explanation of Transactions and Basis of Figures

---

As indicated in the “Table of Contents,” the Combined Statement of Receipts, Outlays, and Balances of the United States Government consists of Part One - Fiscal Year Summary Statements; Part Two – Details of Receipts; and Part Three – Details of Appropriations, Outlays, and Balances.

## Part One: Fiscal Year Summary

Part One consists of summary reports featuring Financial Highlights, Receipts by Source, and Outlays by Function. In addition a summary statement representing the Federal Government’s Central Summary General Ledger Account Balances is included.

## Part Two: Details of Receipts

Part Two of this report contains the detail of internal revenue, customs, and miscellaneous receipts. Internal revenue and customs receipts are included in this report on the basis of reports of collections, which means they are reported as of the time that the cash received is placed under accounting control. Other receipts of the Government are reported on a collections received basis. Revolving fund and management fund receipts, reimbursements, and refunds of monies previously expended are not included in the receipt tables but are deducted from gross outlays.

## Part Three: Details of Appropriations, Outlays, and Balances

Part Three of this report contains the detailed tabulations of outlays accounts, by organizational unit showing the various transactions that relate to such accounts which affect the budget surplus or deficit of the Government. The accounts are arranged according to general, special, revolving, management and trust funds; showing the titles, period of availability and account symbols. Following are explanations of the column headings in the tabulations.

### 1. Balances beginning of fiscal year

The amounts shown in the first money column represent ending balances as of the close of the preceding fiscal year. An analysis of the totals of these balances, expressed in terms of Fund Resources, is presented on the basis of reports of the administrative agencies, in accordance with the Treasury Financial Manual. Fund Resources include:

- Undisbursed balances (by fiscal year account)
- Investments in Federal securities—represent investment holding (as par value) of Government accounts in public debt or agency securities.
- Unfunded contract authority—represent unused authority.
- Funds held outside the Treasury—represent cash held outside Treasury, including cashier funds.
- Borrowing authority—may be classified as either “definite” or “indefinite.” Definite authority to borrow is stated by law as a specific aggregate sum that cumulative borrowings cannot exceed. Indefinite borrowing authority is categorized as either (1) unlimited borrowing authority – whereby the law allows the agency to borrow as needed or (2) authority set by legislative ceiling – whereby the law allows the agency to borrow as needed but sets a specific dollar limit on the amount outstanding at any one time. For accounts with definite borrowing authority, these amounts represent unused authority. For accounts with indefinite borrowing authority, these amounts represent those unpaid obligations covered by borrowing authority at the beginning of the fiscal year.

### 2. Appropriations and other obligational authority

- Appropriations—Article I, Section 9, of the Constitution of the United States provides in part that “No Money shall be drawn from the Treasury, but in Consequence of Appropriations made by Law ...” The appropriations included in this report are the amounts which Congress authorized to be established for the fiscal amounts which agencies may obligate during the time period specified in the respective appropriation acts. In some instances, the Congress re-appropriates part or all of the unobligated balances of prior-year appropriations that would otherwise expire. In other instances, the Congress authorizes the transfer of obligational authority of particular appropriation accounts and is explained by applicable footnotes. The appropriations are classified to show the amounts appropriated from an organizational standpoint, and are shown in the second money column.
- Contract authorities—represent a grant of authority by the Congress to incur obligations prior to the enactment of appropriations. Contract authority does not, in itself, permit the spending of money. It must be allowed by an appropriation to permit payment of the obligations that are incurred thereunder. New contract authority granted during the fiscal year is shown in the second money column. Appropriations enacted for the fiscal year to liquidate such authority are included in this column as current year appropriations with a corresponding decrease to unfunded contract authority.
- Authority to borrow from the Treasury and the public—In some instances, the Congress grants authority to Government corporations or agencies to make outlays from funds to be borrowed from the Secretary of the Treasury or from the public. In the case of borrowing from the Treasury, the Secretary is directed to use proceeds

from the sale of public debt securities. Legislation is generally specific with respect to the amount of money that can be advanced by the Treasury to each corporation or agency and often requires that borrowing transaction be accomplished by the issuance of formal notes of the agency. A few agencies of the Government are authorized by law to issue their own securities to the public. Before issuing these securities, the agencies are required to secure approval from, or consult with the Secretary of the Treasury with respect to terms of the borrowing and timing thereof. Such borrowings and repayment of borrowings from the Treasury or the public represent financing transactions, and therefore, do not affect the budget surplus or deficit. (Note: The Federal Financing Bank, created by Public Law 93-224 (87 Stat. 937) dated December 29, 1973, for the purpose of consolidating the market financing of other Federal agencies, such as the U.S. Postal Service, the Export- Import Bank of the United States, the Tennessee Valley Authority and others, similarly does not affect the budget surplus or deficit.) Increases and rescissions in borrowing authority during the fiscal year are shown in the second money column.

### 3. Transfers, borrowings, and investments (net)

Transfers shown in the third money column are, in the majority of cases, for the benefit of advancing appropriation accounts. Outlays from such transfer appropriation accounts are associated with the account to which the funds were originally made available.

Other transactions shown in this column include the following:

- Borrowings—represents the net amount of actual borrowings made during the fiscal year.
- Investments—represents the net par value of purchases and sale of public debt and government agency securities.
- Funds held outside the Treasury—represents cash held outside the Treasury and net cash advances to government cashiers.

### 4. Outlays (net)

The outlays in the fourth money column are reported generally on the basis of checks issued by Government disbursing officers net of collections. Certain modifications of this basis include:

- Interest on public issues of the public debt is on an accrual basis; interest on special issues is on a cash basis.
- Where payment is made in cash rather than by check, the cash payment is the outlay.
- Certain outlays of an intragovernmental nature do not require the issuance of checks; for example, charges made against appropriations representing a part of employees' salaries which are withheld for individual income taxes and for savings bond allotments.
- Outlays are stated net of collections representing reimbursements as authorized by law, refunds of monies previously expended, and receipts of revolving and management funds. In this connection, public debt or agency securities which are acquired in lieu of other properties, or donated, are considered as "constructive" receipt of cash and therefore, the par amounts of such securities are included as receipts (reductions of outlays) of the acquiring agency.

### 5. Balances withdrawn and other transactions

The fifth money column includes net transactions for several types of activities as follows:

- Unobligated balances withdrawn—represents amounts for obligations that are no longer valid and have been canceled.
- Unexpended balances withdrawn—represents reductions of appropriations pursuant to 2 U.S.C. 102(a) which provides that the unexpended balances of appropriations which are subject to disbursement by the Secretary of the Senate or the Clerk of the House of Representatives shall be withdrawn as of September 30, of the second fiscal year following the year for which provided.
- Unobligated balances canceled—represents the unobligated balances canceled pursuant to 31 U.S.C. 1552(a) which provides that "On September 30th of the 5th fiscal year after the period of availability for obligations of a fixed appropriation account ends, the account shall be closed and any remaining balance (whether obligated or unobligated) in the account shall be cancelled and thereafter shall not be available for obligation or expenditure for any purpose."
- Capital transfers—represents non-expenditure transfers from revolving funds on account of repayment of investment or distribution of earnings.
- Adjustments to borrowing authority—represents a reduction in borrowing authority when fund resources other than borrowings were used or are available to liquidate or cover unpaid obligations.

### 6. Balances end of fiscal year

These year-end balances represent the column 1 (opening) balances as adjusted by the transactions in columns 2, 3, 4, and 5. As such, these figures become the opening balances for the succeeding fiscal period unless otherwise footnoted (i.e. September 30, 2023 closing balances will be the corresponding opening balances for fiscal year 2024). The closing balances

of accounts with borrowing authority represent either (1) definite borrowing authority – unused borrowing authority at the close of the fiscal year or (2) indefinite borrowing authority – the amount equal to those unpaid obligations covered by borrowing authority at the close of the fiscal year.

### **Off-Budget Federal Entities**

Pursuant to the Balanced Budget and Emergency Deficit Control Act of 1985 (Public Law 99-177), those entities that were formerly off-budget are now included in the budget totals. This same legislation shifted Social Security (the Federal Old-Age Survivors Insurance Trust Fund and the Federal Disability Insurance Trust Fund) off-budget. The budgetary presentation shows federal receipts, outlays, and surpluses or deficits including Social Security, and also shows separately the on-budget and off-budget components.
