# Profile of the Economy 

[Source: Office of Macroeconomic Analysis] As of May 18, 2009

## Introduction

U.S. economic conditions deteriorated significantly during the latter half of 2008, and in early December 2008 the National Bureau of Economic Research (NBER) determined that the economy had been in recession since December 2007. The December 2007 business cycle peak marked the end of a 73-month expansion that began in November 2001. The previous expansion, which began in March 1991 and peaked in March 2001, had lasted 120 months. Economic conditions, particularly in labor markets, have continued to deteriorate in 2009, although very recently there have been tentative signs that the pace of deterioration is slowing.

Headline inflation, which peaked in July 2008 on the back of rising energy and other commodity prices, retreated sharply during the latter half of last year, and most recently, the headline consumer price level declined. Core inflation (a measure excluding food and energy) has remained relatively contained, falling to the lower end of recent ranges in April. Conditions in housing and financial markets deteriorated through most of 2008 but in the first few months of this year, have begun to show signs of limited improvement. Stock market indexes dropped significantly in 2008 but have trended higher since early March. Most economists see some growth in the second half of 2009, boosted by the American Recovery and Reinvestment Act (ARRA) of 2009.

## Growth

Growth in the U.S. economy contracted in the final two quarters of 2008, and fell 0.8 percent over the whole year, the first four-quarter decline since 1991. In the third quarter of 2008, real gross domestic product (GDP) fell by 0.5 percent at an annual rate, mainly due to a drop in consumer spending, and in the fourth quarter, GDP plunged 6.3 percent-the largest quarterly decline since 1982. During the first quarter of 2009, real GDP fell another 6.1 percent, reflecting steep declines in business and residential investment (the latter for the $13^{\text {th }}$ straight quarter) as well as a sharp drop in inventory investment. Although government spending also fell, consumer spending and net exports both rose.

Growth of consumer spending-which accounts for about 70 percent of GDP-began to slow in the spring of 2007. Over 2008, consumption fell 1.3 percent, the largest fourquarter drop since 1974. Personal consumption expenditures rose 2.2 percent in the first quarter of 2009 , however, recovering from the fourth quarter's 4.3 percent drop.

## Growth of Real GDP

(Quarterly percent change at annual rate)

Residential investment-mostly residential homebuildingaccounts for only about 3-1/2 percent of GDP, but the ongoing decline in this sector has been a significant drag on real GDP growth since early 2006. In the first quarter of 2009, residential investment plunged 38.0 percent, the 13th straight quarterly decline and the largest since the housing correction began 3 years ago. Residential investment subtracted 1.4 percentage points from real GDP growth, a bit more than the 0.9 percentage point average reduction during the previous 12 quarters. Despite the first quarter's particularly steep decline, there have been some modest signs of stabilization. Single-family starts have been roughly stable for the past 3 months, and in both February and March, exceeded permits. However, sales of new and existing single-family homes declined in March. The inventory of unsold homes continued to shrink in March but remained at a historically high level relative to the current sales pace.

House prices continued to fall on a year-over-year basis, but one measure has registered monthly gains recently. According to the Federal Housing Financing Authority (FHFA), prices for purchased homes rose by 0.7 percent in February, extending a 1.0 percent increase in January. This measure has not risen for 2 straight months since early 2007. Even so, the FHFA home price index was 6.5 percent lower than a year ago. Other measures, such as the S\&P/CaseShiller indexes, indicate that home prices continue to fall in most major U.S. cities. The Case-Shiller 20-city index is down 18.6 percent over the year through February, and is 31 percent below its mid-2006 peak.

Business activity outside of homebuilding slowed in 2008 and in the first quarter of 2009. Nonresidential fixed investment-about 10 percent of GDP-declined by 5.2 percent in 2008. After declining by 22.8 percent in the final quarter of 2008, business investment plunged by 37.9 percent at an annual rate in the first quarter-the largest decline on record. Outlays for equipment and software tumbled by 33.8 percent, the most since the late 1950 s, while spending on structures fell by a record 44.2 percent. Altogether, the drop in business investment subtracted 4.7 percentage points from real GDP growth in the first quarter.

Export growth had been a key driver of growth in 2007 and most of 2008, but in the final quarter of 2008, the contribution declined significantly. Exports account for about 12 percent of GDP, while imports, which are subtracted from GDP, account for about 17 percent. Real exports fell 30 percent in the first quarter of 2009, year-overyear, after declining about 24 percent in the fourth quarter of 2008-a sharp contrast with increases averaging nearly 7 percent in the first three quarters of last year. Real imports declined 34 percent in the first quarter of 2009, the sixth consecutive quarterly decline and the largest since early 1975. As a result, net exports contributed 2.0 percentage points to first quarter growth in real GDP, in line with the boosts of roughly 1 to 3 percent in the first three quarters of 2009.

Public sector purchases-which account for roughly 20 percent of GDP-fell 3.9 percent at an annual rate in the first quarter, subtracting 2.1 percentage points from real GDP growth and constituting the first decline in government purchases since the final quarter of 2005 . Federal spending declined 4.0 percent in the first quarter, a sharp contrast with the 8.3 percent average increase in the previous four quarters. State and local government finances deteriorated
sharply, with expenditures plunging 6.4 percent in the first quarter of 2009, following average increases of 9 percent in the previous four quarters.

## Labor Markets

Labor market conditions deteriorated throughout 2008 and the deterioration worsened in early 2009. Since the recession began in December 2007, a total of 5.7 million jobs have been lost through April, including over 2.7 million jobs during the first 4 months of this year alone. On a percentage basis, the 16 -month decline is the largest since 1950. Nonfarm payrolls fell by an average of 158,000 per month during the first three quarters of 2008, then dropped by an average of 553,000 per month in the final quarter and by an average of more than 700,000 per month during the first quarter of 2009. Payroll employment fell by 539,000 in April 2009. The unemployment rate has trended higher, with particularly steep increases over the past few months: unemployment jumped to 8.9 percent in April 2009, the highest rate since September 1983, and was 4.5 percentage points above the March 2007 low of 4.4 percent. A measure of unemployment that includes workers who are underemployed and those who are only marginally attached to the labor force rose to 15.8 percent in April 2009-up from 8.7 percent in December 2007, and a record high for this indicator, which dates to 1994.

Job losses have been spread broadly across most sectors. Since the start of the recession, manufacturing payrolls have declined by 1.6 million, and construction payrolls have declined by 1.2 million. However, a few sectors have continued to see job growth, including health care and education, which together added nearly 590,000 jobs to payrolls between December 2007 and April 2009.

## Payroll Employment

(Average monthly change in thousands
from end of quarter to end of quarter)

## Inflation

Rising food prices and the energy price surge through the middle of last year boosted headline inflation, which peaked at 5.6 percent in the 12 months through July 2008 and has since retreated sharply, largely due to the reversal in the energy price run-up but also to the significant slowing in consumer and business spending. Headline consumer prices fell 0.7 percent in the year ending April 2009, plummeting from the 3.9 percent year-earlier pace and representing the second consecutive 12-month decline. Prior to March, it had been over 50 years since a 12-month decline in the CPI had been recorded. For the 3 months ending in April 2009, headline consumer prices were up at an annual rate of 0.9 percent. Core consumer prices (excluding food and energy) rose by 1.9 in the year through April 2009, well below the year-earlier pace of 2.3 percent and still close to 2004 lows. In the 3 months ending in April 2009, core prices increased 2.5 percent.

Energy prices reached record highs in mid-summer 2008, but have fallen sharply since then. The retail price of regular gasoline-which hit a record of $\$ 4.11$ per gallon in early July 2008 -stood at $\$ 2.24$ per gallon in the week ended May 11roughly 40 percent lower than a year ago. The front-month futures price for West Texas Intermediate (WTI) crude oil traded to a record $\$ 147$ per barrel in mid-July 2008, but has since dropped by about $\$ 90$ to roughly $\$ 58$ per barrel in midMay. Compared with one year ago, oil prices are now about \$50 per barrel lower.

## Unemployment Rate <br> (Percent)

Food prices began rising much more rapidly in early 2007 and continued to accelerate in 2008, remaining above the overall inflation rate. Most recently, however, food prices edged down 0.1 percent in February as well as March and fell 0.2 percent in April. Consumer food prices rose by 3.3 percent in the 12 months through April, slower than the 5.1 percent pace of a year earlier and the slowest rate of increase since February 2007.

## Consumer Prices

(Percent change from a year earlier)

## Federal Budget

The federal budget deficit widened to $\$ 459$ billion in fiscal year 2008 ( 3.2 percent of GDP), following 3 years of improvement that had trimmed the deficit to $\$ 162$ billion (1.2 percent of GDP) in fiscal year 2007. Outlays grew by 9.3 percent in fiscal year 2008 compared with fiscal year 2007, and included stimulus payments associated with the Economic Stimulus Act of 2008. Weak economic growth weighed on receipts, which fell by 1.7 percent.

In fiscal year 2009, the budget deficit is projected to rise to $\$ 1.75$ trillion ( 12.3 percent of GDP). Expenditures are expected to grow by 32 percent, partly reflecting the Troubled Assets Relief Program (TARP) outlays and spending associated with the stimulus package enacted in mid-February. Receipts are projected to fall by 13 percent, due in part to falling employment and income and declining asset values. The deficit will narrow in subsequent years, averaging 3.1 percent of GDP from fiscal year 2012 to fiscal year 2019.

## Economic Policy

Key policy actions taken during the first quarter are setting the stage for recovery in the second half of the year. The ARRA puts $\$ 787$ billion toward stimulating domestic demand, and is expected to create or save an estimated 3.5 million jobs in a range of industries from clean energy to health care. By the end of 2010, the ARRA is expected to raise GDP by more than 3 percent.

In addition to the ARRA, the Treasury Department recently introduced several new initiatives to stabilize and strengthen our financial system under the umbrella of the Financial Stability Plan (FSP). The FSP includes the Capital Assistance Program (CAP), which is designed to ensure that major financial institutions have adequate capital to lend even in a worse-than-expected economic environment. The Public Private Investment Program (PPIP) will use private and government capital to purchase legacy assets in order to help jump-start the market for private real-estate-related assets that have been a core factor in the current financial crisis. In response to falling home prices, the Administration introduced the Making Home Affordable Plan to support lower mortgage rates and help millions of homeowners refinance and avoid foreclosure. Finally, as a mechanism to unlock frozen credit markets, the Consumer and Business Lending Initiative was created to restart activity in the secondary markets for securitized loans, lower borrowing costs, and restore the flow of credit. Together these efforts will help lay the foundations necessary for economic recovery and clear the credit conduits to support future growth.

## Financial Markets

Financial markets came under unprecedented stress last fall, but a wide range of measures have been taken as part of the Emergency Economic Stabilization Act (EESA) of 2008,
enacted in early October, as well as the ARRA. Credit market conditions have since improved, although some indicators still suggest that several important sectors remain challenged.

Partly in response to rising financial market stress, as well as, signs of more slowing in the broader economy, the Federal Reserve began easing monetary policy in August 2007, and has since cut the rate to a range of 0 percent to 0.25 percent set at the December 2008 Federal Open Market Committee (FOMC) meeting, which brought the target to its lowest level in history. The target range was maintained at the FOMC's most recent meeting in late April, when the Committee observed some slowing in the pace of economic contraction but also downside risks to inflation. The Federal Reserve has greatly expanded its tools to increase liquidity in credit markets and ease lending terms to sectors that need a temporary injection. These include a variety of facilities and funds directed at specific financial markets, including commercial paper and money market funds. Although these facilities were set to expire this spring, the Federal Reserve extended the programs through October 30, 2009. The expiration date of the Term Asset-Backed Securities Loan Facility (TALF) remains December 31, 2009, and other liquidity facilities, such as the Term Auction Facility (TAF) do not have a fixed expiration date. At the April meeting, the FOMC clarified that it will increase purchases of agency mortgage-backed securities by up to $\$ 1.25$ trillion by the end of 2009, and will purchase $\$ 300$ billion in longer-term Treasury securities by autumn.

Equity market indexes fell very sharply last year, and volatility rose to record levels. The Standard \& Poor's (S\&P) 500 index declined 38.5 percent last year, compared with a 3.5 percent gain in 2007. The loss was the largest since 1931, when an earlier version of the index (containing only 90 stocks) dropped 47 percent. In early May, however, the S\&P was about flat on the year, and since a 12-year low on March 9, the index has gained 34.5 percent. The S\&P stock market volatility index (VIX), often used as a measure of financial market uncertainty, surged to an all-time high of 80 percent in late October, after hovering in a range of 20 to 30 percent for most of 2008. The VIX has since retreated to about 35 percent as of early May.

Long-term Treasury interest rates have been buffeted by a variety of factors, including flight-to-quality flows in response to financial market pressures, as well as, concerns about the increase in supply that will be necessary to fund the Treasury's emergency support programs. After trading between 3.5 percent and 4.5 percent for most of 2008 , the yield dropped off sharply starting in mid-November, reaching 2.1 percent in late December. Since then, the $10-$ year note yield has trended higher, reaching 3.2 percent as of early May. The 3-month Treasury bill yield, by contrast, generally trended lower throughout 2008 under the relatively steady influence of safe-haven demand for short-term liquid assets. The yield reached an all-time low of slightly above zero by the end of December, but has risen since then to

about 0.2 percent as of early May. The 2-year to 10 -year Treasury yield spread, one measure of the steepness of the yield curve, has widened noticeably since mid-2007. A steepening yield curve may suggest rising uncertainty about long-term prospects.

Key interest rates on private securities have risen sharply relative to Treasury rates, reflecting an increase in financial risk and concerns by financial market participants about short-term liquidity difficulties facing a number of institutions. The spread between the 3-month London Interbank Offered Rate (LIBOR) and the 3-month Treasury bill rate (the TED spread, a measure of inter-bank liquidity and credit risk) had averaged less than 50 basis points before the crisis began to worsen in August 2007 rose to an all-time high of nearly 460 basis points in early October 2008. Improvements in short-term credit have narrowed the spread to about 85 basis points in early May. The spread between

Short-Term Interest Rate Spreads
(Percent)
the Baa corporate bond yield and the 10-year Treasury yield averaged 170 basis points through most of 2007, before the financial market turmoil emerged. It peaked at nearly 620 basis points last December and has narrowed since then to about 500 basis points in early May-still very high by historical standards.

Rates for conforming mortgages have trended lower in recent months, but jumbo mortgage rates have continued to rise. The interest rate for a 30 -year conforming fixed-rate mortgage has been trending lower since October of last year, and had fallen to about 4.8 percent as of late April. The jumbo-conforming spread had widened to 160 basis points by the end of last year, well up from the more typical 20 to 25 basis point spread seen prior to the onset of the housing and credit market problems. This spread has widened again to about 150 basis points as of early May.

## Foreign Trade and Exchange Rates

Although the U.S. trade balance (which measures trade in goods and services) and current account (which also includes investment income flows and unilateral transfers) remain in deficit, both deficits have narrowed appreciably in recent years, largely due to an improvement in the trade balance. The merchandise trade deficit reached $\$ 838$ billion in 2006, but declined to $\$ 819$ billion in 2007, and was $\$ 821$ billion in 2008. Last year's leveling off mainly reflected the lower value-and to a small extent, lower volume-of oil imports in the latter half of the year. The current account balance has been in deficit almost continuously since the early 1980s, and in 2006, reached a record $\$ 788$ billion, equivalent to 6.0 percent of GDP. In 2007, the deficit narrowed to $\$ 731$ billion, or 5.3 percent of GDP, and in 2008, the current account narrowed further to $\$ 673$ billion, equivalent to 4.7 percent of GDP.

The value of the U.S. dollar compared with the currencies of seven major trading partners (the euro area countries, Japan, Canada, the United Kingdom, Australia, Sweden, and Switzerland) has depreciated significantly from its peak in February 2002, but most recently, has begun to stabilize. Between February 2002 and January 2009, the exchange value of the dollar compared to an index of these currencies fell by about 15 percent. Between April 2007 and April 2009, however, the dollar appreciated by 4.0 percent against these currencies. Over the longer timeframe, the dollar depreciated by 26 percent against the yen, and by 34 percent against the euro, but over the past 2 years, the dollar has depreciated by about 17 percent against the yen and has appreciated by roughly 2.5 percent against the euro. The dollar has also appreciated against an index of currencies of 19 other important trading partners (including China, India, and Mexico). Between February 2002 and January 2009, the dollar appreciated by about 0.5 percent against this basket of currencies, and over the past 2 years, firmed by nearly 5.5 percent.

## INTRODUCTION: Federal Fiscal Operations

Budget authority usually takes the form of appropriations that allow obligations to be incurred and payments to be made. Reappropriations are Congressional actions that extend the availability of unobligated amounts that have expired or would otherwise expire. These are counted as new budget authority in the fiscal year of the legislation in which the reappropriation act is included, regardless of when the amounts were originally appropriated or when they would otherwise lapse.

Obligations generally are liquidated by the issuance of checks or the disbursement of cash-outlays. Obligations may also be liquidated (and outlays recorded) by the accrual of interest on public issues of Treasury debt securities (including an increase in redemption value of bonds outstanding); or by the issuance of bonds, debentures, notes, monetary credits, or electronic payments.

Refunds of collections generally are treated as reductions of collections, whereas payments for earned-income tax credits in excess of tax liabilities are treated as outlays. Outlays during a fiscal year may be for payment of obligations incurred in prior years or in the same year. Outlays, therefore, flow in part from unexpended balances of prior year budget authority and from budget authority provided for the year in which the money is spent. Total outlays include both budget and off-budget outlays and are stated net of offsetting collections.

Receipts are reported in the tables as either budget receipts or offsetting collections. They are collections from the public, excluding receipts offset against outlays. These, also called governmental receipts, consist mainly of tax receipts (including social insurance taxes), receipts from court fines, certain licenses, and deposits of earnings by the Federal Reserve system. Refunds of receipts are treated as deductions from gross receipts. Total Government receipts are compared with total outlays in calculating the budget surplus or deficit.

Offsetting collections from other Government accounts or the public are of a business-type or market-oriented nature. They are classified as either collections credited to appropriations or fund accounts, or offsetting receipts (i.e., amounts deposited in receipt accounts). The former normally can be used without an appropriation act by Congress. These occur in two instances: (1) when authorized by law, amounts collected for materials or services are treated as reimbursements to appropriations. For accounting purposes, earned reimbursements are also known as revenues. These offsetting collections are netted against gross outlays in determining net outlays from such appropriations; and (2) in the three types of revolving funds (public enterprise, intragovernmental, and trust); offsetting collections are netted against spending, and outlays are reported as the net amount.

Offsetting receipts in receipt accounts cannot be used without appropriation. They are subdivided into three categories: (1) proprietary receipts, or collections from the public, offset against outlays by agency and by function; (2) intragovernmental transactions, or payments into receipt accounts from governmental appropriation or fund accounts. They finance operations within and between Government agencies and are credited with collections from other Government accounts; and (3) offsetting governmental receipts that include foreign cash contributions.

Intrabudgetary transactions are subdivided into three categories: (1) interfund transactions-payments are from one fund group (either Federal funds or trust funds) to a receipt account in the other fund group; (2) Federal intrafund transactions-payments and receipts both occur within the Federal fund group; and (3) trust intrafund transactionspayments and receipts both occur within the trust fund group.

Offsetting receipts are generally deducted from budget authority and outlays by function, subfunction, or agency. There are four types of receipts, however, that are deducted from budget totals as undistributed offsetting receipts. They are: (1) agencies’ payments (including payments by offbudget Federal entities) as employers into employees' retirement funds; (2) interest received by trust funds; (3) rents and royalties on the Outer Continental Shelf lands; and (4) other interest (i.e., that collected on Outer Continental Shelf money in deposit funds when such money is transferred into the budget).

The Government has used the unified budget concept set forth in the "Report of the President's Commission on Budget Concepts" as a foundation for its budgetary analysis and presentation since 1969. The concept calls for the budget to include all of the Government's fiscal transactions with the public. Since 1971, however, various laws have been enacted removing several Federal entities from (or creating them outside of) the budget. Other laws have moved certain off-budget Federal entities onto the budget. Under current law, the off-budget Federal entities consist of the two Social Security trust funds, Federal Old-Age and Survivors Insurance and the Federal Disability Insurance Trust Fund, and the Postal Service.

Although an off-budget Federal entity's receipts, outlays, and surplus or deficit ordinarily are not subject to targets set by the Congressional resolution, the Balanced Budget and Emergency Deficit Control Act of 1985 [commonly known as the Gramm-Rudman-Hollings Act as amended by the Budget Enforcement Act of 1990 (2 United States Code 900922)] included off-budget surplus or deficit in calculating deficit targets under that act and in calculating excess deficit. Partly for this reason, attention has focused on both on- and off-budget receipts, outlays and deficit of the Government.

Tables FFO-1, FFO-2, and FFO-3 are published quarterly and cover 5 years of data, estimates for 2 years, detail for 13 months, and fiscal year-to-date data. They provide a summary of data relating to Federal fiscal operations reported by Federal entities and disbursing officers, and daily reports from the FRBs. They also detail accounting transactions affecting receipts and outlays of the Government and off-budget Federal entities and their related effect on assets and liabilities of the Government. Data are derived from the "Monthly Treasury Statement of Receipts and Outlays of the United States Government."

- Table FFO-1 summarizes the amount of total receipts, outlays, and surplus or deficit, as well as transactions in Federal securities, monetary assets, and balances in Treasury operating cash.
- Table FFO-2 includes on- and off-budget receipts by source. Amounts represent income taxes, social insurance taxes, net contributions for other insurance and retirement, excise taxes, estate and gift taxes, customs duties, and net miscellaneous receipts.
- Table FFO-3 details on- and off-budget outlays by agency.
- Table FFO-4 summarizes on- and off-budget receipts by source and outlays by function as reported to each major fund group classification for the current fiscal year to date and prior fiscal year to date.
- Table FFO-5 summarizes internal revenue receipts by states and by type of tax. Amounts reported are collections made in a fiscal year. They span several tax liability years because they consist of prepayments (estimated tax payments and taxes withheld by employers for individual income and Social Security taxes), payments made with tax returns and subsequent payments made after tax returns are due or are filed (that is, payments with delinquent returns or on delinquent accounts).

Amounts are reported based on the primary filing address provided by each taxpayer or reporting entity. For multistate corporations, the address may reflect only the district where such a corporation reported its taxes from a principal office rather than other districts where income was earned or where individual income and Social Security taxes were withheld. In addition, an individual may reside in one district and work in another.

- Table FFO-6 includes customs collection of duties, taxes, and fees by districts and ports.

# Budget Results and Financing of the U.S. Government and Second-Quarter Receipts by Source 

## Second-Quarter Receipts

The following capsule analysis of budget receipts, by source, for the second quarter of fiscal year 2009 supplements fiscal data reported in the March issue of the "Treasury Bulletin." At the time of that issue's release, not enough data were available to analyze adequately collections for the quarter.

Individual income taxes-Individual income tax receipts, net of refunds, were $\$ 174.4$ billion for the second quarter of fiscal year 2009. This is a decrease of $\$ 55.5$ billion over the comparable prior year quarter. Withheld receipts decreased by $\$ 30.6$ billion and non-withheld receipts decreased by $\$ 12.6$ billion during this period. Refunds increased by $\$ 12.3$ billion over the comparable fiscal year 2008 quarter. There was a decrease of $\$ 1.4$ billion in accounting adjustments between individual income tax receipts and the Social Security and Medicare trust funds over the comparable quarter in fiscal year 2008.

Corporate income taxes-Net corporate income tax receipts were $\$ 5.9$ billion for the second quarter of fiscal year 2009. This is a decrease of $\$ 31.1$ billion compared to
the prior year second quarter. The $\$ 31.1$ billion change is comprised of a decrease of $\$ 16.8$ billion in estimated and final payments, and an increase of $\$ 14.2$ billion in corporate refunds.

Employment taxes and contributions-Employment taxes and contributions receipts for the second quarter of fiscal year 2009 were $\$ 224.2$ billion, an increase of $\$ 0.1$ billion over the comparable prior year quarter. Receipts to the Federal Old-Age and Survivors Insurance, Federal Disability Insurance, and Federal Hospital Insurance trust funds changed by $\$ 0.9$ billion, $\$ 0.2$ billion, and $-\$ 1.0$ billion respectively. There was a $\$ 2.0$ billion accounting adjustment for prior years’ employment tax liabilities made in the second quarter of fiscal year 2009, while there was a $\$ 0.6$ billion adjustment in the second quarter of fiscal year 2008.

Unemployment insurance-Unemployment insurance receipts, net of refunds, for the second quarter of fiscal year 2009 were $\$ 4.8$ billion, a decrease of $\$ 0.6$ billion over the comparable quarter of fiscal year 2008. Net State taxes deposited in the U.S. Treasury decreased by $\$ 0.5$ billion to $\$ 3.6$ billion. Net Federal Unemployment Tax Act taxes decreased by $\$ 0.1$ billion to $\$ 1.2$ billion.

## Budget Results and Financing of the U.S. Government and Second-Quarter Receipts by Source, con.

Contributions for other insurance and retirementContributions for other retirement were $\$ 1.0$ billion for the second quarter of fiscal year 2009. This was a negligible change from the comparable quarter of fiscal year 2008.

Excise taxes-Net excise tax receipts for the second quarter of fiscal year 2009 were $\$ 14.3$ billion, a decrease of $\$ 1.2$ billion over the comparable prior year quarter. Total excise tax refunds for the quarter were $\$ 0.8$ billion, an increase of $\$ 0.1$ billion over the comparable prior year quarter.

Estate and gift taxes-Net estate and gift tax receipts were $\$ 5.5$ billion for the second quarter of fiscal year 2009.

These receipts represent a decrease of $\$ 1.0$ billion over the same quarter in fiscal year 2008.

Customs duties-Customs duties net of refunds were $\$ 5.3$ billion for the second quarter of fiscal year 2009. This is a decrease of $\$ 1.2$ billion over the comparable prior year quarter.

Miscellaneous receipts—Net miscellaneous receipts for the second quarter of fiscal year 2009 were $\$ 7.0$ billion, a decrease of $\$ 6.8$ billion over the comparable prior year quarter. This change is due in part to deposits of earnings by Federal Reserve banks decreasing by $\$ 7.8$ billion.

## INTRODUCTION: Source and Availability of the Balance in the Account of the U.S. Treasury

The Department of the Treasury's (Treasury's) operating cash is maintained in accounts with the Federal Reserve banks (FRBs) and branches, as well as in tax and loan accounts in other financial institutions. Major information sources include FRBs, Treasury Regional Financial Centers, Internal Revenue Service Centers, Bureau of the Public Debt, and various electronic systems. As the FRB accounts are depleted, funds are called in (withdrawn) from thousands of tax and loan accounts at financial institutions throughout the country.

Under authority of Public Law 95-147 (codified at 31 United States Code 323), Treasury implemented a program on November 2, 1978, to invest a portion of its operating cash in obligations of depositaries maintaining tax and loan accounts. Under the Treasury tax and loan (TT\&L) investment program, depositary financial institutions select the manner in which they will participate. Financial institutions wishing to retain funds deposited into their tax
and loan accounts in interest-bearing obligations can participate. The program permits Treasury to collect funds through financial institutions and to leave the funds in TT\&L depositaries and in the financial communities in which they arise until Treasury needs the funds for its operations. In this way, Treasury is able to neutralize the effect of its fluctuating operations on TT\&L financial institution reserves and on the economy. Likewise, those institutions wishing to remit the funds to the Treasury account at FRBs do so as collector depositaries.

Deposits to tax and loan accounts occur as customers of financial institutions deposit tax payments that the financial institutions use to purchase Government securities. In most cases, this involves a transfer of funds from a customer's account to the tax and loan account in the same financial institution. Also, Treasury can direct the FRBs to invest excess funds in tax and loan accounts directly from the Treasury account at the FRBs.

[^5][^6]
## INTRODUCTION: Federal Debt

Treasury securities (i.e., public debt securities) comprise most of the Federal debt, with securities issued by other Federal agencies accounting for the rest. Tables in this section of the "Treasury Bulletin" reflect the total. Further detailed information is published in the "Monthly Statement of the Public Debt of the United States." Likewise, information on agency securities and on investments of Federal Government accounts in Federal securities is published in the "Monthly Treasury Statement of Receipts and Outlays of the United States Government."

Treasury's Financial Management Service (FMS) compiles data in the "Treasury Bulletin" tables FD-2 and FD-6 from the "Monthly Statement of the Public Debt of the United States."

- Table FD-1 summarizes the Federal debt by listing public debt and agency securities held by the public, including the Federal Reserve. It also includes debt held by Federal agencies, largely by the Social Security and other Federal retirement trust funds. The net unamortized premium and discount also are listed by total Federal securities, securities held by Government accounts and securities held by the public. The difference between the outstanding face value of the Federal debt and the net unamortized premium and discount is classified as the accrual amount. (For greater detail on holdings of Federal securities by particular classes of investors, see the ownership tables, OFS-1 and OFS-2.)
- Table FD-2 categorizes by type, that is, marketable and nonmarketable, the total public debt securities outstanding that are held by the public.
- In table FD-3, nonmarketable Treasury securities held by U.S. Government accounts are summarized by issues to particular funds within Government. Many of the funds invest in par value special series nonmarketables at interest rates determined by law. Others invest in marketbased special Treasury securities whose terms mirror those of marketable securities.
- Table FD-4 presents interest-bearing securities issued by Government agencies. Federal agency borrowing
has declined in recent years, in part because the Federal Financing Bank has provided financing to other Federal agencies. (Federal agency borrowing from Treasury is presented in the "Monthly Treasury Statement of Receipts and Outlays of the United States Government.")
- Table FD-5 illustrates the average length of marketable interest-bearing public debt held by private investors and the maturity distribution of that debt.

In March 1971, Congress enacted a limited exception to the amount of bonds with rates greater than 4-1/4 percent that could be held by the public. This permitted Treasury to offer securities maturing in more than 7 years at current market interest rates for the first time since 1965. In March 1976, the definition of a bond was changed to include those securities longer than 10 years to maturity. This exception has expanded since 1971, authorizing Treasury to continue to issue long-term securities. The ceiling on Treasury bonds was repealed on November 10, 1988.

The volume of privately held Treasury marketable securities by maturity class reflects the remaining period to maturity of Treasury bills, notes and bonds. The average length is comprised of an average of remaining periods to maturity, weighted by the amount of each security held by private investors. In other words, computations of average length exclude Government accounts and the FRBs.

- In table FD-6, the debt ceiling is compared with the outstanding debt subject to limitation by law. The other debt category includes Federal debt Congress has designated as being subject to the debt ceiling.
- Table FD-7 details Treasury holdings of securities issued by Government corporations and other agencies. Certain Federal agencies are authorized to borrow money from the Treasury, largely to finance direct loan programs. In addition, agencies such as the Bonneville Power Administration are authorized to borrow from the Treasury to finance capital projects. Treasury, in turn, finances these loans by selling Treasury securities to the public.

## INTRODUCTION: Public Debt Operations

Chapter 31 of Title 31 of the United States Code allows the Secretary of Treasury to borrow money by issuing Treasury securities. The Secretary determines the terms and conditions of issue, conversion, maturity, payment, and interest rate. New issues of Treasury notes mature in 2 to 10 years. Bonds mature in more than 10 years from the issue date. Each outstanding marketable security is listed in the "Monthly Statement of the Public Debt of the United States." The information in this section of the "Treasury Bulletin" pertains only to marketable Treasury securities.

- Table PDO-1 presents the results of weekly auctions of $4-$, 13 -, and 26 -week bills. Treasury bills mature each Thursday. Issues of 4 - and 13 -week bills are reopenings of 26-week bills. High yields on accepted tenders and the dollar value of total bids are presented, with the dollar value of awards made on both competitive and noncompetitive bases.

To encourage the participation of individuals and smaller institutions, Treasury accepts noncompetitive tenders of up to $\$ 5$ million for bills and $\$ 5$ million for notes and bonds in each auction of securities.

- Table PDO-2 lists the results of auctions of marketable securities, other than weekly bills, in
chronological order over the past 2 years. Issues of cash management bills also are presented.

Note: Additional information, including maturity schedules of interest-bearing marketable public debt securities other than regular weekly and 52-week Treasury bills outstanding, can now be found on the Bureau of Public Debt's website at http://www.treasurydirect.gov/govt/ reports/pd/pd_ pdotables_downloadable_files.htm.

Note: On April 30, 2008, Treasury announced the reintroduction of the 52-week bill. The first auction of this security took place on June 3, 2008.

Note: Cash managements bills that are identified below are issued as part of the Supplementary Financing Program (SFP). For more details about the SFP, visit www.treasury.gov/ press/releases/hp1144.htm or call 202-622-2960.

Note: On February 4, 2009, Treasury announced the reintroduction of the 7-year note. The first auction of this security took place on February 26, 2009.

## TREASURY FINANCING: JANUARY-MARCH

[Source: Bureau of the Public Debt, Office of Financing]

## J A N U ARY

## Cash Management Bills

On December 29, 2008, Treasury announced it would auction $\$ 35,000$ million of 62 -day bills. They were issued January 2, 2009 and matured March 5. The issue was part of the Supplementary Financing Program (SFP). Treasury auctioned the bills on December 30, 2008. Tenders totaled $\$ 82,618$ million; Treasury accepted $\$ 35,000$ million. The high bank discount rate was 0.140 percent.

On January 5, 2009, Treasury announced it would auction $\$ 35,000$ million of 70 -day bills. They were issued January 8 and matured March 19. The issue part of the SFP. Treasury auctioned the bills on January 7. Tenders totaled \$124,431 million; Treasury accepted $\$ 35,000$ million. The high bank discount rate was 0.100 percent.

On January 12, Treasury announced it would auction $\$ 30,000$ million of 56-day bills. They were issued January 15 and matured March 12. The issue was part of the SFP. Treasury auctioned the bills on January 14. Tenders totaled $\$ 96,214$ million; Treasury accepted $\$ 30,000$ million. The high bank discount rate was 0.085 percent.

On January 15, Treasury announced it would auction $\$ 35,000$ million of 70-day bills. They were issued January 22 and will mature April 2. The issue was part of the SFP. Treasury auctioned the bills on January 21. Tenders totaled $\$ 92,744$ million; Treasury accepted $\$ 35,000$ million. The high bank discount rate was 0.100 percent.

On January 26, Treasury announced it would auction $\$ 35,000$ million of 70-day bills. They were issued January 29 and matured April 9. The issue was part of the SFP. Treasury auctioned the bills on January 28. Tenders totaled $\$ 87,057$ million; Treasury accepted $\$ 35,001$ million. The high bank discount rate was 0.200 percent.

## 52-Week Bills

On January 8, 2009, Treasury announced it would auction $\$ 22,000$ million of 364-day Treasury bills. They were issued January 15 and will mature January 14, 2010. The issue was to refund $\$ 129,037$ million of all maturing bills and pay down approximately $\$ 37$ million. Treasury auctioned the bills on January 13. Tenders totaled $\$ 67,109$ million; Treasury accepted $\$ 22,000$ million. That included $\$ 164$ million of noncompetitive tenders from the public. The high bank discount rate was 0.430 percent.

## TREASURY FINANCING: JANUARY-MARCH, con.

## Auction of 3-Year Notes

On January 5, 2009, Treasury announced it would auction $\$ 30,000$ million of 3 -year notes of Series U-2012. The issue was to refund $\$ 32,351$ million of securities maturing January 15 and to raise new cash of approximately $\$ 21,649$ million.

The notes of Series U-2012 were dated and issued January 15. They are due January 15, 2012, with interest payable on July 15 and January 15 until maturity. Treasury set an interest rate of $1-1 / 8$ percent after determining which tenders were accepted on a yield auction basis.

Treasury received tenders for the notes before 12:00 noon e.t. for noncompetitive tenders and before 1:00 p.m. e.t. for competitive tenders on January 7. Tenders totaled \$66,280 million; Treasury accepted $\$ 30,000$ million. All noncompetitive and successful competitive bidders were allotted securities at the high yield of 1.200 percent with the equivalent price of $\$ 99.779650$. Treasury accepted in full all competitive tenders at yields lower than 1.200 percent. Tenders at the high yield were allotted 47.24 percent. The median yield was 1.120 percent, and the low yield was 1.000 percent. Noncompetitive tenders totaled $\$ 35$ million. Competitive tenders accepted from private investors totaled \$29,965 million.

In addition to the $\$ 30,000$ million of tenders accepted in the auction process, Treasury accepted $\$ 2,484$ million from Federal Reserve banks (FRBs) for their own accounts. The minimum par amount required for Separate Trading of Registered Interest and Principal Securities (STRIPS) of notes of Series U-2012 is $\$ 100$.

## Auction of 9-Year 10-Month 3-3/4 Percent Notes

On January 5, 2009, Treasury announced that it would auction $\$ 16,000$ million of 9 -year 10 -month $3-3 / 4$ percent notes of Series F-2018. The issue was to refund $\$ 32,351$ million of securities maturing January 15 and to raise new cash of approximately $\$ 21,649$ million.

The notes of Series F-2018 were dated November 15, 2008 and issued January 15, 2009. They are due November 15, 2018, with interest payable on May 15 and November 15 until maturity.

Treasury received tenders for the notes before 12:00 noon e.t. for noncompetitive tenders and before 1:00 p.m. e.t. for competitive tenders on January 8. Tenders totaled \$41,400 million; Treasury accepted $\$ 16,000$ million. All noncompetitive and successful competitive bidders were allotted securities at the high yield of 2.419 percent with an equivalent price of $\$ 111.579767$. Treasury accepted in full all competitive tenders at yields lower than 2.419 percent. Tenders at the high yield were allotted 73.60 percent. The median yield was 2.349 percent, and the low yield was 1.990 percent. Noncompetitive tenders totaled $\$ 7$ million. Competitive tenders accepted from private investors totaled
$\$ 15,993$ million. Accrued interest of $\$ 6.31906$ per $\$ 1,000$ must be paid for the period from November 15 to January 15.

In addition to the $\$ 16,000$ million of tenders accepted in the auction process, Treasury accepted $\$ 1,325$ million from FRBs for their own accounts. The minimum par amount required for STRIPS of notes of Series F-2018 is \$100.

## Auction of 10-Year Treasury Inflation Protected Security (TIPS)

On December 31, 2008, Treasury announced it would auction $\$ 8,000$ million of 10 -year TIPS. The issue was to refund $\$ 32,351$ million of securities maturing January 15 and to raise new cash of approximately $\$ 21,649$ million.

The 10-year TIPS of Series A-2019 were dated and issued January 15. They are due January 15, 2019, with interest payable on July 15 and January 15 until maturity. Treasury set an interest rate of 2-1/8 percent after determining which tenders were accepted on a yield auction basis.

Treasury received tenders for the TIPS before 12:00 noon e.t. for noncompetitive tenders and before 1:00 p.m. e.t. for competitive tenders on January 6. Tenders totaled \$19,834 million; Treasury accepted $\$ 8,000$ million. All noncompetitive and successful competitive bidders were allotted securities at the high yield of 2.245 percent with an equivalent adjusted price of $\$ 98.930505$. Treasury accepted in full all competitive tenders at yields lower than 2.245. Tenders at the high yield were allotted 64.99 percent. The median yield was 2.199 percent, and the low yield was 1.500 percent. Noncompetitive tenders totaled $\$ 261$ million. Competitive tenders accepted from private investors totaled \$7,739 million.

In addition to the $\$ 8,000$ million of tenders accepted in the auction process, Treasury accepted $\$ 662$ million from FRBs for their own accounts. The minimum par amount required for STRIPS of TIPS of Series A-2019 is $\$ 100$.

## Auction of 20-Year TIPS

On January 22, 2009, Treasury announced it would auction $\$ 8,000$ million of 20-year TIPS to raise new cash.

The 20-year TIPS of January 2029 were dated January 15 and issued January 30. They are due January 15, 2029, with interest payable on July 15 and January 15 until maturity. Treasury set an interest rate of 2-1/2 percent after determining which tenders were accepted on a yield auction basis.

Treasury received tenders for the TIPS before 12 noon e.t. for noncompetitive tenders and before 1:00 p.m. e.t. for competitive tenders on January 26. Tenders totaled \$15,328 million; Treasury accepted $\$ 8,000$ million. All noncompetitive and successful competitive bidders were allotted securities at the high yield of 2.500 percent with an equivalent adjusted price of $\$ 99.063837$. Treasury accepted in full all competitive tenders at yields lower than 2.500. Tenders at the high yield were allotted 56.67 percent. The median yield

## TREASURY FINANCING: JANUARY-MARCH, con.

was 2.310 percent, and the low yield was 0.990 percent. Noncompetitive tenders totaled $\$ 161$ million. Competitive tenders accepted from private investors totaled \$7,839 million. Adjusted accrued interest of $\$ 1.02622$ per $\$ 1,000$ must be paid for the period from January 15 to January 30. Both the unadjusted price of $\$ 99.998826$ and the unadjusted accrued interest of $\$ 1.03591$ were adjusted by an index ratio of 0.99065 , for the period from January 15 to January 30. The minimum par amount required for STRIPS of TIPS of January 2029 is $\$ 100$.

## FEBRUARY

## Cash Management Bills

On February 2, 2009, Treasury announced it would auction $\$ 30,000$ million of 49-day bills. They were issued February 5 and matured March 26. The issue was part of the SFP. Treasury auctioned the bills on February 4. Tenders totaled $\$ 93,474$ million; Treasury accepted $\$ 30,000$ million. The high bank discount rate was 0.290 percent.

On February 17, Treasury announced it would auction $\$ 35,000$ million of 272-day bills. They were issued February 20 and will mature November 19, 2009. This issue was to raise new cash. Treasury auctioned the bills on February 19. Tenders totaled $\$ 86,266$ million; Treasury accepted $\$ 35,000$ million. The high bank discount rate was 0.645 percent.

On February 23, Treasury announced it would auction $\$ 40,000$ million of 294-day bills. They were issued February 26 and will mature December 17, 2009. The issue was to raise new cash. Treasury auctioned the bills on February 25. Tenders totaled $\$ 100,215$ million; Treasury accepted \$40,000 million. The high bank discount rate was 0.705 percent.

## Auction of 2-Year Notes

| ${ }^{1}$ Currently, all issues are sold at auction. For bill issues, the rate shown is the high bank discount rate. For note and bond issues, the rate shown is the interest rate. For details of bill offerings, see table PDO-2. As of October 1, 1997, all Treasury issues of notes and bonds are eligible for STRIPS. <br> ${ }^{2}$ From date of additional issue in case of a reopening. <br> ${ }^{3}$ In reopenings, the amount accepted is in addition to the amount of original offerings. |  |  |  | ${ }^{4}$ Includes securities issued to the Federal Reserve System; and to foreign and international monetary authorities, whether in exchange for maturing securities or for new cash. |  |  |  |

## INTRODUCTION: Ownership of Federal Securities

Federal securities presented in the following tables are public debt securities such as savings bonds, bills, notes, and bonds that the Treasury issues. The tables also detail debt issued by other Federal agencies under special financing authorities. [See the Federal debt (FD) tables for a more complete description of the Federal debt.]

Effective January 1, 2001, Treasury's Bureau of the Public Debt revised formats, titles, and column headings in the "Monthly Statement of the Public Debt of the United States," Table I: Summary of Treasury Securities Outstanding and Table II: Statutory Debt Limit. These changes should reduce confusion and bring the publication more in line with the public's use of terms.

Treasury's Financial Management Service (FMS) compiles data in the "Treasury Bulletin" table OFS-1 from the "Monthly Statement of the Public Debt of the United States." Effective June 2001, FMS revised procedures and categories in this table to agree with the Bureau of the Public Debt's publication changes.

- Table OFS-1 presents Treasury marketable and nonmarketable securities and debt issued by other Federal agencies held by Government accounts, the FRBs, and private investors. Social Security and Federal retirement trust fund investments comprise much of the Government account holdings.

The FRBs acquire Treasury securities in the market as a means of executing monetary policy.

- Table OFS-2 presents the estimated ownership of U.S. Treasury securities. Information is primarily obtained from the Federal Reserve Board of Governors Flow of Funds data, Table L209. State, local, and foreign holdings include special issues of nonmarketable securities to municipal entities and foreign official accounts. They also include municipal, foreign official, and private holdings of marketable Treasury securities. (See footnotes to the table for description of investor categories.)

${ }^{5}$ Source: "Monthly Statement of the Public Debt of the United States." Current
accrual value.
${ }^{6}$ Includes U.S. Treasury securities held by the Federal Employees Retirement System Thrift Savings Plan "G Fund."
${ }^{7}$ Includes money market mutual funds, mutual funds, and closed-end investment
companies.
${ }^{8}$ Source: Federal Reserve Board Treasury International Capital Survey. Includes nonmarketable foreign series, Treasury securities, and Treasury deposit funds. Excludes Treasury securities held under repurchase agreements in custody accounts at the Federal Reserve Bank of New York. For additional information see:
http://www.treas.gov/tic/ticsec2.shtml.
${ }^{9}$ Includes individuals, Government-sponsored enterprises, brokers and dealers, bank
personal trusts and estates, corporate and non-corporate businesses, and other investors.

## INTRODUCTION: Market Yields

The table in this section presents yields on Treasury marketable securities for maturities ranging from 1 month to 30 years.

Table MY-1 lists Treasury market bid yields at constant maturities for bills, notes, and bonds. These Constant Maturity Treasury rates (CMTs) are interpolated from the Treasury yield curve and published daily at Treasury's Domestic Finance web site, www.ustreas.gov/offices/domestic-finance/debt-management/interest-rate/yield.shtml. The yield curve is fitted daily using a hermite cubic spline. For inputs, Treasury primarily uses the bid yields of the on-therun securities (most recently auctioned Treasury securities in all maturity tranches that Treasury currently auctions) as
quoted in the secondary bond market as of approximately 3:30 p.m. each trading day. CMT yields are based on semiannual interest payments and are read at constant maturity points to develop a consistent data series.

The quotations used by Treasury to calculate the bid yields and fit the yield curve are obtained by the Federal Reserve Bank of New York. The Board of Governors of the Federal Reserve System also publishes the Treasury constant maturity data series in its weekly Statistical Release H.15.

Treasury discontinued the 30-year constant maturity yield during the time period February 18, 2002, through February 8, 2006. Thus, 30-year yields for that time frame are not available.

# TABLE MY-1.-Treasury Market Bid Yields at Constant Maturities: Bills, Notes, and Bonds* 

| Period | 1-mo. <br> (1) | 3-mo. <br> (2) | 6-mo. (3) | 1-yr. <br> (4) | 2-yr. <br> (5) | 3-yr. <br> (6) | 5-yr. <br> (7) | 7-yr. <br> (8) | 10-yr. <br> (9) | $20-\mathrm{yr}$. <br> (10) | $30-\mathrm{yr}$. <br> (11) |

## INTRODUCTION: U.S. Currency and Coin Outstanding and in Circulation

The U.S. Currency and Coin Outstanding and in Circulation (USCC) statement informs the public of the total face value of currency and coin used as a medium of exchange that is in circulation at the end of a given accounting month. The statement defines the total amount of currency and coin outstanding and the portion deemed to be in circulation. It includes some old and current rare issues that do not circulate or that may do so to a limited extent. Treasury includes them in the statement because the issues were originally intended for general circulation.

The USCC statement provides a description of the various issues of paper money. It also gives an estimated average of currency and coin held by each individual, using estimates of population from the Bureau of the Census. USCC information has been published by Treasury since 1888, and was published separately until 1983, when it was incorporated into the "Treasury Bulletin." The USCC comes from monthly reports compiled by Treasury offices, U.S. Mint offices, the Federal Reserve banks (FRBs), and the Federal Reserve Board.

TABLE USCC-1.—Amounts Outstanding and in Circulation, March 31, 2009

## INTRODUCTION: International Financial Statistics

The tables in this section provide statistics on U.S. Government reserve assets, liabilities to foreigners, and its international financial position. All monetary figures are in dollars or dollar equivalents.

- Table IFS-1 shows reserve assets of the United States, including its gold stock, special drawing rights held in the Special Drawing Account in the International Monetary Fund (IMF), holdings of convertible foreign currencies and reserve position in the IMF.
- Table IFS-2 contains statistics on liabilities to foreign official institutions, and selected liabilities to all other foreigners, which are used in the U.S. balance of payments statistics.
- Table IFS-3 shows nonmarketable bonds and notes that the Treasury issues to official institutions and other residents of foreign countries.

[^15][^16]
## INTRODUCTION: Capital Movements

## Background

Data relating to U.S. international transactions in financial instruments and to other portfolio capital movements between the United States and foreign countries have been collected in some form since 1935. This information is necessary for compiling the U.S. balance of payments accounts, for calculating the U.S. international investment position, and for use in formulating U.S. international financial and monetary policies.

From the beginning, reporting under the Treasury data collection program has been mandatory. Under the current Treasury International Capital (TIC) reporting system, an assortment of monthly and quarterly reports are filed with district Federal Reserve banks by commercial banks, securities dealers, other financial institutions, and nonbanking enterprises in the United States. These data are centrally processed and maintained at the Federal Reserve Bank of New York, which, along with the district banks, acts as fiscal agent for Treasury. Beginning in late 1998, the Federal Reserve Board also undertakes services on behalf of Treasury in support of the TIC data collection system. The TIC reports of individual respondents are treated as confidential, and access to the respondent level data is strictly limited to specific staff of Treasury and the Federal Reserve System.

Data derived from Treasury reports are published in the Capital Movements section of this quarterly Treasury Bulletin and are posted monthly on the TIC website, http://www.ustreas.gov/tic. (See NOTE at the end of the INTRODUCTION text for additional website information.)TIC data aggregates are also published in the Federal Reserve Bulletin and are used in the U.S. international transactions and investment position compilations published by the Department of Commerce in the Survey of Current Business.

Forms and instructions are developed with the cooperation of other Government agencies and the Federal Reserve System and in consultation with representatives of banks, securities firms, and nonbanking enterprises. Requests for public comments on proposed changes are published in the Federal Register, and any further modifications are based on the comments received. The most recent revisions to selected reporting forms and instructions were effective June 30, 2006. The reporting forms and instructions may be downloaded from the TIC website. Copies of the reporting forms and instructions also may be obtained from the Global Economics Group, Office of the Assistant Secretary for International Affairs, Treasury, Washington, D.C. 20220; the International Finance Division, Board of Governors of the Federal Reserve System, Washington, D.C. 20551; or district Federal Reserve banks.

## Basic definitions

The term "foreigner" as used in TIC reporting covers all institutions and individuals resident outside the United States, including: U.S. citizens domiciled abroad; the foreign branches, subsidiaries and offices of U.S. banks and business concerns; the central governments, central banks, and other official institutions of foreign countries, wherever located; and international and regional organizations, wherever located. The term "foreigner" also includes persons in the United States to the extent that they are known by reporting institutions to be acting on behalf of foreigners.

In general, information is reported opposite the country or geographical area where the foreigner is located, as shown on records of reporting institutions. This information may not always reflect the ultimate ownership of assets. Reporting institutions are not required to go beyond addresses shown on their records and may not be aware of the actual country of domicile of the ultimate beneficiary.

Transactions with branches or agencies of foreign official institutions, wherever located, are reported opposite the country that has sovereignty over the institutions. Transactions with international and regional organizations are not reported opposite any single country, but are accounted for in regional groupings of such organizations. Effective beginning with data for June 2006, information pertaining to the Bank for International Settlements is now included with data forinternational organizations, and information for the European Central Bank is distributed across the individual euro-area countries. For prior dates, information for these organizations is included in "Other Europe".
"Short-term" refers to obligations payable on demand or having an original maturity of one year or less. "Long-term" refers to obligations having an original maturity of more than one year and includes securities having no maturity.

## Reporting coverage

TIC reports are required from banks and other depository institutions, bank/financial holding companies (BHCs/FHCs), securities brokers and dealers, and nonbanking concerns in the United States, including the branches, agencies, subsidiaries, and other affiliates in the United States of foreign banking and nonbanking firms. Institutions with total reportable liabilities, claims, or securities transactions below specified reporting thresholds are exempt from reporting.

Beginning in February 2003, substantial revisions to the coverage and formats of the TIC B-series and C-series forms were introduced. The reasons for the changes were to comply with new and expanded international standards for reporting data on portfolio investment; to reduce reporting burden; to clarify reporting concepts and instructions; and to improve the quality of the series by closing known gaps in the data.

Banks, other depository institutions, and securities brokers and dealers file monthly B-series reports covering their dollar liabilities to and dollar claims on foreigners in a number of countries. Quarterly reports are filed for liabilities and claims denominated in foreign currencies and for claims on foreigners held for respondents’ domestic customers. All positions are exclusive of long-term securities. Beginning January 2001, the exemption level applicable to the banking reports was raised from $\$ 15$ million to $\$ 50$ million. This exemption level is also subject to the provision that reportable amounts for any one country do not exceed $\$ 25$ million.

Banks and other depository institutions, securities brokers and dealers, and other entities report their transactions with foreigners by country in long-term securities on monthly Form S. Respondents must report securities transactions with foreigners if their aggregate purchases or their aggregate sales amount to at least \$50 million during the covered month.

TIC Form D is filed quarterly by all U.S. resident banks, securities dealers, and other firms with worldwide holding of derivatives in their own and in their customers' accounts exceeding $\$ 100$ billion in notional value. Data from this information collection was first released on May 15, 2007, with data on holdings beginning from end-December 2005, and data on net settlements beginning from the first quarter of 2006.

Quarterly reports are also filed by exporters, importers, industrial and commercial concerns, financial institutions (other than banks, other depository institutions, and securities firms), and other nonbanking enterprises on their liabilities and claims positions with unaffiliated foreigners. Separate reports are filed for financial balances and for commercial balances. Effective for reports filed as of March 31, 2003, the threshold applicable to Form CQ-1 for reporting financial liabilities to, and claims on, foreigners is $\$ 50$ million, up from $\$ 10$ million. At the same time, the reporting threshold for Form CQ-2, which covers commercial liabilities and claims positions with foreigners, was raised from $\$ 10$ million to $\$ 25$ million.

Effective with the reports filed for June 2006, the country coverage of the monthly TIC forms was expanded significantly and the semiannual reports, which covered the smaller market economies, were discontinued. Country coverage was also expanded for the quarterly banking forms, the Form S, the Form D, and the Forms CQ-1 and CQ-2, effective with reports filed for June 2006.

The data in these tables do not cover all types of reported capital movements between the United States and other countries. Except as noted in Section IV in "Description of statistics" below, the principal exclusions are the intercompany capital transactions of nonbanking business enterprises in the United States with their own branches and subsidiaries abroad or with their foreign parent companies (own foreign offices) and capital transactions of the U.S. Government. Consolidated data on all types of international
capital transactions are published by the Department of Commerce in its regular reports on the U.S. balance of payments.

## Description of statistics

Data collected on the TIC forms are published in the "Capital Movements" tables in four sections. Each section contains all the data relevant to the same statistical series, with tables showing time series by type and country, and detailed breakdowns of the latest available data. The expansion of the country coverage on the standard report forms allows for publication of additional country detail for data beginning as of June 2006. As a result, the former Capital Movements Section III, which listed bank-reported claims and liabilities of selected countries from the semiannual reports, has been discontinued.

- Section I covers liabilities to foreigners reported by banks, other depository institutions, and securities brokers and dealers in the United States. BHCs/FHCs also report for all domestic nonbank, non-securities firm affiliates, other than their insurance affiliates, which report separately on the C-series forms. Dollar-denominated liabilities are reported monthly on Forms BL-1 and BL-2. Liabilities denominated in foreign currencies are reported quarterly on Form BQ-2. Respondents report certain of their own liabilities and a wide range of their custody liabilities to foreigners. Effective with reports filed as of February 28, 2003, coverage was broadened to cover the positions of U.S. broker-dealer respondents with their affiliated foreign offices. (Depository institutions and BHCs/FHCs already reported such positions.) The scope of the reports was also extended to include cross-border brokerage balances as well as offshore sweep accounts and loans to U.S. residents in "managed" foreign offices of U.S. reporting institutions. Additionally, in a new Part 2, Form BQ-2 was expanded to include the foreign currency-denominated liabilities held by respondents for their domestic customers. Further, banks’ own positions have been defined to be consistent with regulatory reports such as the FR 2950/2951 to include all amounts in the respondent's "due to/due from" accounts, unless in an instrument that is specifically excluded. Finally, the columns for demand deposits and non-transactions accounts are now combined, as are short-term U.S. agency securities and other negotiable and readily transferable instruments.
- Section II presents claims on foreigners reported by banks, other depository institutions, and securities brokers and dealers in the United States. BHCs/FHCs also report for their domestic nonbank and non-securities firm affiliates, other than their insurance affiliates, which report separately on the C-series forms. Data on respondents' own dollar claims are collected monthly on Form BC. Information on claims held for domestic customers as well as on claims denominated in foreign currencies is collected on a quarterly basis only on Forms BQ-1 and BQ-2, respectively. Effective with reports filed as of February 28,

2003, reporting coverage was expanded as outlined in Section I. Additionally, columns were added for separate reporting of issued by foreigners. Further, the foreigner category, negotiable CDs and other short-term negotiable instruments issued by foreigners. Further, the foreigner category, "foreign official institutions," replaced the former, broader category, "foreign public borrowers," for consistency with the liabilities reporting on this sector.

- Section III (formerly reported as Section IV) shows the liabilities to, and claims on, unaffiliated foreigners of exporters, importers, industrial and commercial concerns, financial institutions (other than banks, other depository institutions, and securities brokers and dealers), and other nonbanking enterprises in the United States. Data exclude claims on foreigners held by banks in the United States.

Historically, the TIC reports CQ-1 and CQ-2 exclude accounts of nonbanking enterprises in the United States with their own branches and subsidiaries abroad or with their foreign parent companies. Such accounts with foreign affiliates are reported by business enterprises to Commerce on its direct investment forms. There was an exception when reporting of foreign affiliate positions of insurance underwriting subsidiaries and financial intermediaries was included in Section B of Form CQ-1 for reports between end-March 2003 and end-March 2006. That reporting requirement was discontinued with the reports beginning as of June 2006.

- Section IV (formerly Section V) contains information on transactions with foreigners in long-term domestic and foreign securities as reported by banks, securities brokers and dealers, and other entities in the United States. The data cover transactions executed in the United States for the accounts of foreigners and transactions executed abroad for the accounts of reporting institutions and their domestic customers. This includes transactions in newly-issued securities as well as transactions in, and redemptions of, outstanding issues. However, the data do not include nonmarketable Treasury bonds and notes shown in Table IFS-3.

The geographical allocation of the transactions data indicates the country of location of the foreign buyers and sellers who deal directly with reporting institutions in the United States. The data do not necessarily indicate the country of beneficial owner or issuer, or the currency of denomination of securities. For instance, a U.S. purchaser’s order for Japanese securities may be placed directly with an intermediary in London. In this instance, the transaction for Form S reporting purposes would be recorded opposite the United Kingdom and not opposite Japan. Similarly, purchases and sales of U.S. securities for the account of an Italian resident may be placed, for example, in the Swiss
market. In that case, the trades would be reported opposite Switzerland and not opposite Italy.

- Section V presents quarterly data on holdings and net cash settlements of cross-border derivatives contracts reported by banks, securities brokers, dealers, and nonfinancial companies in the U.S. with sizable holdings of derivatives contracts. Total holdings are divided between those contracts with positive fair values and those contracts with negative fair values from the perspective of the reporter. The fair (market) value is generally defined as the amount for which a derivative contract could be exchanged in a current transaction between willing parties, other than in a forced or liquidation sale.

The data on U.S. net settlements with foreign residents include all cash receipts and payments made during the quarter for the acquisition, sale, or final closeout of derivatives, including all settlement payments under the terms of derivatives contracts such as the periodic settlement under a swap agreement and the daily settlement of an exchange-traded contract. In calculating net settlements, U.S. receipts of cash from foreign persons are positive amounts $(+)$, and U.S. payments of cash to foreign persons are negative amounts (-). Items excluded from net settlements are: (a) collateral including initial and maintenance margins, whether or not in the form of cash; and (b) purchases of underlying commodities, securities, or other noncash assets. (e.g., the purchase/sale by foreigners of a long-term security is reported on TIC Form S).

The gross fair (market) values and net settlement payments on derivatives are reported by type of derivative and by country based on the residence of the direct foreign counterparty. Positions of foreign customers on U.S. exchanges are reported opposite the country in which the foreign counterparty resides. In the case of U.S. residents’ futures contracts on foreign exchanges, the country of the exchange is reported as the country of the foreign counterparty.

NOTE: Current and historical data on United States transactions with foreigners in long-term securities on the gross foreign liabilities and claims reported by banks and nonbanks in the United States and on derivatives contracts with foreigners are available on the TIC website: http://www.ustreas.gov/tic. These data may be downloaded as separate time series for each country or geographical area regularly shown in the capital movements tables. Also available on this website are other series, including a table on "Major Foreign Holders of Treasury Securities," showing estimated total holdings of U.S. Treasury bills, bonds and notes for current and recent periods. All data series on the TIC website are updated monthly.

[^22]U.S. liabilities to foreigners reported by U.S. banks were recorded at $\$ 4.5$ trillion in March 2009, a decrease of $\$ 101$ billion from yearend 2008. U.S. banking liabilities include foreign holdings of U.S. short-term securities but exclude foreign holdings of U.S. long-term securities. U.S. banking liabilities decreased about $\$ 91$ billion in 2008, but increased about $\$ 696$ billion in 2007 and about $\$ 824$ billion in 2006. However, much of the increase in liabilities to foreigners in 2006 reflects changes in coverage in the bank-reported data in the first and second quarters of 2006. Between June and December of 2006, when data were reported on a consistent basis, banking liabilities increased about $\$ 250$ billion.
U.S. banking liabilities are concentrated in international financial centers. The data on this page show that almost 60 percent of U.S. banking liabilities is currently recorded against the United Kingdom and banking centers in the Caribbean. These financial centers have recorded most of the growth in banking liabilities in recent years up through 2007. Since 2007, however, U.S. banking liabilities recorded against the United Kingdom have declined sharply. Meanwhile, banking liabilities to Asia have continued to grow at a rapid pace.

[^25]In December 2008, U.S. claims on foreigners reported by U.S. banks amounted to about \$3.4 trillion, a decrease of \$398 billion from that recorded at yearend 2007. U.S. banking claims include holdings of foreign short-term securities but exclude holdings of foreign long-term securities. U.S. banking claims increased \$652 billion in 2007 and $\$ 640$ billion in 2006, but part of the latter increase reflects changes in coverage in the bank-reported data in the first and second quarters of 2006. Between June and December of 2006, when data were reported on a consistent basis, banking claims increased about $\$ 209$ billion. Banking claims increased \$312 billion in 2005.

As with U.S. banking liabilities, U.S. banking claims on foreigners are concentrated in international financial centers. About 60 percent of these claims are reported opposite the United Kingdom and banking centers in the Caribbean. Since 2007, however, claims reported against the Caribbean banking centers have continued to increase while claims reported against the United Kingdom have declined.

# SECTION III.-Liabilities to, and Claims on, Unaffiliated Foreigners Reported by Nonbanking Business Enterprises in the United States

[^35]The data on this page represent foreign investors' purchases and sales of longterm U.S. securities (that is, U.S. Treasury and Government agency bonds and notes, and U.S. corporate bonds and stocks) as reported to the TIC reporting system. Foreign investors have also acquired U.S. equities through mergers and reincorporations that involve stock swaps. Net foreign acquisitions of U.S. equities through stock swaps amounted to $\$ 6$ billion in 2005, $\$ 4$ billion in 2006, $\$ 11$ billion in 2007, and less than $\$ 1$ billion in 2008. There were no reported acquisitions through stock swaps in the first quarter of 2009. (Stock swaps data for the most recent quarter are Federal Reserve Board/Treasury estimates and are subject to substantial revisions.) These stock swaps are not reported under the TIC reporting system, but are available on the TIC Website. The TIC Website also provides estimates from the Federal Reserve Bank of New York on principal repayment flows of foreign holdings of U.S. government agency and corporate asset-backed securities (ABS). These repayments are estimated to have reduced foreign net purchases of U.S. securities by $\$ 144$ billion in 2005, $\$ 160$ billion in 2006, $\$ 234$ billion in 2007, $\$ 191$ billion in 2008, and $\$ 51$ billion in the first quarter of 2009.

In 2005, net foreign acquisitions of U.S. securities (including stock swaps and accounting for ABS repayment flows) totaled $\$ 873$ billion. Net purchases reached a record of \$987 billion in 2006, but then slowed to $\$ 782$ billion in 2007. Net acquisitions slowed further to $\$ 221$ billion in 2008, as foreign investors continued to acquire U.S. securities in the first half of the year, but on net sold U.S. securities in the second half of the year. In the first quarter of 2009, foreign net purchases (after accounting for ABS repayments) were $\$ 15$ billion.

# CHART CM-D.-Net Purchases of Long-Term Foreign Securities by U.S. Investors*

| * Net purchases by U.S. investors equal net sales by foreigners, or gross sales minus gross purchases of securities. |  |  |  |  |  |  |

The data on this page represent U.S. investors' purchases and sales of longterm foreign securities as reported to the TIC reporting system. U.S. investors also have acquired foreign stocks through mergers that involve stock swaps. In addition, when foreign firms reincorporate in the United States, the associated stock swap reduces U.S. holdings of foreign equity. Net acquisitions through stock swaps amounted to $\$ 12$ billion in 2004, $\$ 4$ billion in 2005, $\$ 19$ billion in 2006, $\$ 11$ billion in 2007, $\$ 4$ billion in 2008, and $\$ 2$ billion in the first quarter of 2009. (Stock swaps data for the most recent quarter are Federal Reserve Board/Treasury estimates and are subject to substantial revisions.) These stock swaps are not reported under the TIC reporting system, but are available on the TIC Website.

Including the stock swaps, U.S. net purchases of long-term foreign securities amounted to $\$ 141$ billion in 2004. U.S. acquisitions picked up to $\$ 176$ billion in 2005 and $\$ 270$ billion in 2006, but then eased somewhat to $\$ 241$ billion in 2007. U.S. investors switched to net sales of $\$ 98$ billion in foreign securities in 2008. In the first quarter of 2009, U.S. investors acquired $\$ 26$ billion in foreign securities (after accounting for acquisitions through stock swaps).

## INTRODUCTION: Foreign Currency Positions

The "Treasury Bulletin" reports foreign currency holdings of large foreign exchange market participants. These reports provide information on positions in derivative instruments, such as foreign exchange futures and options, that are increasingly used in establishing foreign exchange positions but were not covered in the old reports.

The information is based on reports of large foreign exchange market participants on holdings of five major foreign currencies (Canadian dollar, Japanese yen, Swiss franc, pound sterling, and euro) and the U.S. dollar. Positions in the U.S. dollar, which have been collected since January 1999, are intended to approximate "all other" currency positions of reporting institutions. U.S.-based businesses file a consolidated report for their domestic and foreign subsidiaries, branches, and agencies. U.S. subsidiaries of foreign entities file only for themselves, not for their foreign parents. Filing is required by law (31 United States Code 5315; 31 Code of Federal Regulations 128, Subpart C).

Weekly and monthly reports must be filed throughout the calendar year by major foreign exchange market participants, which are defined as market participants with more than $\$ 50$ billion equivalent in foreign exchange contracts on the last business day of any calendar quarter during the previous year (end March, June, September, or December). Such contracts include the amounts of foreign exchange spot contracts bought and sold, foreign exchange forward contracts bought and sold, foreign exchange futures bought and sold, and one half the notional amount of foreign exchange options bought and sold.

A quarterly report must be filed throughout the calendar year by each foreign exchange market participant that had more than $\$ 5$ billion equivalent in foreign exchange contracts on the last business day of any quarter the previous year (end March, June, September, or December).

This information is published in six sections corresponding to each of the major currencies covered by the reports. Tables I-1 through VI-1 present the currency data reported weekly by major market participants. Tables I-2 through VI-2 present more detailed currency data of major market participants, based on monthly Treasury reports. Tables I-3 through VI-3 present quarterly consolidated currency data reported by large market participants that do not file weekly reports.

Principal exchanged under cross-currency interest rate swaps is reported as part of purchases or sales of foreign exchange. Such principal also was noted separately on monthly and quarterly reports through December 1998, when this practice was discontinued. The net options position, or the net delta-equivalent value of an options position, is an estimate of the relationship between an option's value and an equivalent currency hedge. The delta equivalent value is defined as the product of the first partial derivative of an option valuation formula (with respect to the price of the underlying currency) multiplied by the notional principal of the contract.

## INTRODUCTION: Exchange Stabilization Fund

To stabilize the exchange value of the dollar, the Exchange Stabilization Fund (ESF) was established pursuant to chapter 6, section 10 of the Gold Reserve Act of January 30, 1934 (codified at 31 United States Code 5302), which authorized establishment of a Treasury fund to be operated under the exclusive control of the Secretary, with approval of the President.

Subsequent amendment of the Gold Reserve Act modified the original purpose somewhat to reflect termination of the fixed exchange rate system.

Resources of the fund include dollar balances, partially invested in U.S. Government securities, special drawing rights (SDRs), and balances of foreign currencies. Principal sources of income (+) or loss (-) for the fund are profits ( + ) or losses (-) on SDRs and foreign exchange, as well as interest earned on assets.

- Table ESF-1 presents the assets, liabilities, and capital of the fund. The figures are in U.S. dollars or their equivalents based on current exchange rates computed according to the accrual method of accounting. The capital account represents the original capital appropriated to the fund by Congress of $\$ 2$ billion, minus a subsequent transfer of $\$ 1.8$ billion to pay for the initial U.S. quota subscription to the International Monetary Fund. Gains and losses are reflected in the cumulative net income ( + ) or loss ( - ) account.
- Table ESF-2 shows the results of operations by quarter. Figures are in U.S. dollars or their equivalents computed according to the accrual method. "Profit (+) or loss (-) on foreign exchange" includes realized profits or losses. "Adjustment for change in valuation of SDR holdings and allocations" reflects net gain or loss on revaluation of SDR holdings and allocations for the quarter.

Note.- Annual balance sheets for fiscal years 1934 through 1940 appeared in the 1940 "Annual Report of the Secretary of the Treasury" and those for succeeding years appeared in subsequent reports through 1980. Quarterly balance sheets beginning with December 31, 1938, have been published in the "Treasury Bulletin." Data from inception December 31, 1938, have been published in the "Treasury Bulletin." Data from inception
to September 30, 1978, may be found on the statements published in the January 1979
"Treal "Treasury Bulletin."

Trust Funds

## INTRODUCTION: Black Lung Disability Trust Fund Paragraph added since December 2008

The Black Lung Disability Trust Fund was established on the books of the Treasury in fiscal year 1978 according to the Black Lung Benefits Revenue Act of 1977 (Public Law 95-227). The Black Lung Benefits Revenue Act of 1981 (Public Law 97-119) reestablished the fund in the Internal Revenue Code (IRC), 26 United States Code 9501.

The Consolidated Omnibus Budget Reconciliation Act of 1985 (Public Law 99-272), enacted April 7, 1986, provided for an increase in the coal tax rates effective April 1, 1986, through December 31, 1995, and a 5-year forgiveness of interest retroactive to October 1, 1985. The 5-year moratorium on interest payments ended on September 30, 1990. Payment of interest on advances resumed in fiscal year 1991. The Omnibus Budget Reconciliation Act of 1987 (Public Law 100-203, title X, section 10503), signed December 22, 1987, extends the temporary increase in the coal tax through December 31, 2013.

The Emergency Economic Stabilization Act of 2008 (Public Law 110-343, title I, subtitle B, section 113), enacted October 3, 2008, restructured the Trust Fund Debt by 1) refinancing the outstanding principal of the repayable advances and unpaid interest on such advances and 2) providing a one time Appropriation to the Trust Fund in an amount sufficient to pay to the general fund of the Treasury the difference between the market value of the outstanding repayable advances, plus accrued interest and the proceeds from the obligations issued by the Trust Fund to the Secretary of the Treasury. The Act also extends the temporary increase in the coal tax through December 31, 2018, and allows the prepayment of the Trust Fund debt prior to the maturity date.

The Code designates the following receipts to be appropriated and transferred from the general fund of the Treasury to the trust fund: excise taxes on coal sold; taxable expenditures of self-dealing by, and excess contributions to, private black lung benefit trusts; reimbursements by responsible mine operators; and related fines, penalties and interest charges.

Estimates made by the Secretary of the Treasury determine monthly transfers of amounts for excise taxes to the trust fund subject to adjustments in later transfers to actual tax receipts.

After retirement of the current indebtedness, amounts available in the fund exceeding current expenditure requirements will be invested by the Secretary of the Treasury in interest-bearing public debt securities. Any interest earned will be credited to the fund. Also credited, if necessary, will be repayable advances from the general fund to meet outlay requirements exceeding available revenues.

To carry out the program, amounts are made available to the Department of Labor (DOL). Also charged to the fund are administrative expenses incurred by the Department of Health and Human Services (HHS) and the Treasury, repayments of advances from the general fund and interest on advances.

The Code requires the Secretary of the Treasury to submit an annual report to Congress after consultation with the Secretary of Labor and the Secretary of HHS [26 United States Code 9602(a)]. The report must present the financial condition and results of operations of the fund during the past fiscal year and the expected condition and operations of the fund during the next 5 fiscal years.

# TABLE TF-3.-Black Lung Disability Trust Fund Results of Operations, Fiscal Year 2008 

* Previous balance of $\$ 39,863,024$ was submitted in error. The correct beginning balance is $\$ 39,828,060$.

## TABLE TF-6A.—Highway Trust Fund

The following information is released according to the provisions of the Byrd Amendment [codified at 26 United States Code 9503(d)] and represents data concerning the Highway Trust Fund. The figure described as "unfunded authorizations" is the latest estimate received from the DOT for fiscal year 2010.

The 48-month revenue estimates for the highway and mass transit accounts, respectively, include the latest estimates received from Treasury's Office of Tax Analysis for excise taxes, net of refunds. They represent net highway receipts for those periods beginning at the close of fiscal year 2010.

## Glossary

## With References to Applicable Sections and Tables

Source: Financial Management Service

Amounts outstanding and in circulation (USCC)-Includes all issues by the Bureau of the Mint purposely intended as a medium of exchange. Coins sold by the Bureau of the Mint at premium prices are excluded; however, uncirculated coin sets sold at face value plus handling charge are included.

Average discount rate (PDO-1, -2)—In Treasury bill auctions, purchasers tender competitive bids on a discount rate basis. The average discount rate is the weighted, or adjusted, average of all bids accepted in the auction.
Budget authority ("Federal Fiscal Operations")—Congress passes laws giving budget authority to Government entities, which gives the agencies the power to spend Federal funds. Congress can stipulate various criteria for the spending of these funds. For example, Congress can stipulate that a given agency must spend within a specific year, number of years, or any time in the future.

The basic forms of budget authority are appropriations, authority to borrow, contract authority, and authority to obligate and expend offsetting receipts and collections. The period of time during which Congress makes funds available may be specified as 1-year, multiple-year, or no-year. The available amount may be classified as either definite or indefinite; a specific amount or an unspecified amount can be made available. Authority also may be classified as current or permanent. Permanent authority requires no current action by Congress.
Budget deficit-The total, cumulative amount by which budget outlays (spending) exceed budget receipts (income).
Cash management bills (PDO-1)—Marketable Treasury bills of irregular maturity lengths, sold periodically to fund short-term cash needs of Treasury. Their sale, having higher minimum and multiple purchase requirements than those of other issues, is generally restricted to competitive bidders.
Competitive tenders ("Treasury Financing Operations")A bid to purchase a stated amount of one issue of Treasury securities at a specified yield or discount. The bid is accepted if it is within the range accepted in the auction. (See Noncompetitive tenders.)

Currency no longer issued (USCC)—Old and new series gold and silver certificates, Federal Reserve notes, national bank notes, and 1890 Series Treasury notes.

Debt outstanding subject to limitation (FD-6)—The debt incurred by the Treasury subject to the statutory limit set by Congress. Until World War I, a specific amount of debt was authorized to each separate security issue. Beginning with the

Second Liberty Loan Act of 1917, the nature of the limitation was modified until, in 1941, it developed into an overall limit on the outstanding Federal debt. As of March 2009, the debt limit was $\$ 12,104,000$ million; the limit may change from year to year.

The debt subject to limitation includes most of Treasury's public debt except securities issued to the Federal Financing Bank, upon which there is a limitation of \$15 billion, and certain categories of older debt (totaling approximately $\$ 595$ million as of February 1991).
Discount-The interest deducted in advance when purchasing notes or bonds. (See Accrued discount.)

Discount rate (PDO-1)—The difference between par value and the actual purchase price paid, annualized over a 360-day year. Because this rate is less than the actual yield (couponequivalent rate), the yield should be used in any comparison with coupon issue securities.

Dollar coins (USCC)—Include standard silver and nonsilver coins.

Domestic series (FD-2)—Nonmarketable, interest- and non-interest-bearing securities issued periodically by Treasury to the Resolution Funding Corporation (RFC) for investment of funds authorized under section 21B of the Federal Home Loan Bank Act (12 United States Code 1441b).

Federal intrafund transactions ("Federal Fiscal Opera-tions")-Intrabudgetary transactions in which payments and receipts both occur within the same Federal fund group (Federal funds or trust funds).
Federal Reserve notes (USCC)—Issues by the U.S. Government to the public through the Federal Reserve banks and their member banks. They represent money owed by the Government to the public. Currently, the item "Federal Reserve notes-amounts outstanding" consists of new series issues. The Federal Reserve note is the only class of currency currently issued.

Foreign ("Foreign Currency Positions," IFS-2, -3)Locations other than those included under the definition of the United States. (See United States.)
Foreigner ("Capital Movements," IFS-2)—All institutions and individuals living outside the United States, including U.S. citizens living abroad, and branches, subsidiaries, and other affiliates abroad of U.S. banks and business concerns; central governments, central banks, and other official institutions of countries other than the United States; and
international and regional organizations, wherever located. Also refers to persons in the United States to the extent that they are known by reporting institutions to be acting for foreigners.

Foreign official institutions ("Capital Movements")Includes central governments of foreign countries, including all departments and agencies of national governments; central banks, exchange authorities, and all fiscal agents of foreign national governments that undertake activities similar to those of a treasury, central bank, or stabilization fund; diplomatic and consular establishments of foreign national governments; and any international or regional organization, including subordinate and affiliate agencies, created by treaty or convention between sovereign states.
Foreign public borrower ("Capital Movements")—Includes foreign official institutions, as defined above, the corporations and agencies of foreign central governments, including development banks and institutions, and other agencies that are majority-owned by the central government or its departments; and state provincial and local governments of foreign countries and their departments and agencies.
Foreign-targeted issue (PDO-2)—Foreign-targeted issues were notes sold between October 1984 and February 1986 to foreign institutions, foreign branches of U.S. institutions, foreign central banks or monetary authorities, or to international organizations in which the United States held membership. Sold as companion issues, they could be converted to domestic (normal) Treasury notes with the same maturity and interest rates. Interest was paid annually.

Fractional coins (USCC)—Coins minted in denominations of 50,25 , and 10 cents, and minor coins ( 5 cents and 1 cent).
Government account series (FD-2)—Certain trust fund statutes require the Secretary of the Treasury to apply monies held by these funds toward the issuance of nonmarketable special securities. These securities are sold directly by Treasury to a specific Government agency, trust fund, or account. Their rate is based on an average of market yields on outstanding Treasury obligations, and they may be redeemed at the option of the holder. Roughly 80 percent of these are issued to five holders: the Federal Old-Age and Survivors Insurance Trust Fund; the civil service retirement and disability fund; the Federal Hospital Insurance Trust Fund; the military retirement fund; and the Unemployment Trust Fund.

Interfund transactions ("Federal Fiscal Operations")Transactions in which payments are made from one fund group (either Federal funds or trust funds) to a receipt account in another group.

International Monetary Fund ("Exchange Stabilization Fund," IFS-1)-(IMF) Established by the United Nations, the IMF promotes international trade, stability of exchange, and monetary cooperation. Members are allowed to draw from the fund.

Intrabudgetary transactions ("Federal Fiscal Operations")These occur when payment and receipt both occur within the budget, or when payment is made from off-budget Federal entities whose budget authority and outlays are excluded from the budget totals.

Noncompetitive tenders ("Treasury Financing Opera-tions")-This is a tender or bid to purchase a stated par amount of securities at the highest yield or discount rate awarded to competitive bidders for a single-price auction.
Obligations ("Federal Fiscal Operations")—An unpaid commitment to acquire goods or services.
Off-budget Federal entities ("Federal Fiscal Operations")Federally owned and controlled entities whose transactions are excluded from the budget totals under provisions of law. Their receipts, outlays, and surplus or deficit are not included in budget receipts, outlays, or deficits. Their budget authority is not included in totals of the budget.
Outlays ("Federal Fiscal Operations")—Payments on obligations in the form of cash, checks, the issuance of bonds or notes, or the maturing of interest coupons.
Own foreign offices ("Capital Movements")—Refers to U.S. reporting institutions' parent organizations, branches and/or majority-owned subsidiaries located outside the United States.

Par value-The face value of bonds or notes, including interest.

Quarterly financing ("Treasury Financing Operations")Treasury has historically offered packages of several "coupon" security issues on the 15th of February, May, August, and November, or on the next working day. These issues currently consist of a 3 -year note, a 10-year note, and a 30-year bond. Treasury sometimes offers additional amounts of outstanding long-term notes or bonds, rather than selling new security issues. (See Reopening.)
Receipts ("Federal Fiscal Operations")—Funds collected from selling land, capital, or services, as well as collections from the public (budget receipts), such as taxes, fines, duties, and fees.
Reopening (PDO-2)—The offer for sale of additional amounts of outstanding issues, rather than an entirely new issue. A reopened issue will always have the same maturity date, CUSIP-number, and interest rate as the original issue.
Special drawing rights ("Exchange Stabilization Fund," IFS-1)—International assets created by IMF that serve to increase international liquidity and provide additional international reserves. SDRs may be purchased and sold among eligible holders through IMF. (See IMF.)

SDR allocations are the counterpart to SDRs issued by IMF based on members' quotas in IMF. Although shown in Exchange Stabilization Fund (ESF) statements as liabilities,
they must be redeemed by ESF only in the event of liquidation of, or U.S. withdrawal from, the SDR department of IMF or cancellation of SDRs.

SDR certificates are issued to the Federal Reserve System against SDRs when SDRs are legalized as money. Proceeds of monetization are deposited into an ESF account at the Federal Reserve Bank of New York.

Spot ("Foreign Currency Positions")—Due for receipt or delivery within 2 workdays.
State and local government series (SLGS) (FD-2)—Special nonmarketable certificates, notes, and bonds offered to State and local governments as a means to invest proceeds from their own tax-exempt financing. Interest rates and maturities comply with IRS arbitrage provisions. SLGS are offered in both time deposit and demand deposit forms. Time deposit certificates have maturities of up to 1 year. Notes mature in 1 to 10 years and bonds mature in more than 10 years. Demand deposit securities are 1-day certificates rolled over with a rate adjustment daily.
Statutory debt limit (FD-6)—By Act of Congress there is a limit, either temporary or permanent, on the amount of public debt that may be outstanding. When this limit is reached, Treasury may not sell new debt issues until Congress
increases or extends the limit. For a detailed listing of changes in the limit since 1941, see the Budget of the United States Government. (See debt outstanding subject to limitation.)

STRIPS (PDO-2)—Separate Trading of Registered Interest and Principal Securities. Long-term notes and bonds may be divided into principal and interest-paying components, which may be transferred and sold in amounts as small as $\$ 1,000$. STRIPS are sold at auction at a minimum par amount, varying for each issue. The amount is an arithmetic function of the issue's interest rate.

Treasury bills-The shortest term Federal security (maturity dates normally varying from 3 to 12 months), are sold at a discount.
Trust fund transaction ("Federal Fiscal Operations")An intrabudgetary transaction in which both payments and receipts occur within the same trust fund group.

United States-Includes the 50 States, District of Columbia, Commonwealth of Puerto Rico, American Samoa, Midway Island, Virgin Islands, Wake Island, and all other territories and possessions.
U.S. notes (USCC)—Legal tender notes of five different issues: 1862 (\$5-\$1,000 notes); 1862 (\$1-\$2 notes); 1863 (\$5\$1,000 notes); 1863 (\$1-\$10,000 notes); and 1901 (\$10 notes).

    Note.-Detail may not add to totals due to rounding.

[^4]:    See footnotes at end of table

[^5]:    ${ }^{1}$ This report does not include Supplementary Financing Program balances.
    ${ }^{2}$ Represents transfers from tax and loan note accounts, proceeds from sales of securities
    ${ }_{3}$ other than Government account series, and taxes.
    ${ }^{3}$ Represents checks paid, wire transfer payments, drawdowns on letters of credit,
    redemptions of securities other than Government account series, and investment (transfer)
    of excess funds out of this account to the tax and loan note accounts.

[^6]:    ${ }^{4}$ Taxes eligible for credit consist of those deposited by taxpayers in the tax and loan depositaries as follows: withheld income taxes beginning March 1948; taxes on employers and employees under the Federal Insurance Contributions Act beginning January 1950 and under the Railroad Retirement Tax Act beginning July 1951; a number of excise taxes beginning July 1953; estimated corporation income taxes beginning April 1967; all corporation income taxes due on or after March 15, 1968; Federal Unemployment Tax Act taxes beginning April 1970; and individual estimated income taxes beginning October 1988.

[^7]:    ${ }^{1}$ Consists of guaranteed debt issued by the Federal Housing Administration.

[^8]:    ${ }^{1}$ All 4 -week and 13 -week bills represent additional issues of bills with an original maturity $\quad{ }^{3}$ Tenders for $\$ 1$ million or less from any one bidder are accepted in full at the high of 26 weeks or 52 weeks. Certain 26 -week bills represent additional issues of bills with an price of accepted competitive bids. However, as of September 21,2004 , the limit was original maturity of 52 weeks.
    ${ }^{2}$ Includes amount awarded to the Federal Reserve System. raised to $\$ 5$ million. All Treasury marketable auctions are conducted in a single-price format as of November 2, 1998.
    ${ }^{4}$ Equivalent coupon-issue yield.

[^9]:    * Rates are from the Treasury yields curve.

[^10]:    See footnotes following table USCC-2.

[^11]:    ${ }^{1}$ Issued on or after July 1, 1929.
    ${ }^{2}$ Excludes coins sold to collectors at premium prices
    ${ }^{3}$ Includes \$481,781,898 in standard silver dollars.

[^12]:    ${ }^{1}$ Beginning July 1974, the International Monetary Fund (IMF) adopted a technique for valuing the special drawing right (SDR) based on a weighted average of exchange rates for the currencies of selected member countries. The U.S. SDR holdings and reserve position in the IMF also are valued on this basis beginning July 1974.
    ${ }^{2}$ Treasury values its gold stock at $\$ 42.2222$ per fine troy ounce and pursuant to 31 United States Code 5117 (b) issues gold certificates to the Federal Reserve at the same rate agains ${ }_{3}$ all gold held.
    ${ }^{3}$ Includes allocations of SDRs in the Special Drawing Account in the IMF, plus or minus transactions in SDRs.

[^13]:    ${ }^{4}$ Includes holdings of Treasury and Federal Reserve System; beginning November 1978, these are valued at current market exchange rates or, where appropriate, at such other rates as may be agreed upon by the parties to the transactions. Excludes outstanding reciprocal currency swaps with the foreign central banks. At end-April 2009 swaps outstanding were $\$ 249.302$ billion: $\$ 130.1$ billion with the European Central Bank, $\$ 11.651$ billion with the Swiss National Bank, $\$ 13.488$ billion with the Bank of England, $\$ 39.810$ billion with the Bank of Japan, $\$ 3.605$ billion with the Federal Reserve Bank of Australia, $\$ 23$ billion with the Bank of Sweden, $\$ 5.425$ billion with the National Bank of Denmark, $\$ 5.0$ billion with the Bank of Norway, $\$ 3.221$ billion with the Bank of Mexico and $\$ 14$ billion with the Bank of Korea.
    billion with the Bank of Mexico and $\$ 14$ billion with the Bank of Korea.
    The United States has the right to purchase foreign currencies equivalent to its
    ${ }^{5}$ The United States has the right to purchase foreign currencies equivalent to its
    reserve position in the IMF automatically if needed. Under appropriate conditions, the United States could purchase additional amounts related to the U.S. quota.

[^14]:    ${ }^{8}$ Data on the two lines shown for this date reflect different benchmark bases for foreigners' holdings of selected U.S. long-term securities. Figures on the first line are comparable to those for earlier dates; figures on the second line are based in part on benchmark surveys as of end-June 2002, end-June 2003, end-June 2004, end-June 2005, end-June 2006, end-June 2007, and end-June 2008 respectively, and are comparable to those shown for the following dates

    Note.-Table is based on Treasury data and on data reported to the Treasury by banks, other depository institutions and brokers in the United States. Data generally correspond to statistics following in this section and in the "Capital Movements" section. Table excludes International Monetary Fund "holdings of dollars" and holdings of U.S. Treasury letters of credit and nonnegotiable noninterest-bearing special U.S. notes held by international and regional organizations.

[^15]:    ${ }^{1}$ Beginning April 1993, includes current value (principal and accrued interest) of zerocoupon, 30 -year maturity Treasury bond issue to the government of Argentina. Remaining face value of issue is $\$ 264$ million.

[^16]:    ${ }^{2}$ Beginning December 1990, indicates current value of zero-coupon, 30-year maturity Treasury bond issue to the Republic of Venezuela. Remaining face value of issue is \$2,721 million.

[^17]:    ${ }^{2}$ Data may be as of preceding quarter-end for most recent month shown in table.
    ${ }^{3}$ Selected other liabilities are primarily the liabilities of the customers of banks to U.S. managed foreign offices and other foreign institutions

[^18]:    ${ }^{1}$ Before June 2006, data for Cyprus, Iceland, Kazakhstan, Monaco, and Ukraine are included in "All other Europe."
    ${ }^{2}$ On February 4, 2003, Yugoslavia changed its name to Serbia and Montenegro. Data for other entities of the former Yugoslavia recognized as independent states by the United States are reported under "All other Europe" as follows: Beginning in December 1992 for Bosnia and Herzegovina, Croatia, and Slovenia; and beginning in June 1994 for the former Yugoslav Republic of Macedonia.
    ${ }^{3}$ Includes Austria, Belgium, Finland, France, Germany, Greece, Ireland, Italy, Luxembourg, the Netherlands, Portugal, and Spain. For data as of January 2008, also includes Cyprus, Malta, and Slovenia. For data as of January 2009, also includes Slovakia
    ${ }^{4}$ As of May 2004, the European Union includes Austria, Belgium, Cyprus, the Czech Republic Denmark, Estonia, Finland, France, Germany, Greece, Hungary, Ireland, Italy, Latvia, Lithuania, Luxembourg, Malta, the Netherlands, Poland, Portugal, Slovakia, Slovenia, Spain, Sweden, and the United Kingdom. Data available beginning June 2006. As of January 2007, also includes Bulgaria and Romania

[^19]:    See footnotes at end of table

[^20]:    ${ }^{1}$ Excludes negotiable certificates of deposit.
    ${ }^{2}$ Includes both banks' own liabilities and banks' customer liabilities to foreigners primarily in the form of loans, including loans associated with repurchase agreements, and non-
    ${ }_{3}$ negotiable short-term securities.
    ${ }^{3}$ Foreign currency data are as of the previous quarter-end.

[^21]:    ${ }^{4}$ Includes Austria, Belgium, Finland, France, Germany, Greece, Ireland, Italy, Luxembourg, the Netherlands, Portugal, and Spain. For data as of January 2008, also includes Cyprus, Malta, and Slovenia. For data as of January 2009, also includes Slovakia.
    ${ }^{5}$ Includes European, Latin American, Caribbean, Asian, African, and Middle East regional organizations.

[^22]:    ${ }^{1}$ Includes Bahamas, Bermuda, Cayman Islands, Netherlands Antilles, and Panama. For data beginning June 2006, also includes the British Virgin Islands.

[^23]:    ${ }^{1}$ Before June 2006, data for Kazakhstan are included in "All other Europe."
    ${ }^{2}$ Includes Austria, Belgium, Finland, France, Germany, Greece, Ireland, Italy
    Luxembourg, the Netherlands, Portugal, and Spain. For data as of January 2008, also includes Cyprus, Malta, and Slovenia.
    ${ }^{3}$ As of May 2004, the European Union includes Austria, Belgium, Cyprus, the Czech Republic, Denmark, Estonia, Finland, France, Germany, Greece, Hungary, Ireland, Italy,
    Latvia, Lithuania, Luxembourg, Malta, the Netherlands, Poland, Portugal, Slovakia,
    Slovenia, Spain, Sweden, and the United Kingdom. Data available beginning June 2006
    As of January 2007, also includes Bulgaria and Romania
    ${ }^{4}$ Before June 2006, data for Bolivia, Costa Rica, El Salvador, Honduras, and Paraguay are included in "All other Latin America."

[^24]:    ${ }^{1}$ Includes Austria, Belgium, Finland, France, Germany, Greece, Ireland, Italy,
    Luxembourg, the Netherlands, Portugal, and Spain. As of January 2008, also includes
    Cyprus, Malta, and Slovenia.

[^25]:    ${ }^{1}$ Includes Bahamas, Bermuda, Cayman Islands, Netherlands Antilles, and Panama. For data beginning June 2006, also includes the British Virgin Islands.

[^26]:    ${ }^{1}$ Includes Bahrain, Iran, Iraq, Kuwait, Oman, Qatar, Saudi Arabia and the United Arab
    Emirates (Trucial States).
    ${ }^{2}$ Includes Algeria, Gabon, Libya, and Nigeria.
